Important Safety Messages

SAVE THESE INSTRUCTIONS - This manual contains important instructions that should be followed during installation and maintenance of the Smart-UPS and batteries.

Read these instructions carefully and look at the equipment to become familiar with the device before trying to install, operate, service or maintain it. The following special messages may appear throughout this document or on the equipment to warn of potential hazards or to call attention to information that clarifies or simplifies a procedure.

The addition of this symbol to either a “Danger” or “Warning” safety label indicates that an electrical hazard exists which will result in personal injury if the instructions are not followed.

This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death.

<table>

Product Handling Guidelines

- <18 kg (<40 lb)
- 18-32 kg (40-70 lb)
- 32-55 kg (70-120 lb)
- >55 kg (>120 lb)
Safety and General Information

Inspect the package contents upon receipt.
Notify the carrier and dealer if there is any damage.

• Adhere to all national and local electrical codes.
• All wiring must be performed by a qualified electrician.
• Changes and modifications to this unit not expressly approved by Schneider Electric could void the warranty.
• This UPS is intended for indoor use only.
• Do not operate this unit in direct sunlight, in contact with fluids, or where there is excessive dust or humidity.
• Be sure the air vents on the UPS are not blocked. Allow adequate space for proper ventilation.
• The equipment is heavy. Always practice safe lifting techniques adequate for the weight of the equipment.

Battery safety

• Servicing of user replaceable batteries should to be performed or supervised by personnel knowledgeable about batteries and required precautions.
• It is not necessary to ground the battery system. The user has the option of referencing the battery system to chassis ground at either a positive or negative battery terminal.
• When replacing batteries, replace with the same number and type.
• Batteries typically last for two to five years. Environmental factors impact battery life. Elevated ambient temperatures, poor quality utility power, and frequent short duration discharges will shorten battery life. Batteries should be replaced before end of life.
• Replace batteries immediately when the unit indicates battery replacement is necessary.
• Schneider Electric uses Maintenance-Free sealed Lead Acid batteries. Under normal use and handling, there is no contact with the internal components of the battery. Over charging, over heating or other misuse of batteries can result in a discharge of battery electrolyte. Released electrolyte is toxic and may be harmful to the skin and eyes.

• CAUTION: Before installing or replacing the batteries, remove jewelry such as wristwatches and rings.
  High short circuit current through conductive materials could cause severe burns.
• CAUTION: Do not dispose of batteries in a fire. The batteries may explode.
• CAUTION: Do not open or mutilate batteries. Released material is harmful to the skin and eyes and may be toxic.

Deenergizing safety

The UPS contains internal batteries and may present a shock hazard even when disconnected from the branch circuit (mains). Before installing or servicing the equipment check that the:

• Input circuit breaker is in the OFF position.
• Internal UPS batteries are removed.
Radio Frequency Warning

**WARNING:** This is a category C2 UPS product. In a residential environment, this product may cause radio interference, in which case the user may be required to take additional measures.

**Note:** This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are intended to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Product Description

The APC™ by Schneider Electric Smart-UPS™ C is a high performance uninterruptible power supply (UPS). The UPS provides protection for electronic equipment from AC power blackouts, brownouts, sags, and surges, small AC power fluctuations and large disturbances. The UPS also provides battery backup power for connected equipment until AC power returns to acceptable levels or the batteries are completely discharged.

This user manual is available on the enclosed Documentation CD and on the APC by Schneider Electric web site, www.apc.com.

Specifications

For additional specifications, refer to the APC by Schneider Electric web site at www.apc.com.

Installation

For UPS installation information, refer to the Installation Guide for the Smart-UPS C 1000/1500/2000/3000 VA Rack-Mount 2U included with the UPS.

The Installation Guide is also available on the Documentation CD included with the UPS and on the APC by Schneider Electric web site, www.apc.com.
Operation

**CAUTION**

**RISK OF ELECTRIC SHOCK**
- Adhere to all local and national electrical codes.
- Wiring must be performed by qualified electrician.
- Always connect the UPS to a grounded outlet.

