

SpaceLogic KNX Switch / Blind Master

SpaceLogic KNX range is being improved by adding KNX Secure capabilities

Strong security and peace of mind

KNX protocol is constantly evolving, now available with KNX Secure, that protects installations at both TP and IP level. Schneider Electric improved its Switch / Blind Master with additional functionalities.

Switch actuator devices are used in KNX installations to control loads, for examples lighting / lamps.

Technical benefits

SpaceLogic KNX Switch / Blind Master

- KNX Data Secure certified

Secure

Flexibility

- Master Extension concept
- Express and extended settings
- Interactive manual control

- Firmware update over USB or TP
- Firmware version reading from ETS

Easy improvement

Cost effective choice

- Modularity
- Combined functionalities

- Best-in-class mechanical design
- Quality and certification

Reliable

Sustainable

- Green Premium
- Eco Design
