For your safety

**DANGER**

HAZARD OF ELECTRIC SHOCK

- This product must be installed and serviced by appropriately qualified and/or licenced electrical personnel.
- Isolate the electrical supply before doing any work on this product.
- Ensure that the product has been correctly installed and tested for safe operation before reconnecting the electrical supply.
- To comply with all safety standards, the product must be used only for the purpose described in this instruction and must be installed in accordance with the wiring rules and regulation in the location where it is installed.

Failure to follow these instructions will result in death or serious injury.

**CAUTION**

RISK OF BURN INJURIES

During and after use, the product may be hot. Do not touch the product before it has completely cooled down.

Failure to follow these instructions can result in minor injuries, or equipment damage.

### Installation requirements

- The product is class 2.
- Check whether the product has been damaged during transport. Do not operate/install any product which appears damaged in any way. Return the complete downlight to place of purchase for inspection, repair or replacement.
- Take care not to pull any electrical wires during unpacking as this may damage the connection.
- Isolate the electrical supply before commencing any installation.
- There are no user serviceable parts inside.

### Dimming

This downlight has been designed to achieve deep dimming performance which allows very low levels of light output to provide the perfect atmosphere for all occasions. This downlight is designed to work with Clipsal LED dimming technology. Please refer to Clipsal.com/load for the latest dimming compatibility information.

**Note:** In some regions of the country a slight flicker may be experienced when the luminaire is dimmed. This is due to power line signals sent by the electricity supply authorities to assist with switching utilities, for example hot water services or changing tariff rates. This effect is not a malfunction of the luminaire or dimmer but a result of local installation conditions changing during the day. If this occurs, adjusting the dimmer back to maximum brightness will help minimize flickering.

### C-Bus® Compatibility

This downlight has not been designed to work with the following C-Bus® dimmer models or ranges.

- C-Bus Din Rail Dimmer Models
  - L5504D2A, L5504D2AP
  - L5504D2U, L5504D2UP
  - L5508D1A, L5508D1AP
- C-Bus Wall Mount Dimmer Models
  - 5104D750, 5104D400
All Professional Range leading edge Dimmers.

### Pre-Installation

**Colour Temperature Selector**

This downlight has a Tri-Temp colour selector switch allowing the options of 3 different light temperature outputs. Select the desired position prior to installation.

</tr>
</tbody>
</table>

**Clip on Trims**

1. Remove brushed chrome or black trim from packaging.
2. Press trim over the top of existing white trim prior to installation.

### Clearances

This downlight has achieved an IC-4 classification and complies with AS/NZS 60598.2.2. It is classified as an IC-4 recessed luminaire that can be abutted against normally flammable materials, including building insulation, and can be covered in normal use.

This type of recessed luminaire is effectively a sealed unit that has restricted flow of air between the habitable room and the luminaire.

**Installation instructions**

**Note:** Make sure colour temperature is selected and trim is fitted as above prior to installation.

**Preparation and connection**

1. Isolate power.
2. Select suitable location for installation and cut out.
3. Connect mains supply to downlight.

**Mounting the downlight**

1. Fold back mounting springs.
2. Insert downlight into cut-out.
3. Ease upwards until sitting flush with ceiling.

**Installation requirements**

- The product is class 2.
- Check whether the product has been damaged during transport. Do not operate/install any product which appears damaged in any way. Return the complete downlight to place of purchase for inspection, repair or replacement.
- Take care not to pull any electrical wires during unpacking as this may damage the connection.
- Isolate the electrical supply before commencing any installation.
- There are no user serviceable parts inside.
Risk of Fire - Required clearance from structural members and building elements: SCB = 0 mm, HCB = 0 mm.

**SCB – Side Clearance to Building element**
Minimum distance between the side of the recessed luminaire and any building element.

**HCB – Height Clearance to Building element**
Minimum distance between the top of the recessed luminaire and any building element above it.
