Electric™

## Answer the needs of the modern workspace

The office of today is no longer just a series of rooms filled with cubicles and unhealthy lighting. It has open areas designed to encourage cooperation, meeting rooms built to increase focus and concentration, fun areas for relaxing, and inside gardens to support well-being.

Such diversity in the office requires equally imaginative solutions for power and connectivity. And this is how you provide it: with **Unica System+**, a range of solutions designed to flexibly and reliably power every corner of the office.

Modular, quick to install, and easy to rearrange, **Unica System+** devices provide unprecedented flexibility and premium aesthetics that complement the dynamics and style of the modern workspace. The upshot? Your customers get the freedom to work as they like.

## A premium look and feel for modern interiors

Workspace solutions used to focus mostly on functionality, without much thought for aesthetics. The **Unica System+** range is different.

Created by specialists from Schneider Electric's Design Lab, it combines brains and beauty. The smooth, ergonomic forms of the devices are subtle and minimalist, while the clever details, such as cable holders, ergonomic grips, and anti-slip patterns, add a touch of character and extra convenience.

Available in different colors and finishes, including exquisite Kvadrat fabrics, **Unica System+** devices give your customers a broad choice of options to complement their interior styles.

### The art of fabric

**Kvadrat**, a renowned Danish company, has been a leader in textile design and innovation since 1968. Their fabrics are highly valued and used by architects, artists, designers, and furniture manufacturers.

# Power to the people, everywhere

A contemporary workspace needs maximum functionality on every square meter. That's why we designed **Unica System+** as a modular solution.

It allows your customers to mix and match a vast selection of functions, creating individually tailored devices that are easily upgradable if needed. Available in different sizes, modules can be used individually or joined together, according to available space.

The whole system is quick, easy, and intuitive to install and offers diverse mounting options to even fit "impossible" places.

## Flexibility that liberates

Nothing lasts forever, especially in a modern office environment where flexibility is prized. In today's fast-changing world, office space must be able to keep up with the evolution of a company and its employees' needs.

The **Unica System+** range was developed with full flexibility in mind. All devices are easy to install as well as to dismount, and some products, such as posts and poles, can be moved around without fuss.

**Unica System+** also lets you upgrade functions in devices and add helpful accessories, like a phone holder or wireless charger.

# A complete system for greater convenience

No matter where your customer is situated – whether a one-room apartment or the top floor of a high-rise building – with **Unica System+** you can enhance the work experience, from floor to ceiling.

- Floor sockets and boxes
- Stand-alone desk units
- Modular desk units
- Poles and posts
- Cable management

# Give the floor to functionality

Unica System+ floor sockets and floor boxes

## Floor sockets XS

These single-power outlet devices come in two shapes: round and square.

In concrete floors, the floor sockets are mounted in screeded boxes. In raised-access floors, the floor sockets are mounted in dedicated raised-access floor boxes.

A 180-degree openable lid facilitates access to the power outlet, while an ergonomic lid grip makes opening the box simple.

**Unica System+ floor sockets XS** are made of brushed stainless steel that's robust and ready for rough handling. The products are also IP44 certified.

## Floor boxes M, L, XL

The M, L, and XL floor boxes offer different frame sizes to meet diverse needs. They have both plastic and metal versions, catering to various floor finishings.

Convenient features include:

- A rubber cable exit, highly aesthetic and flexible
- A robust, kick-safe, and detachable lid with reinforced hinge
- An ergonomic lid-grip for easy opening

The mounting of wiring devices inside the floor boxes is simpler than ever thanks to adjustable frames (three levels, adaptable to different floor heights) and a locking mechanism that ensure the devices stay in place.

**Unica System+ M, L, and XL floor boxes** are fully compatible with Unica wiring devices.

# Put convenience within arm's reach

## Unica System+ desk units

With aesthetic, ergonomic, and easy-to-install **Unica System+ desk units**, you bring greater convenience and connectivity to any desk.

### Desk units XS

The extra small desk units offer different configurations of functions: socket outlet, socket outlet and USB, USB A and USB C, and wireless charger. The devices are mounted in 60 mm holes in desks or tables.

A driller accessory is available for ease of installation. Each device is equipped with a locking ring that holds it in place and is pre-wired with a two meter cable.

A transparent, 180-degree openable lid is also available as an accessory. The XS desk units are available in two colors, anthracite and white.

### Desk units S

Thanks to an innovative, compact design and fixation without tools, the small desk units offer users extensive flexibility and mobility.

