One system to manage home energy

With long and proven expertise in energy management, Schneider Electric is a trusted partner to transform your home into a more **sustainable, efficient, and resilient place to live.**

Meet **Wiser**, our home energy management solution, designed to give you **complete control over your energy use without compromising your comfort.**

Wiser isn't just about basic home functions and device control. It's a complete ecosystem for **decoding your consumption patterns, eliminating energy waste, and taking advantage of the cheapest or the least carbon-intensive hours.** What's more, Wiser can help you **harness the full solar potential of your installation.**

I want to control my home energy consumption

I want to reduce my heating bill

I want to charge my electrical vehicle at the lowest cost

I want to maximize my solar self-consumption

I want to enhance my comfort while maximizing savings

I want to enhance home safety

I want a durable and reliable solution

Getting started with Wiser

I'm new to home energy management

I want to understand my home energy consumption

Wiser Hub + PowerTag

I know what consumes the most energy in my home and I want Wiser to help me optimize it

I want to reduce my energy use

I want to save on my heating bill

I want to charge my electrical vehicle at the lowest cost

Wiser Hub + Wiser heating controllers + Wiser Power Micromodule + Wiser connected sockets

Wiser Hub + Wiser heating controllers

Wiser Hub + EV charger

I'm a solar energy power producer and I'm looking for a solution to make my installation as profitable as possible

I want to maximize my self-consumption and reduce my home's carbon footprint

Wiser Hub + Schneider Inverter + Schneider Boost + PowerTag E

To receive tailored guidance for your project, feel free to [reach out to us](#).

Wiser products for your project

I want to control my home energy consumption

I want to enhance home safety

I want a durable and reliable solution

Make your home more energy efficient

With the all-in-one Wiser Home app, you gain visibility and in-depth understanding of your energy consumption, empowering you to efficiently manage your loads.

Energy monitoring

Track in real time your energy production and consumption and gain insights to steer you towards savings.

Smart EV charging

Schedule EV charging time to take advantage of cheaper electricity tariffs.

Advanced temperature control

Control the temperature room by room and use intelligent modes and insights to reduce your bill.

Solar consumption optimization

Maximize the consumption of the solar energy generated by your photovoltaic panels.

Advanced home automation

Automatically turn on your equipment during off-peak hours and automate your daily routines to eliminate energy waste.

I want to control my home energy consumption

I want to reduce my heating bill

I want to charge my electrical vehicle at the lowest cost

I want to maximize my solar self-consumption

I want to enhance home safety

I want a durable and reliable solution

Make your home more sustainable

Reduce your home's carbon footprint by maximizing self-consumption and reducing energy use with reliable and future-proof solutions.

Lower energy consumption

Closely monitor and control your loads to significantly reduce your home energy use.

Renewable energy integration

Connect your solar installation, back up battery, EV charger, and your most consuming home loads with Wiser and manage them via one easy-to-use app.

Low carbon-intensive energy consumption

Schedule the use of your most-consuming loads for less carbon-intensive hours or when your photovoltaic panels produce energy.

Green Premium labeled products

All Wiser products are marked with the Green Premium ecolabel, indicating compliance with regulations and providing transparent information on environmental impact.

Long-standing commitment

For the past 12 years, Schneider Electric has been ranked one of the world's most sustainable companies. We are committed to supporting you on your sustainability journey.

I want to enhance home safety

I want a durable and reliable solution

Make your home more resilient

Wiser can help you anticipate power cuts, prevent domestic accidents, and increase your independence from the electricity grid for uninterrupted power.

Smart energy choices

Maximize self-consumption by dispatching the solar energy produced to heat water or charge your EV, to reduce the amount of energy drawn from the grid.

Independence from price volatility

Use stored energy from solar generation or the grid to power your home when electricity rates are high. Set up Wiser to automatically cut off your heavy loads when approaching the power limit to control your electricity costs.

Protection against domestic hazards

Get alerted on abnormal situations: energy interruptions, load overconsumption, humidity, smoke, water leakage, unexpected presence..

I want to control my home energy consumption

Make your home more comfortable and convenient

Save energy while maintaining the same level of comfort. With infinite possibilities for personalization, design your Wiser home the way you want it to be.

Multiple ways of control

With Wiser, you have various options to manage your home energy system:

- Wiser Home app,
- Voice assistants,
- Wireless Free Located Switch,
- Automations,
- Manual control.

Room-by-room temperature control

In a few clicks, create a schedule to set room-by-room temperature setpoints and enjoy enhanced comfort while saving money.

Advanced home automation

Automate home routines (shutters, lighting, or heating settings) to save energy without thinking about it.

Personalization with Moments

Create the perfect atmosphere in your home thanks to endless possibilities of personalization with Moments.

Know how you use energy at home

To start saving energy, you need to identify the potential areas for savings.

The first thing to do is to find out what consumes the most in your home, and therefore what weighs most heavily on your bill.

By adding **PowerTag energy sensors** in your electrical panel, you can easily spot the most energy-consuming loads as the sensors measure the energy consumption of each load. Some Wiser devices (connected sockets, Power Micromodule and EV chargers) have built-in consumption monitoring, eliminating the need for adding a PowerTag on these specific loads.

