

Product update

New 5.7" innovative Ø 22mm pushbutton mounting style Human Machine Interface

> January 2011

Schneider Electric extends its Magelis range following the success of the 3.5" innovative pushbutton mounting style HMI, by offering a new 5.7" colour graphical touch screen (HMISTU855).

Features:

- > Attractive screen – 5.7" TFT colour touch screen, 320x240 pixels (QVGA) with 65k colours
- > Easy mounting as a 22mm pushbutton
- > Easy remote access via Ethernet (Web Gate, email)
- > External dimension:
 - Front module 163 x 129.4 x 17.5 mm
 - Rear module 118 x 98.1 x 30.6 mm
- > Multiprotocols with ability to connect most of the serial links in the market
- > 2 USB ports (for downloading the configuration either by a standard USB printer cable or USB memory stick)
- > Configured by the Vijeo Designer Software, version V5.1 (Service Pack 2 available in live update)
- > Software is free when used in demo mode to configure the Magelis HMISTO and HMISTU
- > Certifications: CE, cUL, cUL class 1 Div2, C-Tick

Benefits:

- > Reduce the total cost
- > Reduce time to market with the quickly mountable HMI and easy to use software
- > Increase machine performance and appearance:
 - A high-quality display unit and user-friendly operation
 - Easy to change languages for multi-lingual work force
 - Efficient diagnostics and adaptations via Web Gate
- > Improve traceability:
 - Easy integration in the TransparentREADY environment
 - Accurate and efficient data management e.g. stockage and transfer
