Simplify your smart home experience with Matter.
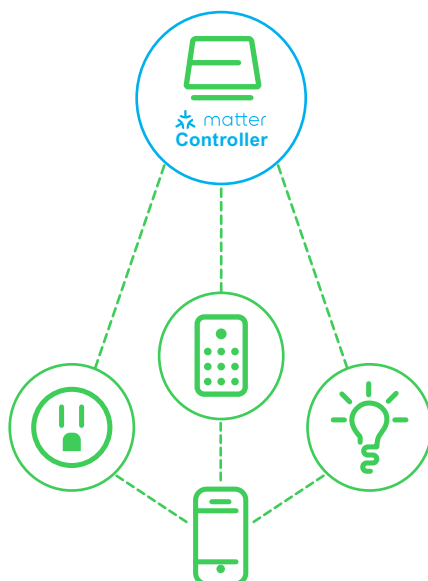

Schneider X Series

Easily connect the devices you love

Every day our homes are getting smarter with connected sensors, locks, thermostats, and light switches and outlets. But it's not easy connecting new smart devices that require multiple apps from different brands. **Now you can take the guesswork out of your purchasing process and use a single app with Matter.**

Matter allows your smart devices to communicate with each other. It's the Internet of Things (IoT) communication standard created by the [Connectivity Standards Alliance](#), whose members include Amazon, Apple, Google, and Schneider Electric. Now with Matter, certified devices from different brands can talk to each other and work together seamlessly across Matter-compliant platforms using just one app.

All you need to get started is a smart hub/controller, such as your smart TV or your Amazon Alexa or Google Home voice assistants.

- Lighting and electrical
- HVAC controls
- Security sensors
- Window coverings and shades
- Media devices
- Door locks
- And so many more!

Smarter benefits

- **Simple and convenient:** Easily add your smart devices in your existing ecosystem and control them through your preferred app.

- **Reliable:** Consistent and responsive local connectivity works even if your Internet connection is down.

- **Secure:** Rest assured your smart device data and user information is private and secure thanks to multiple layers of encryption.

- **Interoperable:** Devices and ecosystems with the Matter badge are compatible by design. Simply choose which devices and ecosystems to connect.

Life Is On | Schneider Electric

Designed for cross-platform ecosystems

Want to create a scenario where your smart thermostat adjusts based on data from your motion sensors or your smart lights turn on when your security system is triggered? Matter makes it possible.

## Matter-compatible devices work in your ecosystem to make your life easier

- Easily manage and automate your smart home by connecting your devices to your existing smart home hub from Apple, Amazon, or Google.
- Remotely operate your smart home, such as lighting controls with your preferred ecosystem app.
- Simply scan the QR code on your Matter-compliant device using your favorite Matter-compliant ecosystem app.

Schneider Electric switches, dimmers, and outlets are Matter compatible

With the Matter compatible Schneider X series of connected wiring devices, you can turn lights and appliances on or off remotely with the Schneider Home app or your preferred voice-activated assistants.

Richer features with smart, simple Matter connectivity

- **Remote control:** With wireless connectivity, easily monitor power usage and control devices when away from home or create custom lighting scenes.
- **Energy monitoring:** Download the Schneider Home app to get real-time data of how much energy is being used by each connected device, so you can optimize power usage to save costs while ensuring comfort.
- **Aesthetically designed:** Available in black, white, light almond, and gray, each Schneider X series wiring device is interchangeable with screwless, flush-facing covers that are adaptable to any interior home décor.