*Failure to follow these instructions can result in minor or moderate injury*

**Note:** The UPS will charge to 90% capacity in the first three hours of normal operation.
*Do not expect full battery runtime capability during this initial charge period.*

1. Connect equipment to the UPS.
2. Connect the UPS to a two pole, three wire, grounded source.

---

**Connect equipment to the UPS**

<table>
<thead>
<tr>
<th><strong>USB port:</strong></th>
<th>Connect to a computer to use power management software.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Serial port:</strong></td>
<td>Connect a serial port cable (not supplied) to use power management software.</td>
</tr>
<tr>
<td><strong>Chassis ground screw:</strong></td>
<td>Connect the ground leads on transient voltage devices to the chassis ground screw(s), located on the rear panel of the UPS.</td>
</tr>
</tbody>
</table>
Sensitivity adjustment settings

The UPS detects and reacts to line voltage distortions by transferring to battery backup power to protect connected equipment. In situations where the connected equipment is too sensitive for the input voltage level it is necessary to adjust the transfer voltage.

1. Connect the UPS to a AC power source. Be sure the UPS is turned off.
2. Place the unit in Configuration Mode, as described in page 10.
3. Use the Sensitivity Setting option to set the transfer voltage range.

When the UPS is in **Configuration Mode**, the Sensitivity bar graph icons display the sensitivity level setting. Refer to the examples here as a reference.

<table>
<thead>
<tr>
<th>Low sensitivity</th>
<th>Medium sensitivity</th>
<th>High sensitivity (Default)</th>
</tr>
</thead>
<tbody>
<tr>
<td>120 Vac: 97-136 Vac</td>
<td>120 Vac: 103-130 Vac</td>
<td>120 Vac: 106-127 Vac</td>
</tr>
<tr>
<td>230 Vac: 195-265 Vac</td>
<td>230 Vac: 203-257 Vac</td>
<td>230 Vac: 207-253 Vac</td>
</tr>
</tbody>
</table>

Use this setting with equipment that is less sensitive to fluctuations in voltage or waveform distortions.

Use this setting under normal operating conditions.

Use this setting when connected equipment is sensitive to any minor fluctuations in voltage or waveform distortions.

### Status Indicators

**Display panel features**

1. **On Line/On Battery LED**
2. **POWER ON/OFF button**
3. **Site Wiring Fault/System Alert LED**
4. **Display interface**
5. **DISPLAY button**
6. **MUTE button**

**Note:** Refer to “Feature Reference Guide” on page 10 in this manual for a detailed description of the front panel buttons and icons.

</table>

### Configuration Mode

The Configuration Mode provides additional options for the UPS. Press and hold the MUTE and DISPLAY buttons for 2 seconds until the system emits a short beep and the display will flash to indicate the UPS has entered Configuration Mode.

When in Configuration Mode the DISPLAY button forwards the display through the available options and the MUTE button toggles the configuration settings for that option.

**Note:** When system detects 15 seconds of no activity in Configuration Mode, or when you press and hold the MUTE and DISPLAY buttons for 2 seconds until the system emits a short beep, the program automatically exits and returns to Normal mode.
<table>
<thead>
<tr>
<th>Function</th>
<th>Options</th>
<th>Description</th>
</tr>
</thead>
</table>
| Self-Test         | • 0: Default Setting  
                   • 1: Begin Self-Test                | When set to 1, pressing the DISPLAY button will trigger the self test and exit the Configuration Mode.  
0 is the default setting and will not initiate a self test, by pressing the DISPLAY button you will advance to the next configuration item.  
**Note:** When the UPS is in Configuration mode and the UPS output power is off, a Self-Test cannot be initiated. |
| Sensitivity Setting | • High  
                   • Medium  
                   • Low             | Select the Sensitivity range depending on the desired quality of input AC power:  
• If High is selected, the unit will go on battery power more often to provide the cleanest power supply to the connected equipment.  
• If Medium is selected, the UPS is under normal operating conditions.  
• If Low is selected, the UPS will tolerate more fluctuations in power and will go on battery power less often.  
If unsure of the local power quality, select Low. |
| Output Voltage Setting | • 220 Vac  
                   • 230 Vac  
                   • 240 Vac         | Select the appropriate voltage of outlets when the UPS is in Standby mode. |
| LCD Display Dimmer | • Load Bar Icon shows 100% = Always On.  
                   • Load Bar Icon shows 0% = Auto Dim. | When the LCD Display Dimmer is configured to Auto Dim the LCD will illuminate if a button is pressed or an event occurs, then will automatically dim after 60 seconds of no activity. |
| Green Mode Enable | • 0: Disable  
                   • 1: Enable                     | When Green Mode is enabled the UPS is operating at the most efficient level by bypassing unused AVR components while acceptable AC voltage is present. The UPS will enter and exit Green mode automatically while Enabled. |
| Clear Event Counter | • NA                             | Pressing the MUTE button will clear the event counter. |
# Troubleshooting

