C-Bus Toolkit and C-Gate Server

13 April 2021 (08 November 2022)

Overview

Schneider Electric is aware of multiple vulnerabilities in its C-Bus Toolkit and C-Gate server products.

The C-Bus Toolkit product, which includes C-Gate Server, is an application you run on your personal computer to configure and commission C-Bus Installations.

Failure to apply the remediations provided below may risk remote code execution attack, which could result in an attacker having remote access to the computer.

November 2022 Update: The CWE for CVE-2021-22716 has been updated (marked in red). No additional action is required for customers who have already followed the remediation instructions provided below.

Vulnerability Details

CVE ID: CVE-2021-22717

CVSS v3.0 Base Score 8.8 | High | CVSS:3.0/ AV:N/AC:L/PR:L/UI:N/S:U/C:H/I:H/A:H

A CWE-22: Improper Limitation of a Pathname to a Restricted Directory (‘Path Traversal’) vulnerability exists that could allow a remote code execution when processing config files.

CVE ID: CVE-2021-22719

CVSS v3.0 Base Score 8.8 | High | CVSS:3.0/AV:N/AC:L/PR:L/UI:N/S:U/C:H/I:H/A:H

A CWE-22: Improper Limitation of a Pathname to a Restricted Directory (‘Path Traversal’) vulnerability exists that could allow a remote code execution when a file is uploaded.
CVE ID: **CVE-2021-22748**
CVSS v3.1 Base Score 8.8 | High | CVSS:3.1/AV:N/AC:L/PR:L/UI:N/S:U/C:H/I:H/A:H
A **CWE-22: Improper Limitation of a Pathname to a Restricted Directory (Path Traversal)** vulnerability exists that could allow a remote code execution when a file is saved.

CVE ID: **CVE-2021-22796**
CVSS v3.1 Base Score 8.8 | High | CVSS:3.1/AV:N/AC:L/PR:L/UI:N/S:U/C:H/I:H/A:H
A **CWE-287: Improper Authentication** vulnerability exists that could allow remote code execution when a malicious file is uploaded.

CVE ID: **CVE-2021-22716**
CVSS v3.0 Base Score 7.8 | High | CVSS:3.0/AV:L/AC:L/PR:L/UI:N/S:U/C:H/I:H/A:H
A **CWE-732: Incorrect Permission Assignment for Critical Resource** vulnerability exists that could allow remote code execution when an unprivileged user modifies a file.

CVE ID: **CVE-2021-22718**
CVSS v3.0 Base Score 7.8 | High | CVSS:3.0/AV:L/AC:L/PR:N/UI:R/S:U/C:H/I:N/A:N
A **CWE-22: Improper Limitation of a Pathname to a Restricted Directory (Path Traversal)** vulnerability exists that could allow a remote code execution when restoring project files.

CVE ID: **CVE-2021-22720**
CVSS v3.0 Base Score 6.5 | Medium | CVSS:3.0/AV:N/AC:L/PR:L/UI:N/S:U/C:H/I:N/A:N
A **CWE-22: Improper Limitation of a Pathname to a Restricted Directory (Path Traversal)** vulnerability exists that could allow a remote code execution when restoring a project.
## Remediation

<table>
<thead>
<tr>
<th>Affected Product &amp; Versions</th>
<th>Remediation</th>
</tr>
</thead>
</table>
| C-Bus Toolkit
|                             | A reboot will be needed after the update. |
| C-Gate Server
|                             | A reboot will be needed after the update. |

Customers should use appropriate patching methodologies when applying these patches to their systems. We strongly recommend the use of back-ups and evaluating the impact of these patches in a Test and Development environment or on an offline infrastructure. Contact Schneider Electric’s [Customer Care Center](https://www.se.com/ww/en/) if you need assistance removing a patch.

If customers choose not to apply the remediation provided above, they should immediately apply the following mitigations to reduce the risk of exploit:

- Use an allow list for this application
- Turn on the computer’s firewall
- Use an antivirus program
- Secure this computer to prevent unauthorized personnel from accessing this computer

## General Security Recommendations

We strongly recommend the following industry cybersecurity best practices.

- Locate control and safety system networks and remote devices behind firewalls and isolate them from the business network.
- Install physical controls so no unauthorized personnel can access your industrial control and safety systems, components, peripheral equipment, and networks.
Schneider Electric Security Notification

- Place all controllers in locked cabinets and never leave them in the “Program” mode.
- Never connect programming software to any network other than the network for the devices that it is intended for.
- Scan all methods of mobile data exchange with the isolated network such as CDs, USB drives, etc. before use in the terminals or any node connected to these networks.
- Never allow mobile devices that have connected to any other network besides the intended network to connect to the safety or control networks without proper sanitation.
- Minimize network exposure for all control system devices and systems and ensure that they are not accessible from the Internet.
- When remote access is required, use secure methods, such as Virtual Private Networks (VPNs). Recognize that VPNs may have vulnerabilities and should be updated to the most current version available. Also, understand that VPNs are only as secure as the connected devices.

For more information refer to the Schneider Electric Recommended Cybersecurity Best Practices document.

Acknowledgements

Schneider Electric recognizes the following researchers for identifying and helping to coordinate a response to these vulnerabilities:

For More Information

This document provides an overview of the identified vulnerability or vulnerabilities and actions required to mitigate. For more details and assistance on how to protect your installation, contact your local Schneider Electric representative or Schneider Electric Industrial Cybersecurity Services: https://www.se.com/ww/en/work/solutions/cybersecurity/. These organizations will be fully aware of this situation and can support you through the process.

For further information related to cybersecurity in Schneider Electric’s products, visit the company’s cybersecurity support portal page: https://www.se.com/ww/en/work/support/cybersecurity/overview.jsp

About Schneider Electric

Schneider’s purpose is to empower all to make the most of our energy and resources, bridging progress and sustainability for all. We call this Life Is On.

Our mission is to be your digital partner for Sustainability and Efficiency.

We drive digital transformation by integrating world-leading process and energy technologies, end-point to cloud connecting products, controls, software and services, across the entire lifecycle, enabling integrated company management, for homes, buildings, data centers, infrastructure and industries.

We are the most local of global companies. We are advocates of open standards and partnership ecosystems that are passionate about our shared Meaningful Purpose, Inclusive and Empowered values.