PowerTag

To find out more about energy monitoring, visit: se.com/wiser

Did you know...

You can achieve 7% energy savings thanks to insights and energy consumption awareness available in the app¹.

¹Innlandskraft / ELIQ case study.

Monitor and control your energy use

Once the most power-hungry loads are identified, it's time to focus on optimizing them. Wiser provides solutions that can help tackle inefficiencies of diverse loads.

Socket
Control your home appliances remotely.

Power Micro Module
Keep an eye on heavy loads such as boilers or swimming pool pumps.

Smart Plug
Make your current sockets smart and avoid high renovation costs.

Heating controller
(Consult our dedicated section: 'I want to reduce my heating bill')

EV charger
(Consult our dedicated section: 'I want to charge my electrical vehicle at the lowest cost')

Did you know...

Domestic hot water accounts for up to 20% of consumption. Every year, almost a third of the heat produced by water heaters is lost¹.

Manage your energy in the Wiser Home app

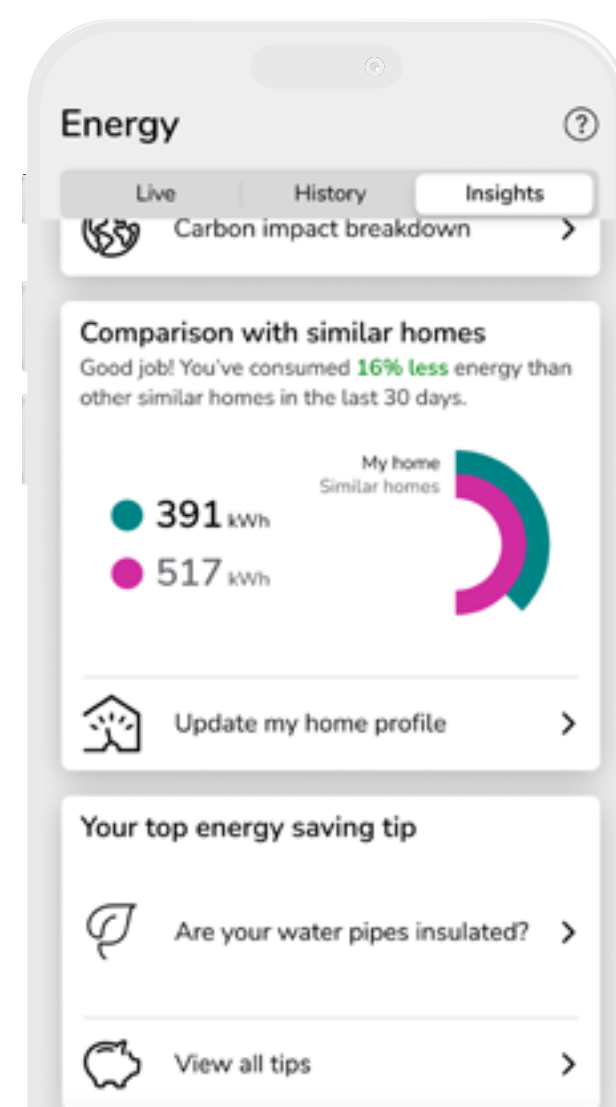

With Wiser, easily monitor and control your energy consumption, all through the convenience of your smartphone.

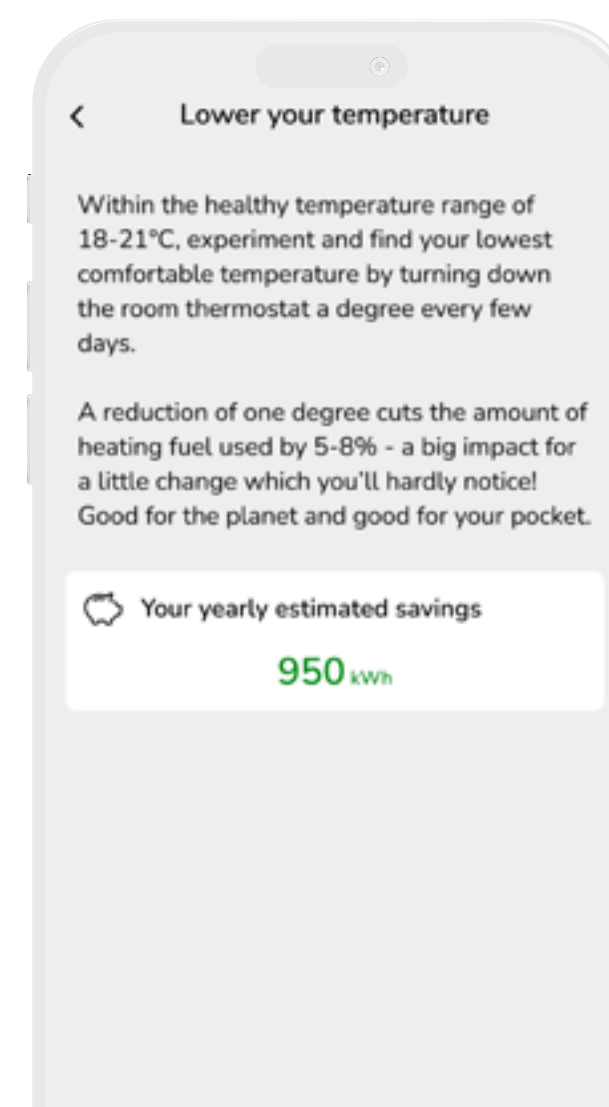

Track your **energy use in real time** (in kWh and €) and access your **consumption history** (per day/month/year).