<tr>
<td>The battery has a weak charge.</td>
<td>Allow the battery to recharge for at least four hours. Then, perform a Self-Test. If the problem persists after recharging, replace the battery.</td>
</tr>
<tr>
<td>The replacement battery is not properly connected.</td>
<td>Be sure the battery connector is securely connected.</td>
</tr>
<tr>
<td><strong>Site Wiring Fault LED is flashing</strong></td>
<td></td>
</tr>
<tr>
<td>Wiring faults detected include missing ground, hot-neutral, polarity reversal, and overloaded neutral circuit.</td>
<td>If the UPS indicates a site wiring fault, have a qualified electrician inspect the building wiring. Applicable for 120 Vac units only.</td>
</tr>
</tbody>
</table>
Battery Replacement

⚠️ CAUTION
RISK OF HYDROGEN SULPHIDE GAS AND EXCESSIVE SMOKE

- Replace the battery at least every 5 years.
- Replace the battery immediately when the UPS indicates battery replacement is necessary.
- Replace battery at the end of its service life.
- Replace batteries with the same number and type of batteries as originally installed in the equipment.
- Replace the battery immediately when the UPS indicates a battery over-temperature condition, or UPS internal over-temperature, or when there is evidence of electrolyte leakage. Power off the UPS, unplug it from the AC input, and disconnect the batteries. Do not operate the UPS until the batteries have been replaced.
- *Replace all battery modules (including the modules in External Battery Packs) which are older than one year, when installing additional battery packs or replacing the battery module(s).

Failure to follow these instructions can result in minor or moderate injury and equipment damage.

* Contact Schneider Electric Worldwide Customer Support to determine the age of the installed battery modules.

Always recycle used batteries.
For information on recycling a used battery, refer to the Battery Disposal Information sheet included with the replacement battery.

Battery life is highly dependent on temperature and use. To identify when to replace batteries, Smart-UPS have a predictive battery replacement date indicator in the “About” menu and automatic (and configurable) self-tests.

Proactively replace batteries to maintain the highest availability. To ensure protection and high performance, use only genuine APC replacement battery cartridges (RBC™). The APC RBC contains instructions for battery replacement and disposal. To order a replacement battery go to the APC by Schneider Electric Web site, www.apc.com.

Transport

1. Shut down and disconnect all connected equipment.
2. Disconnect the unit from utility power.
3. Disconnect all internal and external batteries (if applicable).
4. Follow the shipping instructions outlined in the Service section of this manual.

Service

If the unit requires service, do not return it to the dealer. Follow these steps:

1. Review the Troubleshooting section of the manual to eliminate common problems.
   a. Note the model number and serial number and the date of purchase. The model and serial numbers are located on the rear panel of the unit and are available through the LCD display on select models.
   b. Call APC Customer Support and a technician will attempt to solve the problem over the phone. If this is not possible, the technician will issue a Returned Material Authorization Number (RMA#).
   c. If the unit is under warranty, the repairs are free.
   d. Service procedures and returns may vary internationally. Refer to the APC web site for country specific instructions.
3. Pack the unit properly to avoid damage in transit. Never use foam beads for packaging. Damage sustained in transit is not covered under warranty.
   a. Note: When shipping within the United States, or to the United States always DISCONNECT ONE UPS BATTERY before shipping in compliance with U.S. Department of Transportation (DOT) and IATA regulations. The internal batteries may remain in the UPS.
   b. Batteries may remain connected in the XBP during shipment. Not all units utilize XLBPs.
4. Write the RMA# provided by Customer Support on the outside of the package.
5. Return the unit by insured, prepaid carrier to the address provided by Customer Support.
Two Year Limited Factory Warranty

Schneider Electric IT Corporation (SEIT), warrants its products to be free from defects in materials and workmanship for a period of two (2) years from the date of purchase. The SEIT obligation under this warranty is limited to repairing or replacing, at its own sole option, any such defective products. Repair or replacement of a defective product or parts thereof does not extend the original warranty period.

