Safety

HAZARD OF ELECTRIC SHOCK, EXPLOSION, OR ARC FLASH
• Do not install this PDU where excessive moisture or heat is present.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Plug this PDU into a three-wire, grounded power outlet only. The power outlet must be connected to appropriate branch circuit/mains protection (fuse or circuit breaker). Connection to any other type of power outlet may carry the leakage current from the load devices (computer equipment).
• Do not install any wiring, equipment, or PDUs during a lightning storm.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Use one hand, whenever possible, to connect or disconnect signal cables.
• Do not install this PDU where excessive moisture or heat is present.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Plug this PDU into a three-wire, grounded power outlet only. The power outlet must be connected to appropriate branch circuit/mains protection (fuse or circuit breaker). Connection to any other type of power outlet may carry the leakage current from the load devices (computer equipment).
• Do not install any wiring, equipment, or PDUs during a lightning storm.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Use one hand, whenever possible, to connect or disconnect signal cables.
• Do not install this PDU where excessive moisture or heat is present.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Plug this PDU into a three-wire, grounded power outlet only. The power outlet must be connected to appropriate branch circuit/mains protection (fuse or circuit breaker). Connection to any other type of power outlet may carry the leakage current from the load devices (computer equipment).
• Do not install any wiring, equipment, or PDUs during a lightning storm.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Use one hand, whenever possible, to connect or disconnect signal cables.
• Do not install this PDU where excessive moisture or heat is present.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Plug this PDU into a three-wire, grounded power outlet only. The power outlet must be connected to appropriate branch circuit/mains protection (fuse or circuit breaker). Connection to any other type of power outlet may carry the leakage current from the load devices (computer equipment).
• Do not install any wiring, equipment, or PDUs during a lightning storm.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Use one hand, whenever possible, to connect or disconnect signal cables.
• Do not install this PDU where excessive moisture or heat is present.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Plug this PDU into a three-wire, grounded power outlet only. The power outlet must be connected to appropriate branch circuit/mains protection (fuse or circuit breaker). Connection to any other type of power outlet may carry the leakage current from the load devices (computer equipment).
• Do not install any wiring, equipment, or PDUs during a lightning storm.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Use one hand, whenever possible, to connect or disconnect signal cables.
• Do not install this PDU where excessive moisture or heat is present.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Plug this PDU into a three-wire, grounded power outlet only. The power outlet must be connected to appropriate branch circuit/mains protection (fuse or circuit breaker). Connection to any other type of power outlet may carry the leakage current from the load devices (computer equipment).
• Do not install any wiring, equipment, or PDUs during a lightning storm.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Use one hand, whenever possible, to connect or disconnect signal cables.
• Do not install this PDU where excessive moisture or heat is present.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Plug this PDU into a three-wire, grounded power outlet only. The power outlet must be connected to appropriate branch circuit/mains protection (fuse or circuit breaker). Connection to any other type of power outlet may carry the leakage current from the load devices (computer equipment).
• Do not install any wiring, equipment, or PDUs during a lightning storm.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Use one hand, whenever possible, to connect or disconnect signal cables.
• Do not install this PDU where excessive moisture or heat is present.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Plug this PDU into a three-wire, grounded power outlet only. The power outlet must be connected to appropriate branch circuit/mains protection (fuse or circuit breaker). Connection to any other type of power outlet may carry the leakage current from the load devices (computer equipment).
• Do not install any wiring, equipment, or PDUs during a lightning storm.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Use one hand, whenever possible, to connect or disconnect signal cables.
• Do not install this PDU where excessive moisture or heat is present.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Plug this PDU into a three-wire, grounded power outlet only. The power outlet must be connected to appropriate branch circuit/mains protection (fuse or circuit breaker). Connection to any other type of power outlet may carry the leakage current from the load devices (computer equipment).
• Do not install any wiring, equipment, or PDUs during a lightning storm.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Use one hand, whenever possible, to connect or disconnect signal cables.
• Do not install this PDU where excessive moisture or heat is present.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Plug this PDU into a three-wire, grounded power outlet only. The power outlet must be connected to appropriate branch circuit/mains protection (fuse or circuit breaker). Connection to any other type of power outlet may carry the leakage current from the load devices (computer equipment).
• Do not install any wiring, equipment, or PDUs during a lightning storm.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Use one hand, whenever possible, to connect or disconnect signal cables.
• Do not install this PDU where excessive moisture or heat is present.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Plug this PDU into a three-wire, grounded power outlet only. The power outlet must be connected to appropriate branch circuit/mains protection (fuse or circuit breaker). Connection to any other type of power outlet may carry the leakage current from the load devices (computer equipment).
• Do not install any wiring, equipment, or PDUs during a lightning storm.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Use one hand, whenever possible, to connect or disconnect signal cables.
• Do not install this PDU where excessive moisture or heat is present.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Plug this PDU into a three-wire, grounded power outlet only. The power outlet must be connected to appropriate branch circuit/mains protection (fuse or circuit breaker). Connection to any other type of power outlet may carry the leakage current from the load devices (computer equipment).
• Do not install any wiring, equipment, or PDUs during a lightning storm.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Use one hand, whenever possible, to connect or disconnect signal cables.
• Do not install this PDU where excessive moisture or heat is present.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Plug this PDU into a three-wire, grounded power outlet only. The power outlet must be connected to appropriate branch circuit/mains protection (fuse or circuit breaker). Connection to any other type of power outlet may carry the leakage current from the load devices (computer equipment).
• Do not install any wiring, equipment, or PDUs during a lightning storm.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Use one hand, whenever possible, to connect or disconnect signal cables.
• Do not install this PDU where excessive moisture or heat is present.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Plug this PDU into a three-wire, grounded power outlet only. The power outlet must be connected to appropriate branch circuit/mains protection (fuse or circuit breaker). Connection to any other type of power outlet may carry the leakage current from the load devices (computer equipment).
• Do not install any wiring, equipment, or PDUs during a lightning storm.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Use one hand, whenever possible, to connect or disconnect signal cables.
• Do not install this PDU where excessive moisture or heat is present.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Plug this PDU into a three-wire, grounded power outlet only. The power outlet must be connected to appropriate branch circuit/mains protection (fuse or circuit breaker). Connection to any other type of power outlet may carry the leakage current from the load devices (computer equipment).
• Do not install any wiring, equipment, or PDUs during a lightning storm.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Use one hand, whenever possible, to connect or disconnect signal cables.
• Do not install this PDU where excessive moisture or heat is present.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Plug this PDU into a three-wire, grounded power outlet only. The power outlet must be connected to appropriate branch circuit/mains protection (fuse or circuit breaker). Connection to any other type of power outlet may carry the leakage current from the load devices (computer equipment).
• Do not install any wiring, equipment, or PDUs during a lightning storm.
• Never install any wiring, equipment, or PDUs during a lightning storm.
• Use one hand, whenever possible, to connect or disconnect signal cables.