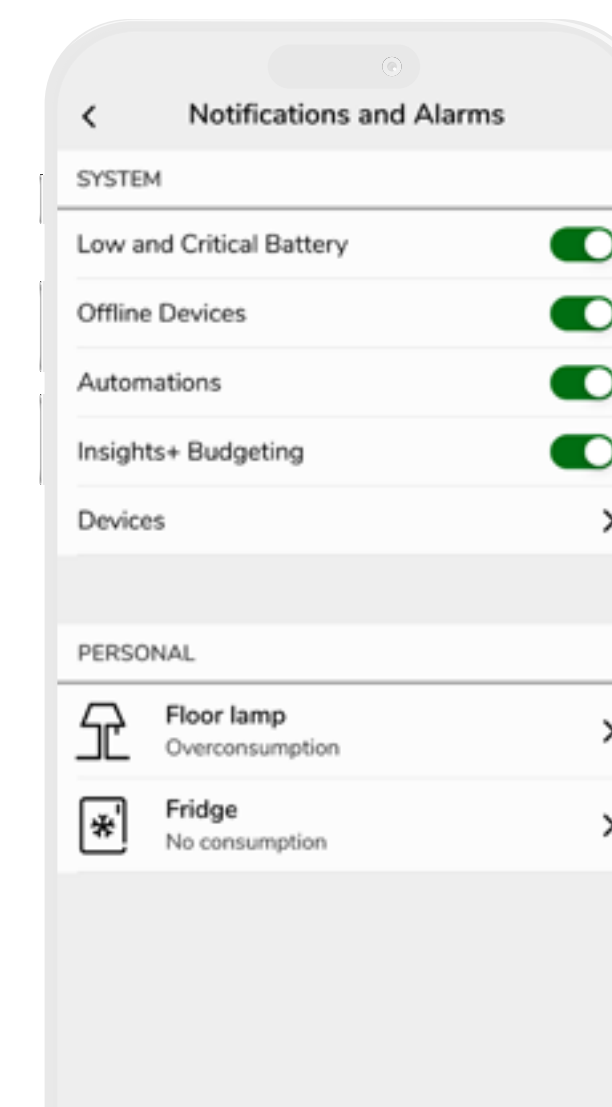

Get the **breakdown of your consumption by load** and see historic views (per day/month/year).*

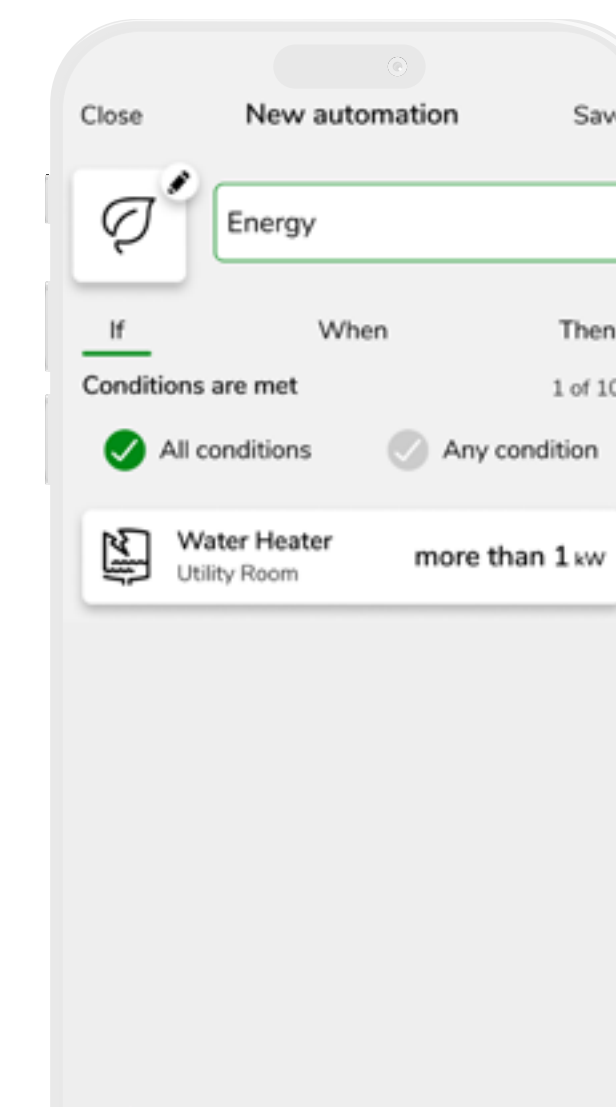

Evaluate the energy efficiency of your home by **comparing with the other homes** in the same area.*

Receive **personalized energy tips** from the app.*

Receive **notifications if your energy usage goes significantly high** to avoid a ticket for exceeding power limits or when the cost of household electricity surpasses a predefined threshold.

