

# Product launch

New generation of rotary handles for TeSys GV2 and GV3 circuit breakers and TeSys U starters

> October 2010

Schneider Electric has enhanced its circuit breaker offer with a new range of external handles.

This offer replaces the existing operators associated with the TeSys circuit breakers and TeSys U motor starters. The new handles are smaller, easier to fit, give a more robust feel when being switched and offer improved safety over the old.

## > Product features and benefits include:

### > Ruggedness:

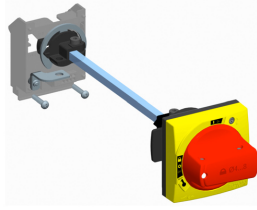

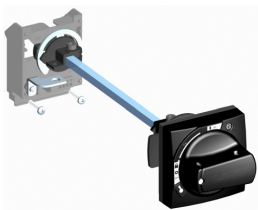

- Stainless steel shaft and axis
- Black or red handles with IP54 and IP65 options
- Conform to the UL 'Nema 4x' standard for harsh environments

### > Safety:

- Verification Positive Opening ( VPO) safety function – this prevents the handle locking in the event of any pole welding closed
- Available in red with yellow escutcheon
- Lockable in the OFF or ON position

### > Ease of installation and use:

- Compact handles with reduced external footprint
- Diameter 22 mm fixing
- Quick fitting and easy alignment using innovative laser tool
