

Schneider Electric Security Notification

Initialization of a Resource with an Insecure Default vulnerability on EcoStruxure™ Panel Server

12 May 2026

Overview

Schneider Electric is aware of its vulnerability in its EcoStruxure™ Panel Server offer.

The [EcoStruxure™ Panel Server](#) is a high performance, modular gateway with enhanced cybersecurity that provides easy and fast connections to multiple concurrent edge control or cloud applications.

Failure to apply the remediations provided below may risk unauthorized authentication, which could lead to access to sensitive information.

Affected Products and Versions

Product	Version
EcoStruxure™ Panel Server PAS400, PAS600, PAS600V2, PAS800, PAS800V2	Versions 002.005.000 and prior

Vulnerability Details

CVE ID: **CVE-2026-6866**

CVSS v3.1 Base Score 7.5 | High | CVSS:3.1/AV:N/AC:L/PR:N/UI:N/S:U/C:H/I:N/A:N

CVSS v4.0 Base Score 8.2 | High | CVSS:4.0/AV:N/AC:L/AT:P/PR:N/UI:N/VC:H/VI:N/VA:N/SC:N/SI:N/SA:N

CWE-1188 Initialization of a Resource with an Insecure Default vulnerability exists that could cause unauthorized disclosure of sensitive information when credentials revert to initial settings in rare circumstances, enabling unauthorized authentication using known credentials.

The severity of vulnerabilities was calculated using the CVSS Base metrics for 4.0 ([CVSS v4.0](#)). CVSS v3.1 will be still evaluated until the adoption of CVSS v4.0 by the industry. The severity was calculated without incorporating the Temporal and Environmental metrics. Schneider Electric recommends that customers score the CVSS Environmental metrics, which are specific to end-user organizations, and consider factors such as the presence of mitigations in that environment. Environmental metrics may refine the relative severity posed by the vulnerabilities described in this document within a customer's environment.

Remediation

Affected Product & Version	Remediation
EcoStruxure™ Panel Server PAS800 <i>Versions 002.005.000 and prior</i>	Version 002.006.000 of EcoStruxure™ Panel Server includes a fix for this vulnerability and is available for download here: <ul style="list-style-type: none"> • https://www.se.com/ww/en/download/document/PAS800_Firmware_Package/ • Reboot needed: Yes
EcoStruxure™ Panel Server PAS800V2 <i>Versions 002.005.000 and prior</i>	Version 002.006.000 of EcoStruxure™ Panel Server includes a fix for this vulnerability and is available for download here: <ul style="list-style-type: none"> • https://www.se.com/ww/en/download/document/PAS800V2_Firmware_Package/ • Reboot needed: Yes
EcoStruxure™ Panel Server PAS600 <i>Versions 002.005.000 and prior</i>	Version 002.006.000 of EcoStruxure™ Panel Server includes a fix for this vulnerability and is available for download here: <ul style="list-style-type: none"> • https://www.se.com/ww/en/download/document/PAS600_Firmware_Package/ • Reboot needed: Yes
EcoStruxure™ Panel Server PAS600V2 <i>Versions 002.005.000 and prior</i>	Version 002.006.000 of EcoStruxure™ Panel Server includes a fix for this vulnerability and is available for download here: <ul style="list-style-type: none"> • https://www.se.com/ww/en/download/document/PAS600V2_Firmware_Package/ • Reboot needed: Yes
EcoStruxure™ Panel Server PAS400 <i>Versions 002.005.000 and prior</i>	Version 002.006.000 of EcoStruxure™ Panel Server includes a fix for this vulnerability and is available for download here: <ul style="list-style-type: none"> • https://www.se.com/ww/en/download/document/PAS400_Firmware_Package/ • Reboot needed: Yes

Customers should use appropriate patching methodologies when applying these patches to their systems. We strongly recommend the use of back-ups and evaluating the impact of these patches in a Test and Development environment or on an offline infrastructure. Contact Schneider Electric’s [Customer Care Center](#) if you need assistance removing a patch.

General Security Recommendations

We strongly recommend the following industry cybersecurity best practices.

- Locate control and safety system networks and remote devices behind firewalls and isolate them from the business network.
- Install physical controls so no unauthorized personnel can access your industrial control and safety systems, components, peripheral equipment, and networks.
- Place all controllers in locked cabinets and never leave them in the “Program” mode.
- Never connect programming software to any network other than the network intended for that device.

Schneider Electric Security Notification

- Scan all methods of mobile data exchange with the isolated network such as CDs, USB drives, etc. before use in the terminals or any node connected to these networks.
- Never allow mobile devices that have connected to any other network besides the intended network to connect to the safety or control networks without proper sanitation.
- Minimize network exposure for all control system devices and systems and ensure that they are not accessible from the Internet.
- When remote access is required, use secure methods, such as Virtual Private Networks (VPNs). Recognize that VPNs may have vulnerabilities and should be updated to the most current version available. Also, understand that VPNs are only as secure as the connected devices.

For more information refer to the Schneider Electric [Recommended Cybersecurity Best Practices](#) document.

Acknowledgements

Schneider Electric recognizes the following researcher for identifying and helping to coordinate a response to this vulnerability:

About Schneider Electric

Schneider's purpose is to **create Impact** by empowering all **to make the most of our energy and resources**, bridging progress and sustainability for all. We call this Life Is On.

Our mission is to be the trusted partner in **Sustainability and Efficiency**.

We are a **global industrial technology leader** bringing world-leading expertise in electrification, automation and digitization to smart **industries**, resilient **infrastructure**, future-proof **data centers**, intelligent **buildings**, and intuitive **homes**. Anchored by our deep domain expertise, we provide integrated end-to-end lifecycle AI enabled Industrial IoT solutions with connected products, automation, software and services, delivering digital twins to enable profitable growth **for our customers**.

We are a **people company** with an ecosystem of 150,000 colleagues and more than a million partners operating in over 100 countries to ensure proximity to our customers and stakeholders. We embrace **diversity and inclusion** in everything we do, guided by our meaningful purpose of a **sustainable future for all**.