If either the consumption or the electricity price reaches a certain high level, **Wiser can automatically halt the operation** of the most power-consuming equipment.

*Data available one month after the installation of a PowerTag.

Control your temperature room by room according to your routine

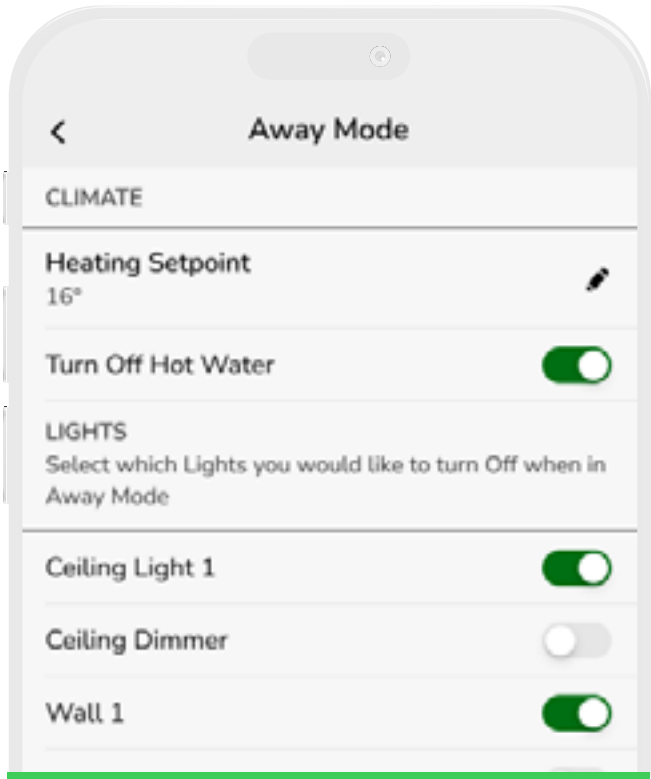

Maximize energy savings and comfort at home with precise heating control.

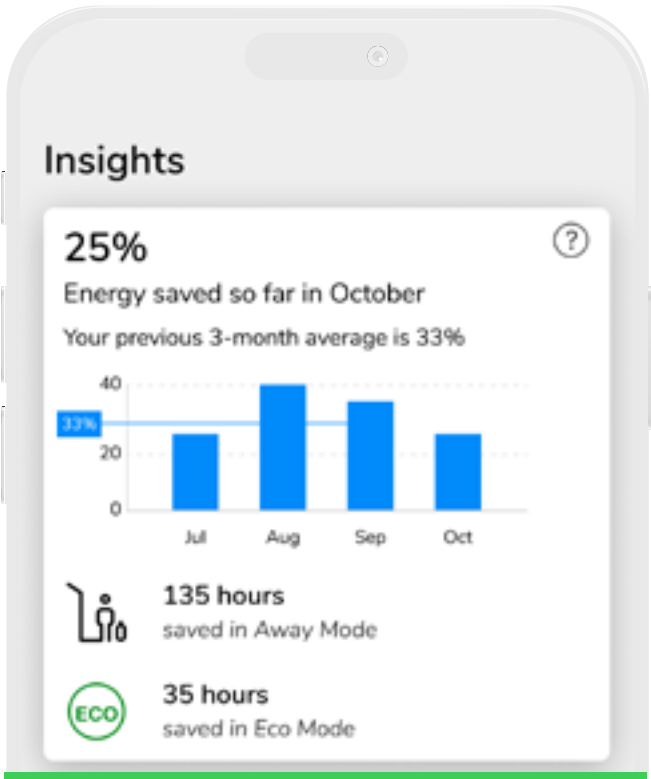

Set up **temperature room by room** according to your routine to avoid energy waste.

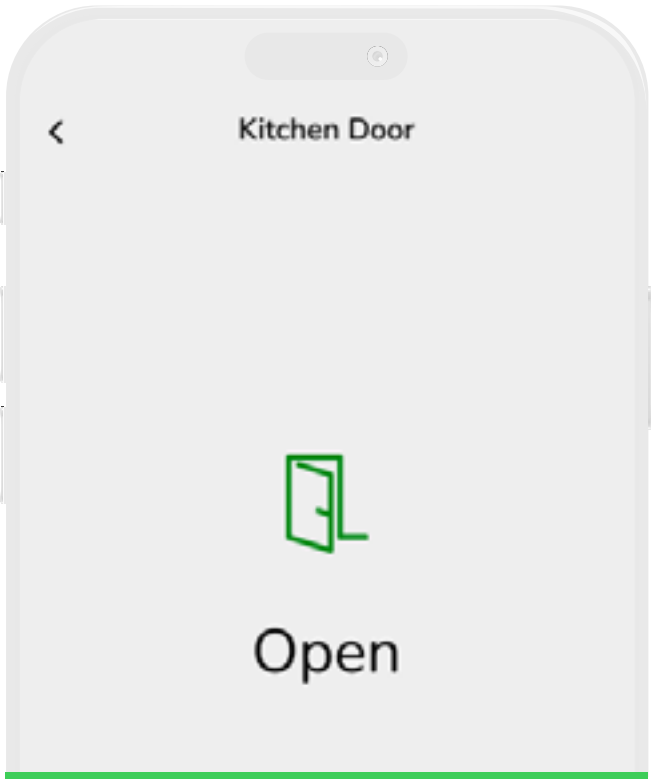

With **Eco Mode** on, your home automatically determines when to start/stop heating to keep your home at the perfect temperature, at the lowest cost.

