TeSys[®] U Motor Control and Protection

Lift your productivity to the next level

schneider-electric.us/tesysu

+

==

+

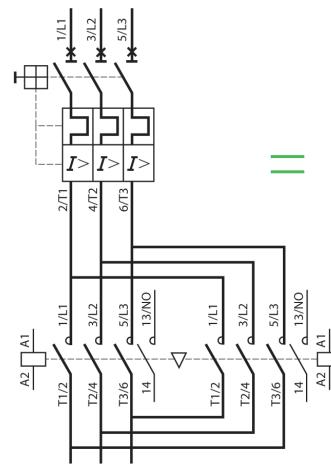

Let the TeSys U simplify your solution

The TeSys U is an innovative “self-protected combination starter” providing motor disconnect, motor branch circuit protection, motor controller and motor overload protection in a **single product**. This unique design conforms to UL 508 standard and available in both **IEC** and **NEMA** versions.

The TeSys U covers motor applications up to 20 hp at 480V (32A) with a standard short circuit current rating of 65kA in wye configuration. The optional current limiter increases this rating to 130kA delta.

Unique prewired reversing block in 45mm width reduces the size of the panel with large savings in number of wires and installation time.

Benefit from unique values of the TeSys U

Maximum flexibility

TeSys U features a unique concept in flexibility.

- A single control unit provides:
 - wide range of current settings
 - wide range of control voltages
- 6 references cover 0.15 to 32 A
- Starter can be wired completely in the workshop & plug in of the control unit at customer site
- Fast modifications without any tools

High performance features with advanced functionality

The TeSys U offers a complete, high-performance range of remote monitoring, control solutions to provide you with the information you need.

- Can integrate numerous existing communication systems
- Display the actual motor values and parameters
- Alarms before tripping to reduce the down time of the machine/process
- Fault log with the last 5 trips
- Statistics:
 - # of starts
 - # of trips
 - Operating hours

Unique efficiency

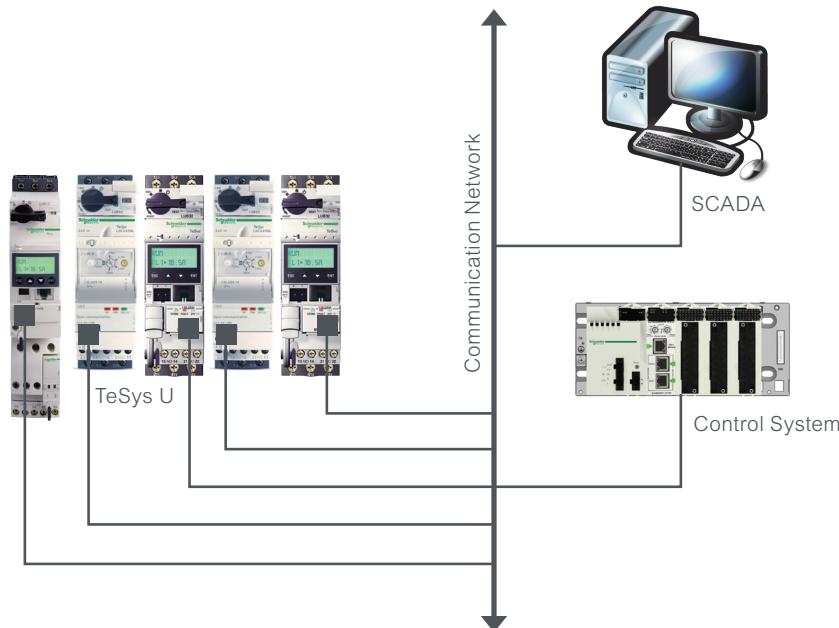

TeSys U is the world's smallest motor starter up to 20 hp at 480V.

- Space savings in the panel
- Assembly and wiring times reduced
- Less cabling = Less risk of errors

Safety & reliability

Leverage TeSys U for your safety and reliable applications.

- Integrated mirror contact
- Lockable in OFF position during maintenance
- Sealable control unit
- 15 million operations mechanical life
- Up to 3600 cycles/hour
- Low consumption coil saves energy and eliminates the need for interposing relay in control systems

Advantech STB

SoLink

If your application requires only basic functions . . .

Let the TeSys U meet your needs

Power base

For assembling components, ON/OFF operation and resetting

- 2 power bases: up to 12 A and up to 32 A
- Direct starter and reversing starter models

Control unit

Performs all the electrical protection functions

- Overload, over current, & short circuit protection
- Ground fault protection
- Phase loss & phase unbalance protection

Control auxiliary contacts

- For additional remote indication contacts

Power auxiliary contacts (trip status)

- To supervise motor starter status
