Experience the Wisier difference

Today's consumers are increasingly tech-savvy. They value comfort, convenience, and safety more than ever before. And, as the pace of everyday life grows, so does demand for smart home solutions.

Meet Wisier. Connected home technology that lets you be a smart home expert and satisfy your customers' growing expectations.

Designed to be both user- and installer-friendly, **Wisier brings compelling benefits to your customers, and new business opportunities to you.**

At the core of Wisier you'll find familiar Schneider Electric products. Enriched with connectivity, they remain as easy to install as their traditional equivalents, and their configuration is a breeze thanks to the eSetup for Electricians app. **So you can offer your customers smarter homes without investing extra time and effort.**

That's the Wisier difference.

Smart home is the next big thing

In 2016, 80 million smart home products were sold worldwide¹ – a 64% increase on 2015². This demand is set to grow with the global smart home market projected to reach \$70 billion by 2023³. Wisier will help you turn this opportunity into continuous business growth.

Meet Wiser

With a broad scope of Wiser connected products, including lighting, heating, shutter control, and energy management, you can meet your customers' needs and make their home lives easier.

Maximum flexibility for your customers

Wiser is compatible with Amazon Alexa, Apple HomeKit, and Google Home and is continually updated with new features. So your customers can easily upgrade their connected homes over time to fit their evolving needs.

The Wiser app for your customers

A home should fit its owners' needs, not the other way around. That's the Wiser philosophy. Here's how homes can be easily customized with the free Wiser app.

Schedules and modes

Lights, heating, and shutters programmed to individual preferences, all set up by the homeowner in the Wiser app. And three modes – Home, Sleep, and Away, changed with one tap to quickly adjust the settings.

Moments

The perfect ambiance for any moment. The Wiser app lets your customers set and save lighting, shutters, and heating settings and bring them back anytime they want.

Notifications

If there's an electrical fault, a leak, or an open door or window, Wiser notifies the homeowner via the Wiser app. So both the property and its occupants are better protected.

Wiser Home Touch

Wiser products are accessible via a hub that doubles as a controller. The Home Touch also enables remote management.

Call it “the hub” or “the brain”, the Home Touch brings together the Wiser functions of the home. Link it to Wi-Fi to enable remote home control through the app, from anywhere, at any time.

The Home Touch lets your customer stay in control even when his or her phone is playing hide and seek. **One tap on its touch screen** can activate a moment, adjust the temperature, or change between Home, Away, and Sleep modes.

Lighting control

With Wiser, you empower your customers to create the ideal lighting for any occasion. **Movie night ambiance on demand? One swipe and the lights go down**, turning the living room into a movie theater.

And when everyone's away, remote lighting control lets them switch the lights on and off to simulate presence at home. For greater home safety and greater peace of mind.

**Turning on, off,
and dimming
the lights made
more convenient
than ever.**

**Shutters in sync
with homeowners'
lifestyles.
For a smooth wake-
up and better
privacy protection.**

Shutter control

Offer your customers smart shutter control that allows them to let the light in – or block it out – without getting out of bed. They can also synchronize the shutters with their daily schedule or local sunrises and sunsets.

Automatic shutters offer a natural way to greet the day and also increase home protection.

If a storm starts raging while everyone's away, the shutters can be closed remotely; later they can be opened to let the sunshine in.

Heating control

Wiser enables precise temperature adjustment and saves energy when nobody's at home.

Help your customers solve one of the hottest issues at home – conflicting temperature preferences. With Wiser, it's easy to set the ideal temperature in every room and cater to different definitions of “cozy”.

At the same time, **Wiser is good for the household budget.** It helps homeowners achieve energy savings by lowering the temperature when nobody's home, right on schedule. And of course it warms up the house for a cheery homecoming. No manual adjusting of radiators necessary.

Energy management

Give your customers the gifts of insight and safety, thanks to 24/7 monitoring of their electrical system.

A Wiser-equipped electrical panel sends notifications whenever an issue arises.

Armed with this knowledge, homeowners can reduce the time you spend on diagnostics.

And, with Wiser, you're not just a go-to electrician but also an energy advisor. Show your customers they can **improve household budgets** by adjusting energy consumption patterns to use cheaper, off-peak energy and by making the most of solar power installations.

Greater efficiency and safety thanks to insight into energy consumption and electrical system status.

Sensors

Offer your customers greater comfort and peace of mind with Wiser sensors. These inconspicuous devices keep an eye on different areas of the house and send notifications via the Wiser app if something's amiss. They also take care of the little things, like turning the light off when nobody's in the room.

Discover the eSetup for Electricians app

You don't need a PC or any complex tools to configure Wiser – everything can be done via a smartphone thanks to the **eSetup for Electricians app**, available for free download. Connect to the product directly and use this app to finalize your project.

With the eSetup for Electricians app you can:

- Commission all Wiser products with step-by-step guidance
- Upgrade the product firmware offline
- Assign products to customer rooms
- Add devices to the Home Touch
- Get a summary of completed commissioning jobs and export it to a PDF document to share with your customer

Get your job done quickly with a single tool.
Download the app today!

Save time on setup and commissioning

Designed with the installers' needs in mind, Wiser is easy to commission and set up in a few simple steps.

How to set up Wiser functions:

1. Install Wiser devices at your customer's home
2. Download the eSetup for Electricians app to your smartphone
3. Connect with the devices through the app using Bluetooth
4. Follow the instructions to set up Wiser functions
5. Introduce your customer to a Wiser home

For assistance in completing the installation process, [access our customer care center via the app.](#)

Grow your business the **Wiser** way

Choose Schneider Electric as your smart home partner to grow your business and profits.

Created with comfort and convenience in mind, **Wiser connected technology helps you improve your customers' home lives**, gain recognition as a trusted professional, and acquire new clients through recommendations.

Join our Home EcoXpert program to become one of our partner electricians and get promoted on the Schneider Electric website. As a member of the program, you will be able to broaden your smart home expertise, differentiate yourself with EcoXpert signage, and position yourself as the go-to expert.