In **Away Mode**, the heating system is turned off so no energy is wasted when you are away.

With **Insights** and **Heat Report**, you can develop greater understanding about your heating system to make better informed decisions.

Wiser can **automatically switch off the heating** if a door or window is left open, to avoid wasting energy.

Products for EV charging

With the Wiser-compatible EV chargers, you can charge your electric vehicle conveniently at maximized safety while reducing costs and CO₂ emissions. For cost-effective charging at home, we offer two solutions: **Mureva EVLink** charging socket and **EVLink Home Smart** charging station.

Mureva EV Link Socket

EVlink Home Smart

Did you know...
EV charging at home increases home energy consumption by around 40%. To keep electricity bills as low as possible, it is therefore essential to optimize the charging process. Wiser lets you integrate a solar energy production solution and use it to power car with your solar energy.

Charge your EV with sustainable and low-cost energy

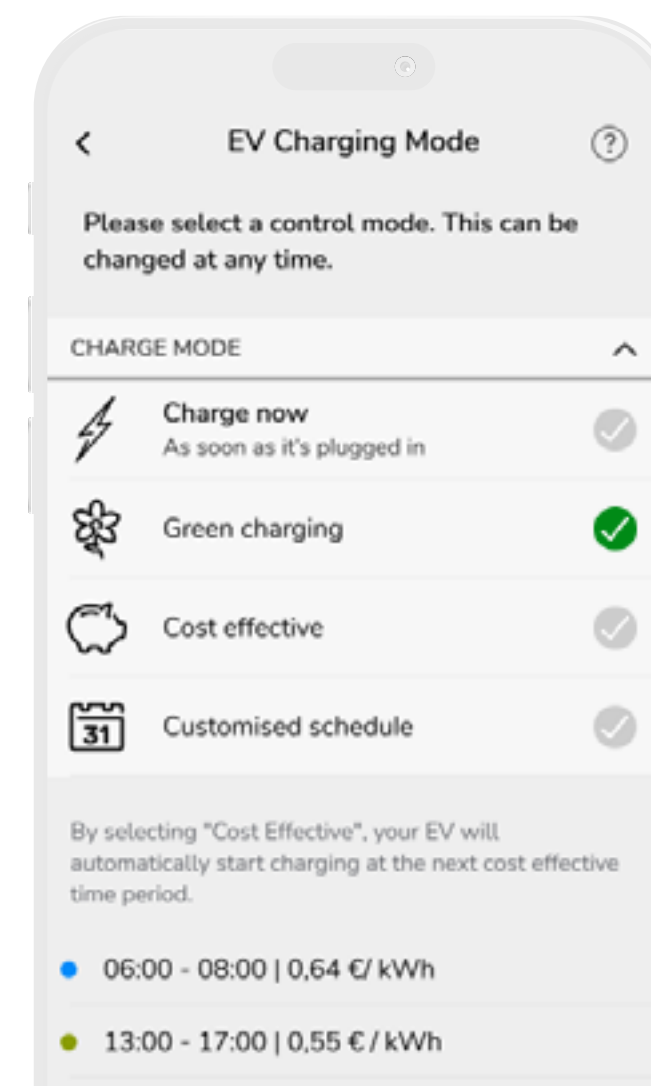

Tailor your EV charging to your routine. Take advantage of the cheapest hours, opt for the least carbon-intensive periods, or even sync charging with your solar panels' energy production. The choice is entirely yours.

