

# Iconic Night Walk

REMOVE INSTRUCTIONS BEFORE INSTALLATION

## Detection range

Movement is detected only in the green zone, so small pets won't trigger the light.

## Mode selection

Light comes ON when movement is detected and remains ON for 2 min after the last movement is detected.

Dimmed Light comes ON at night time. Brightens up when movement is detected, and remains bright for 2 min after the last movement is detected, then dims down.

Select mode

## Daylight setting

Set OFF or set sensor threshold level.

OFF

> Night light, movement detection and Sensor light are OFF.

> LED operates between dark (1 lux) and semidark (50 lux) illumination, turn dial to adjust level.

## Installation

> Set the Night light mode using the selector on the back of the product. Set the dial to the OFF position.

> Remove existing double socket skin from the product (pull on top and bottom grooves).

> Plug the Night Walk onto the socket grid (3025G, 395G), apply pressure on the surround to ensure it is properly clipped.

> Wait for the LED to turn OFF ( $\approx 1$ min calibration), set / wait until room illumination is at intended brightness. Adjust daylight setting dial until LED illuminates.

> Remove skin to select Sensor light if desired, and replace.