This warranty applies only to the original purchaser who must have properly registered the product within 10 days of purchase. Products may be registered online at warranty.apc.com.

SEIT shall not be liable under the warranty if its testing and examination disclose that the alleged defect in the product does not exist or was caused by end user or any third person’s misuse, negligence, improper installation, testing, operation or use of the product contrary to SEIT recommendations or specifications. Further, SEIT shall not be liable for defects resulting from: 1) unauthorized attempts to repair or modify the product, 2) incorrect or inadequate electrical voltage or connection, 3) inappropriate on site operation conditions, 4) Acts of God, 5) exposure to the elements, or 6) theft. In no event shall SEIT have any liability under this warranty for any product where the serial number has been altered, defaced, or removed.

EXCEPT AS SET FORTH ABOVE, THERE ARE NO WARRANTIES, EXPRESS OR IMPLIED, BY OPERATION OF LAW OR OTHERWISE, APPLICABLE TO PRODUCTS SOLD, SERVICED OR FURNISHED UNDER THIS AGREEMENT OR IN CONNECTION HEREWITH. SEIT DISCLAIMS ALL IMPLIED WARRANTIES OF MERCHANTABILITY, SATISFACTION AND FITNESS FOR A PARTICULAR PURPOSE.

SEIT EXPRESS WARRANTIES WILL NOT BE ENLARGED, DIMINISHED, OR AFFECTED BY AND NO OBLIGATION OR LIABILITY WILL ARISE OUT OF, SEIT RENDERING OF TECHNICAL OR OTHER ADVICE OR SERVICE IN CONNECTION WITH THE PRODUCTS.

THE FOREGOING WARRANTIES AND REMEDIES ARE EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES AND REMEDIES. THE WARRANTIES SET FORTH ABOVE CONSTITUTE SEIT’S SOLE LIABILITY AND PURCHASER EXCLUSIVE REMEDY FOR ANY BREACH OF SUCH WARRANTIES. SEIT WARRANTIES EXTEND ONLY TO ORIGINAL PURCHASER AND ARE NOT EXTENDED TO ANY THIRD PARTIES.

IN NO EVENT SHALL SEIT, ITS OFFICERS, DIRECTORS, AFFILIATES OR EMPLOYEES BE LIABLE FOR ANY FORM OF INDIRECT, SPECIAL, CONSEQUENTIAL OR PUNITIVE DAMAGES, ARISING OUT OF THE USE, SERVICE OR INSTALLATION OF THE PRODUCTS, WHETHER SUCH DAMAGES ARISE IN CONTRACT OR TORT, IRRESPECTIVE OF FAULT, NEGLIGENCE OR STRICT LIABILITY OR WHETHER SEIT HAS BEEN ADVISED IN ADVANCE OF THE POSSIBILITY OF SUCH DAMAGES. SPECIFICALLY, SEIT IS NOT LIABLE FOR ANY COSTS, SUCH AS LOST PROFITS OR REVENUE, WHETHER DIRECT OR INDIRECT, LOSS OF EQUIPMENT, LOSS OF USE OF EQUIPMENT, LOSS OF SOFTWARE, LOSS OF DATA, COSTS OF SUBSTITUANTS, CLAIMS BY THIRD PARTIES, OR OTHERWISE.

NOTHING IN THIS LIMITED WARRANTY SHALL SEEK TO EXCLUDE OR LIMIT SEIT’S LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM ITS NEGLIGENCE OR ITS FRAUDULENT MISREPRESENTATION OF TO THE EXTENT THAT IT CANNOT BE EXCLUDED OR LIMITED BY APPLICABLE LAW.

To obtain service under warranty you must obtain a Returned Material Authorization (RMA) number from customer support. Customers with warranty claims issues may access the SEIT worldwide customer support network through the SEIT web site: www.apc.com. Select your country from the country selection drop down menu. Open the Support tab at the top of the web page to obtain information for customer support in your region. Products must be returned with transportation charges prepaid and must be accompanied by a brief description of the problem encountered and proof of date and place of purchase.