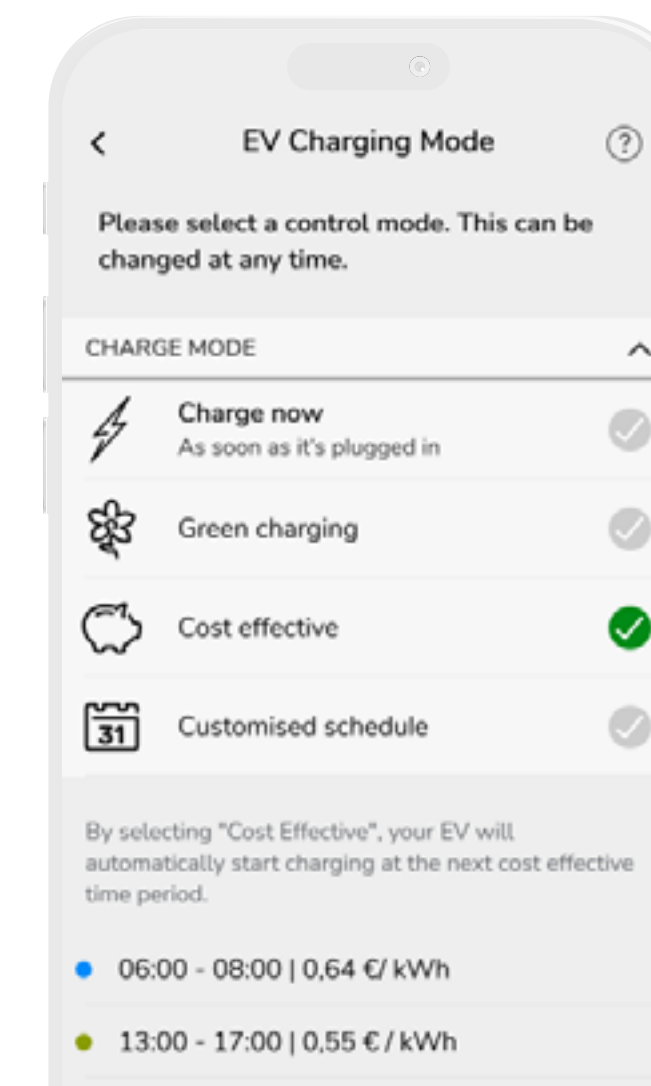

Manage the charging time and your EV range and obtain a history (in kWh and euros) of your charging sessions.

Charge your EV at the most convenient time, based on your schedule.

Choose the sustainable charging mode to charge your EV during the least carbon-intensive hours.

Use the **cost-effective mode**, to charge your EV during the least expensive hours.

Products for solar energy production

Maximize your solar self-consumption and thus the profitability of your renewable energy installation with to one integrated and scalable system. It empowers you to reduce your bills, carbon footprint, and dependence to the grid.

Schneider Boost
Store solar energy during the day so it can be used during peak-rate hours to save on utility bills and ensure power continuity in case of an outage.

Schneider Inverter
Choose a high-power hybrid inverter for converting solar energy output into usable AC electricity.

Did you know...

The cost of equipment for individual solar self-consumption has fallen by around 80% over the last decade¹. By investing in a self-consumption installation, you are no longer affected by price hikes in the electricity supplier's tariff.

Enhanced comfort and energy savings with shutter and lighting control

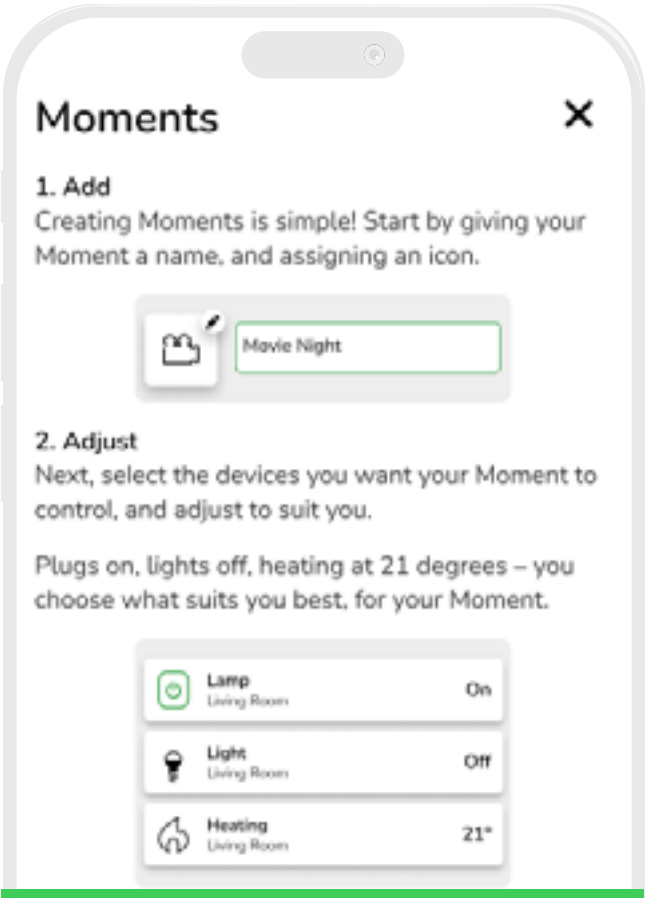

With convenient control of lighting and roller shutters, Wisier helps you save money and increase comfort at home. Create automation scenarios to let the system take care of your usage or control your system via the Wisier app or your voice control device, or manually.

