

What's new in PowerLogic PM5100 & PM5300 series meters (v01.5.0 & v01.6.0)

All PowerLogic™ PM5100 & PM5300 series meters (excluding PM5350) with firmware versions 01.5.0 (PM5110, PM5310, PM5320, PM5330, and PM5340) & 01.6.0 (PM5111, PM5331, and PM5341) offer the following new features and updates:

Addition of 4 communication registers

Four additional communication registers (two float 32 registers (3192, 3194) and two INT16 registers (3196, 3197)) are now added to provide Power Factor values in IEC and IEEE formats.

Restriction on firmware update (v01.6.0 only)

Firmware update through DLF3000 is now restricted up to a maximum of 10 successful attempts.
