

Harmony eXLhoist

When your remote is safer and more efficient — so are your workers

The hardest working wireless remote control for hoisting now has new software for improved operator efficiency and safety. With a multi-base control function, easier configuration, one-handed control, and a 30-hour, quick-recharge battery, the Harmony eXLhoist gets the job done.

Harmony XAC pendant station

Harmony XKB/D/M joystick controller

Harmony XB4/5 pushbuttons for harsh environments

Discover the complete Harmony range for hoisting control