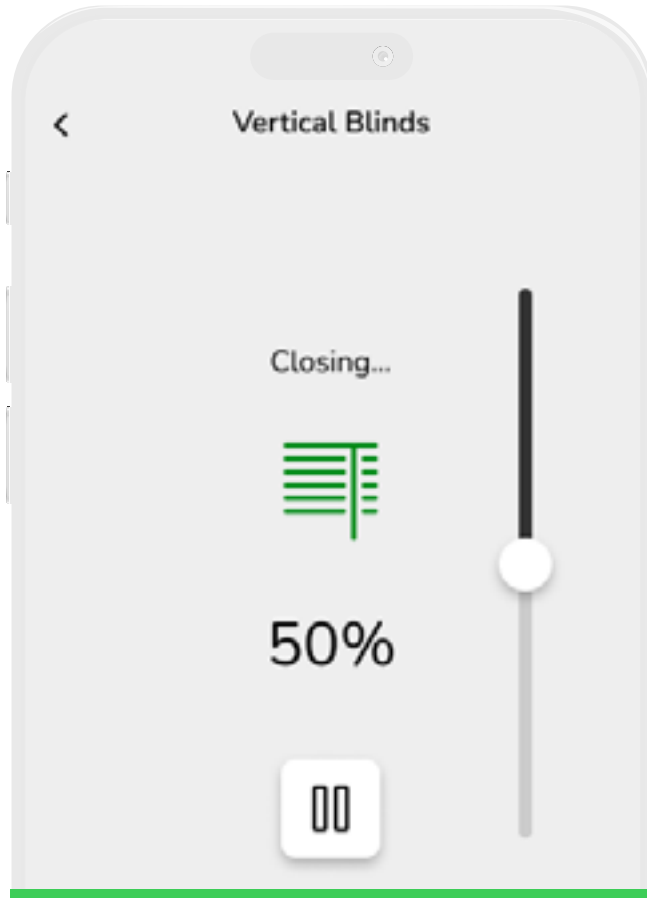

With Wisier app, you can control heating, lighting, and roller shutters remotely to avoid energy waste.

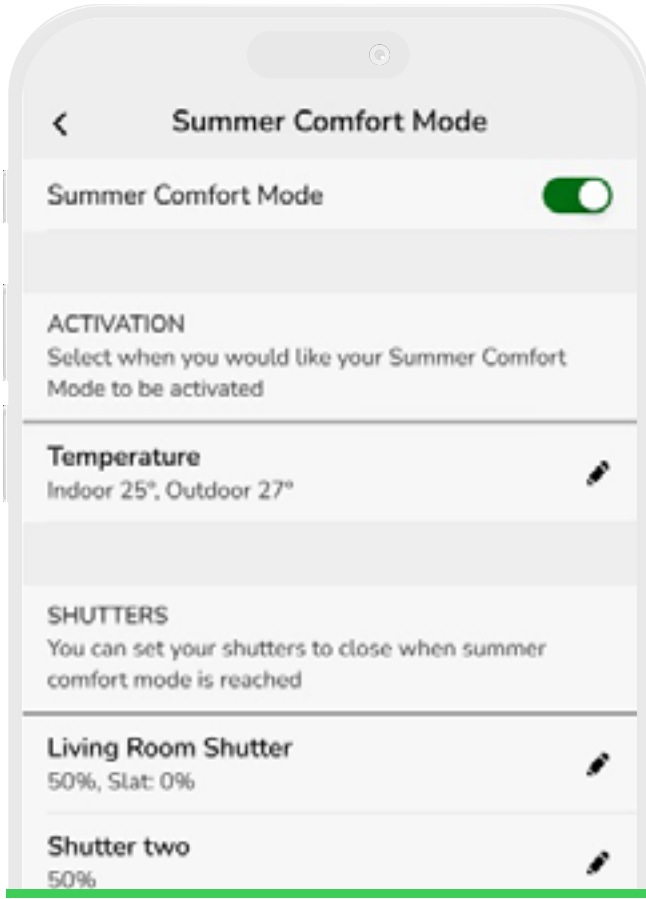

Automate your daily heating, lighting, and roller shutter (opening/closing) tasks.

With a pre-set 'Moment' Wisier adjusts lighting, shutters, and temperature automatically to set the mood, whether it's party time, dinner time, or just ice-cream-and-chill time.

Close your shutters remotely if weather conditions change, for security purposes, or to maintain the temperature inside and save energy on cooling/heating.

Wisier automatically closes your shutters to 50% when the outside temperature reaches a certain level to avoid the need for air conditioning and keep your home cool while using minimum energy.

