

Important Security Notification

Invensys Positioner DTM Security Vulnerability

19-Feb-2015

Overview

Schneider Electric has become aware of a vulnerability in the DTM software for the SRD Control Valve Positioner valve product line.

Vulnerability Overview

The vulnerability identified includes a stack buffer overflow condition in a DLL file that could possibly result in remote code execution.

Product(s) Affected

The product(s) or product lines affected include:

- DTM version 3.1.6 and all previous versions used with SRD 960 and SRD 991 Control Valve Positioners

Vulnerability Details

- One of the DLLs in the software package is prone to buffer overflow condition which could result in remote code execution
 - CVSS 5.2 (AV:L/AC:H/Au:N/C:P/I:P/A:C)

For customers using these products, they are encouraged to download the latest version, V3.6.3, which remediates the issue. Copy/paste the following URL:

<http://www.foxboro-eckardt.eu/download/FDT-DTMselector.html>

Scroll down to the Positioner-DTM section.

Important Security Notification

Schneider Electric would like to express its gratitude to Ivan Sanchez and Nullcode Team for bringing this to our attention and working collaboratively to bring this to resolution.

For More Information

This document is intended to help provide an overview of the identified vulnerability and actions required to mitigate it. To obtain full details on the issues and assistance on how to protect your installation, please contact your local Schneider Electric representative. These organizations will be fully aware of the situation and can support you through the process.
