# Get connected

EcoStruxure Secure Connect Advisor — a secure remote access solution to program, maintain, and monitor machines remotely.

Not on site? Not a problem. EcoStruxure Secure Connect Advisor delivers secure remote access to your Magelis™ HMIs and their connected devices — saving time and travel costs.

This software-based solution doesn't require any extra hardware, and it works with your current Magelis GTU, Magelis GTO, and industrial PCs.

Now all you need to do is just connect and go.

[schneider-electric.com](https://schneider-electric.com)

Connect securely to your devices from anywhere with an internet connection.

## Efficient and easy to use

- Ready to use for all latest Magelis range HMIs (terminals and industrial PCs)
- Remote access for programming, diagnostics, control, and monitoring
- Speeds up operations and reduces machine downtime

## Works everywhere, for everyone

- Operable for all applications and segments
- Available from a desktop PC, laptop, or tablet

## Reliable and safe

- Cybersecure (end to end) for both original equipment manufacturers and end users
- Secure access to remote devices over the internet

## Easy to subscribe

- Sold as an annual subscription
- Remote service pack is adapted to users' needs
- Remote connection available through an activation code in just half an hour

Industrial applications include: Hoisting, material handling, material working, packaging, pumping, and general machine control.

EcoStruxure Secure Connect Advisor is available for all industrial segments including:

Food & Beverage

Mining, Minerals,  
and Metals

Machine tool

Packaging

Want to test drive EcoStruxure Secure Connect Advisor?  
Why not try our solution free for 30 days!

## Easy to subscribe — easy to set up — easy to use
