

Addendum — Installation of AP9319X446

Inventory

HDCE/EMU interface cable

Installation

1. Install the AP9319X446 Environmental Monitoring Unit (EMU) into an open U-space of the High Density Cooling Enclosure (HDCE). Installing the EMU in the lowest U-space of the HDCE maximizes rack space.

See also

See the *Environmental Monitoring Unit Installation and Quick Start* manual to mount the AP9319X446 in the enclosure.

2. Insert the 8-position terminal plug of the HDCE/EMU interface cable into the 8-position header labeled “User Contact Inputs” at the rear of the AP9319X446 EMU.
3. Insert the 12-position plug of the HDCE/EMU interface cable into the 12-position receptacle below the air intake grill at the rear of the HDCE.
