- > On-site assistance to commissioning and start-up
- > 3 years / 5 years warranty period
- > E-learning program

**Associated  
Services**

# Associated Services

## Assistance to commissioning and start-up

Ensure your **MasterPact** MTZ "goes live" on time!

Schneider Electric experts are on hand to ensure you minimize the risk of excessive commissioning costs.

Now, you can:

- Join the new MasterPact MTZ digital revolution
- Enhance the quality of commissioning phase
- Check MicroLogic X settings with Schneider Electric's expert tools, before energizing
- Expect immediate resolution for start-up issues.

## Warranty extension

### Don't take the risk!

Avoid the huge costs associated with unexpected events by making a small one-off investment - to ensure you are covered with immediate support, wherever your breaker is. MasterPact MTZ will be repaired or replaced quickly, minimizing operational downtime.

Schneider Electric offers two options, both of which are designed to meet your business and installation needs:

- 3 years warranty period
- 5 years warranty period, including preventive maintenance visit on the 5th year.

## E-Learning program

Get ready to operate and maintain your **MasterPact MTZ!**

For large businesses who have their own in-house maintenance team, the MasterPact MTZ e-learning course delivers an easy-to-follow program.

This e-learning course will educate you as to the benefits and potential of MasterPact MTZ, and show you how to manage daily operations with MicroLogic X control units and with your smart phone.

## Diagnosis solutions

**Ensure the problem is fixed before it even occurs!**

For critical sites and critical assets, proactive maintenance combined with manufacturer's regular ProDiag solutions helps to avoid unplanned shutdowns and production losses.

Schneider Electric offers three diagnostic services:

- ProDiag Trip Unit: diagnoses trip unit malfunctions to prevent risk of circuit breaker not opening
- ProDiag Breaker\*: detects circuit breaker malfunctions to prevent risk of circuit breaker not opening
- ProDiag Cluster\*: detects cluster malfunctions.

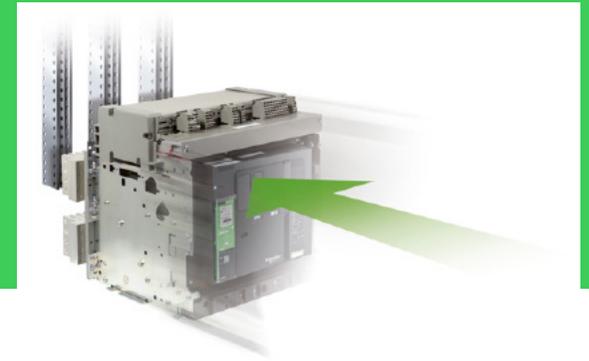

\* available soon for MasterPact MTZ

## ECOFIT Modernization solutions

Reduce the total cost of **MasterPact** ownership by extending its life cycle with minimal replacement downtime!

Schneider Electric's ECOFIT offer means you can upgrade your electrical switchboard and give it the boost it needs for optimized operation and energy management. This can be done by replacing (in the existing chassis) your MasterPact M with the MasterPact MTZ circuit breaker and its MicroLogic X control unit. **ECOFIT** is a unique, eco-friendly, state-of-the-art solution designed to improve your total OPEX (Operational Expenditures).

### The Plug & Play solution

is a simple way to modernize a drawout type MasterPact M of up to 3200 A. This solution does not require shutdown of the entire installation.

### The Masterkit solution

is ideal for modernizing fixed or withdrawable MasterPact units up to 6300 A. Upgrade requires complete installation shutdown, however installation downtime is reduced thanks to pre-designed connections.

# Digitized Services

Manage and maintain your installation using digital services that enable permanent and remote data monitoring of your equipment!

- > Asset Performance Management
- > Asset condition monitoring
- > Energy Efficiency & Power Quality Management
- > Alarm management

Digitized  
Services

# Digitized Services

Digital services are designed for connected equipment including MasterPact MTZ circuit breakers and the MicroLogic X control unit. Combined with Schneider Electric smart equipment, digitized services increase operational efficiency and reduce downtime, thanks to remote data collection.

## Asset Performance Management with EcoStruxure™ Asset Advisor

Proactive maintenance strategies are becoming an important component of asset management programs.

EcoStruxure™ Asset Advisor monitors the state of company electrical assets, so as to enable smarter decision-making. Embedded digital technology including big data and analytics remotely provides key insights into operations and delivers actionable maintenance information.

These insights are invaluable for companies looking to reduce unplanned operational downtime, and help to ensure financial savings, thanks to maintenance optimization.

# Digitized Services

## Asset condition monitoring

Adapt your maintenance tasks to reduce any risk of failure. Maintenance recommendations are triggered based on product data and events.

## Energy Efficiency & Power Quality Management

Specific services are offered that optimize energy costs, asset utilization and facility operations.

## Alarm management

Alarm management helps you in your facility operations by prioritizing alarms and providing remote support.