Enhanced safety and security

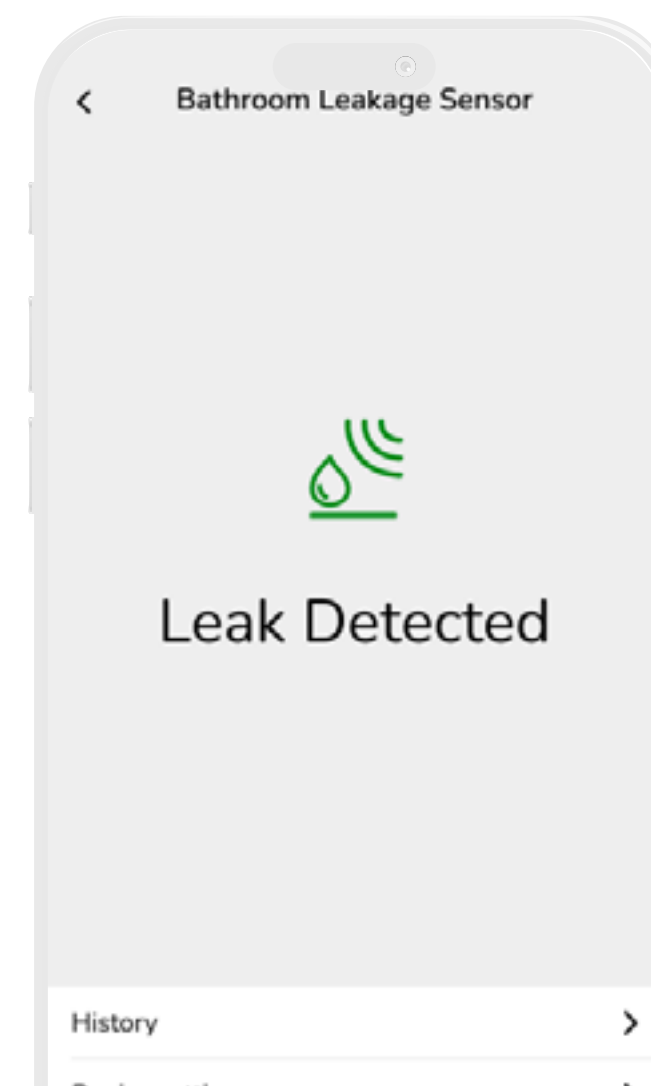

With Wiser, you get greater peace of mind with improved home safety, thanks to smart sensors that detect unusual movement and situations, and alert the system to notify you.

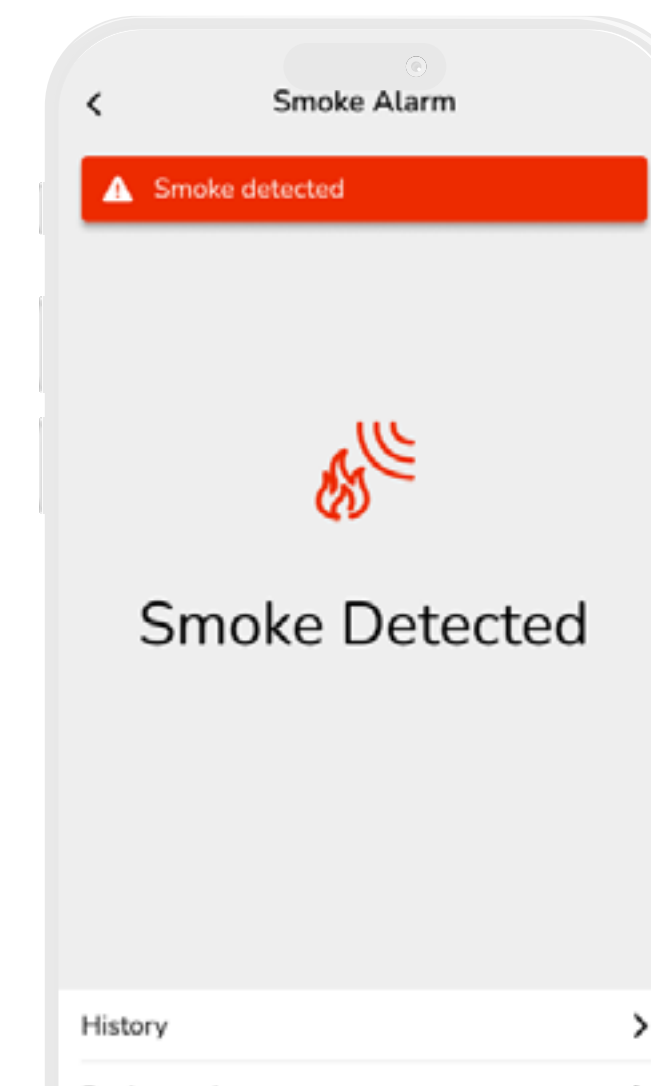

With a simple tap on the Free Located switch, you can activate an Away Moment when leaving home and **get notified if windows and doors have been left open by mistake.**

Wiser **notifies you if it detects unexpected presence at home.** The system can also **simulate your presence** by activating roller shutters or lights during your absence.

The water leakage sensors send a **notification through the Wisier Home app if leakage is detected**, so you can address the issue quickly to avoid damage.

The smoke alarm **alerts the occupants about fire incidents.** Additionally, an automation scenario can be configured to turn on the lights upon smoke detection, making it easier for occupants to exit.

Choose a durable solution that evolves with your needs

Wiser is a modular, flexible system that lets you start small and expand later as you wish. For example, you may begin with lighting control, then add more Wiser functions. Robust and made with high-quality components, Wiser will serve you for years to come.

Robust connectivity

Wiser is based on a mesh network protocol that helps ensure uninterrupted system service. If one device disconnects, other devices can still communicate with each other.

Regular updates

Frequent software updates keep Wiser in line with top-class security standards, and help provide advanced functionality and compatibility with third party devices.

A partnership ecosystem

The Connectivity Ecosystem Partnership of Schneider Electric and third-party companies helps ensure seamless interoperability between Wiser and other smart devices.

Quality

Wiser's quality stems from Schneider Electric's long experience in the residential market. Wiser devices come with transparent product information guaranteed by the Green Premium™ ecolabel.
