Cooling MIB Overview

The information in this document is compatible with display firmware for the InRow® DX ACRD300 Series of cooling units

Self-Describing

The Cooling MIB is self-describing in that only the general format of the information is described by the MIB. The actual application data is described by the data in the OIDs themselves. The user must walk the MIB to get information about the data that is available.

General Organization

- OID Types
 - Analog: Data that has a continuous range of numeric values. Examples:
 - Temperature
 - Humidity
 - Cool setpoint
 - Discrete: Data that has discrete integer values that correspond to some functional meaning. Examples:
 - Configuration type
 - Airflow control
 - Air filter type
 - String: Data that consists of text. Examples:
 - Name
 - Location
- Sections
 - About
 - Table Index: The static reference identifier for each table entry.
 - Description: A text description of the information presented in coolingUnitAboutValue.
 - Value: The actual value of the current table entry.
 - Status
 - Analog
 - ◊ Table Index: The static reference identifier for each table entry.
 - ◊ Description: A text description of the information presented in coolingUnitStatusAnalogValue.
 - ◊ Value: The scaled value of the current table entry (multiplied by coolingUnitStatusAnalogScale for integer presentation).
 - ◊ Units: The unit of measure by which coolingUnitStatusAnalogValue is expressed.
 - ◊ Scale: The factor by which coolingUnitStatusAnalogValue is expressed.
 - Discrete
 - ◊ Table Index: The static reference identifier for each table entry.
 - ◊ Description: A text description of the information presented in the 'value' OIDs of this table.
 - ◊ Value as String: The actual value of the current table entry expressed as a string.

- ◊ Value as Integer: The actual value of the current table entry expressed as an integer value.
- ◊ Integer Reference Key: A complete listing of all possible coolingUnitStatusDiscreteValueAsInteger values paired with their identifying strings.
- Configuration
 - Analog
 - ◊ Table Index: The static reference identifier for each table entry.
 - ◊ Description: A text description of the information presented in coolingUnitConfigurationAnalogValue.
 - ◊ Value: The scaled value of the current table entry (multiplied by coolingUnitConfigurationAnalogScale for integer presentation).
 - ◊ Units: The unit of measure by which coolingUnitConfigurationAnalogValue is expressed.
 - ◊ Scale: The factor by which coolingUnitConfigurationAnalogValue is expressed.
 - ◊ Access: A description of available access to coolingUnitConfigurationAnalogValue via SNMP client.
 - ◊ Minimum: The minimum possible value of coolingUnitConfigurationAnalogValue.
 - ◊ Maximum: The maximum possible value of coolingUnitConfigurationAnalogValue.
 - Discrete
 - ◊ Table Index: The static reference identifier for each table entry.
 - ◊ Description: A text description of the information presented in the ‘value’ OIDs of this table.
 - ◊ Value As String: The actual value of the current table entry expressed as a string.
 - ◊ Value as Integer: The actual value of the current table entry expressed as an integer value.
 - ◊ Integer Reference Key: A complete listing of all possible coolingUnitConfigurationDiscreteValueAsInteger values paired with their identifying strings.
 - ◊ Access: A description of available access to coolingUnitConfigurationDiscreteValueAsInteger via SNMP client.
 - String
 - ◊ Table Index: The static reference identifier for each table entry.
 - ◊ Description: A text description of the information presented in coolingUnitConfigurationStringValue.
 - ◊ Value: The actual value of the current table entry.
 - ◊ Max Length: The maximum string length supported by coolingUnitConfigurationStringValue.
 - ◊ Access: A description of available access to coolingUnitConfigurationStringValue via SNMP client.
- Extended

The extended section of the MIB contains data that provides a higher level of detail for the advanced user.

 - Analog
 - ◊ Table Index: The static reference identifier for each table entry.
 - ◊ Description: A text description of the information presented in coolingUnitExtendedAnalogValue.
 - ◊ Value: The scaled value of the current table entry (multiplied by coolingUnitExtendedAnalogScale for integer presentation).

- ◊ Units: The unit of measure by which coolingUnitExtendedAnalogValue is expressed.
- ◊ Scale: The factor by which coolingUnitExtendedAnalogValue is expressed.
- Discrete
 - ◊ Table Index: The static reference identifier for each table entry.
 - ◊ Description: A text description of the information presented in the 'value' OIDs of this table.
 - ◊ Value as String: The actual value of the current table entry expressed as a string.
 - ◊ Value as Integer: The actual value of the current table entry expressed as an integer value.
 - ◊ Integer Reference Key: A complete listing of all possible coolingUnitExtendedDiscreteValueAsInteger values paired with their identifying strings.
- String
 - ◊ Table Index: The static reference identifier for each table entry.
 - ◊ Description: A text description of the information presented in coolingUnitExtendedStringValue.
 - ◊ Value: The actual value of the current table entry.
