

Mounting frames

Mounting frames for Actassi S-One DPM connectors

Mounting frame must be assembled in empty holes of some Actassi center plates. Mounting frame can be snapped into square hole WxH 17.5x18.5 mm with wall thickness 1.5 mm. It is compliant to the EIA/TIA 606 marking standard. The mounting frames are available in seven different colours. Material - ABS, dimensions - WxHxD 21x21x14 mm. With and without dust cover for S-One. Blind version and two for fiber connectors SC simplex/ LC duplex and ST. ST version can be used also to some coax F-adapters.

Mounting frames

Mounting frames is used to fix Actassi S-One DPM connectors in outlets and footprints with the square hole. So the frame need to be used in some Exxact, CYB, Renova, Robust, Trend, mounting boxes, patch box, and fixing plates for trays.

How to install

Put the mounting frame in the square hole, then put the connector in the mounting frame from behind. To release the connector, use a small screwdriver and separate the connector and frame at the sides (from behind).