Mounted to a desk or any other surface with an integrated, rubber-covered clamp, the devices are easy to use and provide access to power wherever it's needed. Their functions include a socket outlet and USBs (A and C).

The S desk units are available in a premium fabric covering, including the cable, for outstanding aesthetics and comfort of use.

### Desk units L

The size L desk units include two modules that are installed on and under the desk. Smart clamping ensures that mounting is quick and easy.

The under-desk module is meant for permanently plugged-in devices, while the on-desk module is for immediate/daily use.

The devices are available in two configurations:

- 2 socket outlets + 2 USBs (on-desk module), 2 socket outlets + RJ45 (under-desk module)
- 2 socket outlets + 2 USBs (on-desk module), 2 socket outlets + 2 USBs (under-desk module)

On-desk modules can be upgraded with additional functionalities. Two color options are available: anthracite and white, both in an elegant fabric finishing.

## Tailor any workspace to individual needs

### Unica System+ modular units

**Unica System+ modular units** give you full control, both in terms of functionality and aesthetics. The devices can be mounted horizontally or vertically, and used both on desks (Desk Unit M) and on poles and posts.

The first step to configuring a **Unica System+** modular unit is choosing the size and style of the module. Made from single pieces of extruded aluminum, they are available in four design options: white, white fabric, anthracite, and anthracite fabric.

Function components, based on Unica wiring devices, are fitted into the aluminum module with a click. Basic function components include socket outlets, protected socket outlets, A- and C-type USBs, and circuit breakers. Advanced function components feature RJ45, HDMI, and other multimedia sockets, as well as wireless chargers.

**Unica System+** units can be used separately or easily combined via mini-WIELAND connectors. Once ready, the devices can be fixed with screws, clamped on the desk, or snap-fixed on the pole or post.

The modular units are designed to be future proof, fully flexible, and easy to upgrade.

### Add handy accessories

The modular units can be further enhanced with convenient office accessories.

- Wireless chargers (for desks)
- Label holders (for desks, poles, and posts)
- Phone holders (for desks)
- Desk storage (for desks)

## Change comes easy

Give your customers the possibility to adjust the office space to their evolving needs.

# Reach the highest standards

## Unica System+ poles and posts

Highly aesthetic, movable, and customizable with different functions and accessories, **Unica System+ poles and posts** are designed not to be frowned at, but to be admired.

An innovative construction, based on an aluminum profile with a rubber cable covering, ensures a clean look without visible wires and enables easy cable re-routing if needed.

The poles and posts are fully modular when it comes to functionality. They are compatible with modular desk units for regular functions and can be enhanced further with dedicated accessories.

### Poles

- For buildings with electrical infrastructure running in the ceiling
- Modular and customizable
- An Acti9 circuit breaker can be added for extra safety
- Accessories: table, coat hanger, cable exit

### Posts

- For buildings with electrical infrastructure running beneath the floor
- Modular and customizable
- Two options: with a table or with a handle
- Two colors: anthracite and white
- Accessories: handle, table, wired foot for table

# Keep it nice and clean

## Unica System+ cable management

When you've almost wrapped an installation, use **Unica System+ cable management** products to add nice finishing touches and ensure the highest aesthetics.

### Floor feeder

The cable guiding system covers stand-alone cables for both aesthetic and safety reasons. The elements of the feeder are made of solid, durable materials and can be easily stretched and prolonged if needed. An additional accessory lets you fix the feeder under the desk. Available in black and silver.

### Cable wraps

The self-closing, wrappable sleeves keep plugged-in cables together. Designed for convenience of use, the wraps are put on without any tools and allow for easy release of the cable if needed. Available in different sizes: black and white.

### Clamps

Cable clamps help with routing small bundles of cables and prevent tangling. They are fixed on or under the desk with an adhesive tape and are available in white.

### Grommets

The grommets fit into the desk to lead the cables away. They are mounted in 60 mm or 80 mm holes and come in three finishings: black, white, and aluminum.

# Gain a competitive advantage with Unica System+

Enhance the style, functionality, and flexibility of any workspace with the most comprehensive system on the market. Offer your customers sophisticated design that perfectly matches modern interiors and smart functions that keep people connected in every corner of the building.

With the high quality and innovative features available in the **Unica System+** range, you can stand out from the crowd and win new business opportunities. And your customers? They gain aesthetic, modular, and durable solutions that prepare their workspaces for the future.
