Electric

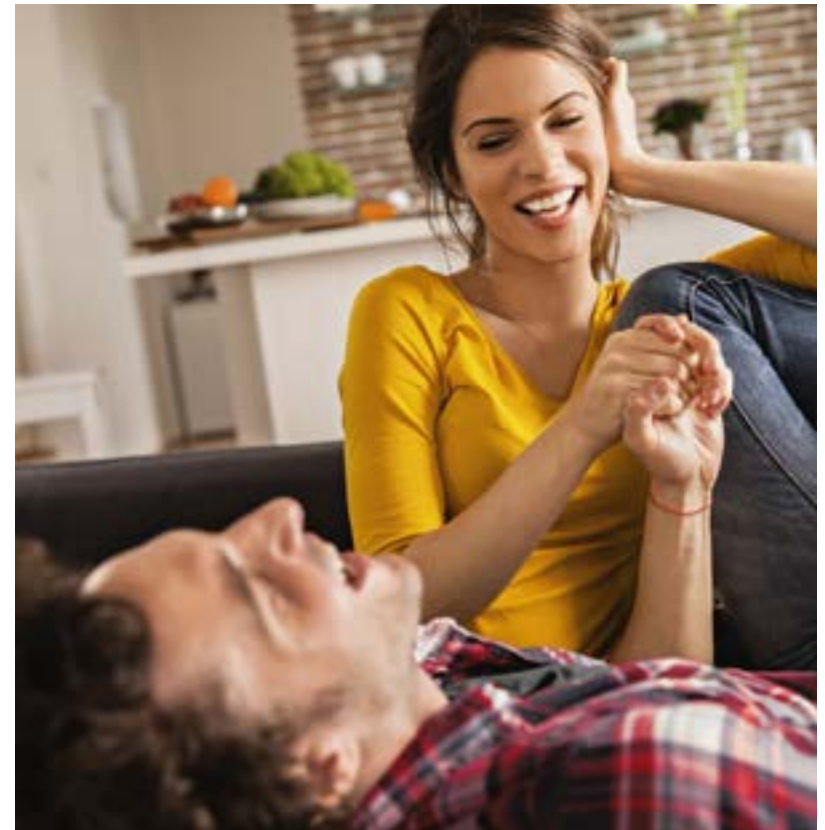

The Orion range

Remarkable design meets broad functionality

A Universe of possibilities

Orion is the new modular range from Schneider Electric, perfectly matching your individual daily life. More than 570 references offers extensive possibilities and combinations, from classical switches and socket-outlets up to electronic inserts, dimmers, multimedia socket-outlets and many more. All this excellently answers your personal wishes on style, material, and function.

The Orion range will always have the perfect solution for you.

Orion in-wall Bluetooth receiver

The Orion in-wall Bluetooth receiver allows people to enjoy their favorite music over high quality speakers instead of on their mobile devices. They can create a better atmosphere with brilliant sound at the touch of a button.

The Orion in-wall Bluetooth receiver can be paired with any Bluetooth device such as tablets, laptops, mobile phones etc. Play music from any source on your device, like internet radio or streaming services such as Spotify or Deezer. You can also connect devices that don't have Bluetooth using the AUDIO IN option. The receiver can be connected to two or more speakers of any model, type or brand.

Choose the solution for your needs

There are different solutions to choose from to get just what you need and the style you want. All options come with the Bluetooth receiver and 15V power supply (which is a 127/220V to 15V convertor). Additionally, you can also order two speakers and wires.

Option one: Modular approach

Order the Bluetooth receiver with power supply.

Option two: Complete kit

Bluetooth receiver with power supply and 2 speakers and Orion white fixing frame.

A photograph of a person with a beard and closed eyes, wearing a white t-shirt, sleeping in the passenger seat of a car. A game console is resting on the seat next to them, displaying a home screen with various game icons like Wii, Xbox, and PlayStation. The person's hand is visible, wearing several colorful beaded bracelets. The text 'Where to use the Orion in-wall Bluetooth receiver' is overlaid in green on the white t-shirt.

Where to use the Orion in-wall Bluetooth receiver

Homes

Create the perfect high quality musical mood in any room at the touch of a button. From reggae in your living room to blues in the bedroom or even classical in the kitchen. The choice is completely yours with the Orion in-wall Bluetooth receiver. You can play or stream music from your phone, tablet, laptop, or any other Bluetooth-enabled device.

Just press the button on the Orion in-wall Bluetooth receiver to stream any music you like to speakers around your home. By doing this, you'll experience true quality sound as it was intended.

Each receiver has its own identification number, which you'll pair with your device, to avoid interference from any other users nearby. That means you'll enjoy uninterrupted music, personalized to your taste in each room.

Hotels

Giving your guests a personalized experience when staying at your hotel helps to make them feel comfortable. That's why the Orion in-wall Bluetooth receiver is perfect for every room and suite.

Coupled with high quality speakers, the receiver lets your guests enjoy music at its best from any playlist from their mobile devices.

Hospitals

The Orion in-wall Bluetooth receiver is a great solution for hospital rooms. Visitors or patients just need to press a button to fill their room with their own choice of music. So, whether they're looking for soothing sounds of soul or up-tempo pop, the Orion Bluetooth receiver gives them the control.

Offices

Having effective technology in your boardroom and offices to support your needs, means you can focus on what matters most; your business. With the Orion Bluetooth receiver you can connect your whole boardroom to conference and video call audio. You can also bring presentations to life with quality sound by connecting to the receiver from a laptop.

It's fast, easy and reliable.
Just what your business needs.

Educational Centers

To teach is to inspire learners in all possible ways. Classrooms are no longer just places with chalkboards and paper. They're now interactive multimedia rooms where students learn from many sources, such as audiovisual media. That's why the Orion Bluetooth receiver is ideal for classrooms. They can bring teaching aids to life with great sound at the touch of a button.

Life Is On

Enjoy your favorite music easily.
