

Schneider Electric Mobile Applications

Important information for Schneider Electric Mobile Application Users

Schneider Electric mobile applications must be downloaded only from following official app stores/marketplaces where the app is published under the official Schneider Electric developer listing:

- Apple App Store
- Google Play
- Samsung Galaxy Store
- Huawei AppGallery
- Meta Quest Store (Horizon)

Apps obtained from unofficial sources (including websites, direct download links, or third-party catalogues not authorized by your organization) may be modified, tampered with, or impersonated, are not supported by Schneider Electric, and may pose security risks to your device and data.

Schneider Electric is responsible for the integrity of the versions of its applications that it publishes through the official stores listed above, and we maintain appropriate technical and organizational measures designed to help protect those versions. Schneider Electric does not warrant and makes no guarantees regarding any application obtained outside the official stores listed above (including as to authenticity, integrity, security, performance, or compatibility).

You are responsible for maintaining the security of your device environment (including hardware, firmware, operating system and configuration) and for ensuring you install Schneider Electric application from an official store listing.

If you have any doubts about an app's authenticity or integrity, please use the official store listing only or contact Schneider Electric Support for verification: se.com/support

This notice should be read together with the applicable app Terms/EULA and Privacy Notice which can be found on each of our mobile applications.

Nothing in this notice limits any rights you may have under applicable law.
