Services

When you need to deploy IT—and fast—it doesn't have to be complicated or time-consuming. EcoStruxure™ Row Data Center puts all the building blocks of physical infrastructure—power, cooling, security, and management software—into the rack instead of building out the entire room. It means less construction, more flexibility in location, and ability to scale quickly when you need it, whether it's a new build or retrofit. EcoStruxure IT™ Software & Services enables IT users to mitigate and anticipate risk of failure of their critical infrastructure while reducing operational expenses through an open, vendor-agnostic platform.

EcoStruxure Row Data Center provides simplicity, speed, adaptability, and predictability to all phases of your project:

- **Design:** With our best-in-class design tool Data Center Row Designer, quickly and easily created validated designs that are orderable as a single solution.
- **Build:** Your solution bill of material arrives complete and ready-to-assemble quickly and easily.
- **Operate:** Row Data Center is designed for easy operation and quick maintenance. Now with our EcoStruxure IT software & services you gain the right visibility, insights, 24/7 expert remote monitoring, and on-site support.

EcoStruxure Row Data Center for the evolving hybrid IT world

Deploying IT at the Edge?

EcoStruxure Row Data Center simplifies how you build and manage your multi-rack deployments throughout your network, whether that's a regional data center or other edge environments.

Starting a new or retrofit project?

The flexible row-based architecture is adaptable and simplifies planning, design, and deployment of your IT.

Modernizing your existing IT deployment?

The modular nature of Row Data Center minimizes the cost and complexity of modernizing infrastructure.

Deploying converged IT?

Row Data Center allows you to deploy physical infrastructure at speeds in line with Converged IT.

Outsourcing or consolidating?

Protect and secure your remaining IT while easily monitoring and managing all of your assets across all locations from one dashboard using the EcoStruxure IT software suite.

Expanding capacity?

Scale fast with pre-engineered, modular Row Data Center components.

On a budget?

Now there is choice in configurability of Row Data Center solutions. Configure with APC Easy offers including Easy Racks, Easy PDU, Easy InRow Cooling, and Easy Rack Containment adaptors offering more value choices and even ability to deploy in non-IT spaces limiting need for costly white space buildouts.

Non-IT space in your plans?

Now offering fully contained row with new containment adaptors for Easy Racks and InRow cooling with optional emergency ventilation kit. Deploy row in non-IT environments such as commercial or warehouse spaces and deploy data centers faster and with less cost.

EcoStruxure Row Data Center Building Blocks

Best-in-class components are configured into a complete solution

From small to large to multi-row configurations, Row Data Center adapts to your needs.

Adapting for scalability and also adapting to new environments to further meet business needs with new contained solutions for non-IT environments.

Rack Systems

Engineered to integrate seamlessly with Row Data Center components, simplify shipping, speed installation, facilitate the installation of IT, and maximize airflow.

Today's wide range of IT applications and environments demand a variety of rack infrastructures that can mount a mix of different equipment and efficiently setup, deploy, manage, monitor, and control IT anywhere in an enterprise. NetShelter SX Enclosures offer best-in-class features that speed up deployment and moves, adds, changes and robust feature set for most demanding IT applications. Easy Racks offer a choice in value and make IT deployments simple, fast and easy.

NetShelter SX Enclosures

Features

1. Cable access roof
2. Integrated baying brackets
3. Preinstalled leveling feet and castors
4. Toolless, Zero-U accessory integration
5. Adjustable vertical mounting rails
6. Half-height side panels

Variety of enclosures

1. NetShelter SX or Easy Rack enclosures
2. Range of heights: 42U – 52U
3. Range of widths: 600mm, 750mm, 800mm
4. Range of depths: 1070mm, 1100mm, 1200mm
5. Color options: Black, White, Grey

Easy Racks

NetShelter and Easy Rack Containment

Aisle or rack based thermal containment solution to increase cooling system efficiency while protecting critical IT equipment and personnel

- Active flow control
- Flexibility in design for hot or cold aisle
- Fire safe system
- Build value with LED lighting kit
- Safe sliding doors
- Front or rear rack based containment
- Optional emergency ventilation kit

Cable Management Options

Wide range of cable management accessories designed to easily route cables within racks and along a row solution

- Horizontal & vertical cable options
- Overhead routing options

800mm Wide Easy Rack

Horizontal Cable Management

Vertical Cable Management

NetShelter Aisle Containment

Power

Rack Power Distribution

Schneider Electric rack power distribution units (PDUs) have sufficient power and receptacle outputs to meet high kW loads in a minimal amount of space. NetShelter Rack PDUs offer

NetShelter Rack PDUs

Varieties

1. **Basic Rack PDU:** Entry-level power distributor for rack-mount equipment
2. **Metered Rack PDU:** Advanced power distribution provides real-time remote monitoring of connected loads
3. **Switched Rack PDU:** Premium power distribution allows remote control of individual outlets and monitoring of aggregate current consumption
4. **Metered-by-outlet:** Provides real-time remote monitoring of each outlet
5. **Rack Automatic Transfer Switch:** Provides redundant power to single-corded equipment
6. **Easy Rack PDUs:** Reliable, affordable, and easy to use in Basic, Metered, Switched PDU types and outlet and power densities.

Easy Rack PDUs

Colored locking IEC cords

Locking IEC power cords in a variety of colors provides an easy identification feature for rack power distribution.

Modular Power Distribution

Modular power distribution up to 277 kVA that is engineered for Row Data Center solutions and is scalable, agile, safe, and efficient to enable rapid expansion or reconfiguration in the future

- Minimal white space footprint
- Truly safe with scalable modules
- Toolless expansion
- Preconfigured breakers and cord sets for ease of deployment
- Fully compliant, global offering
- 72 kW 5U PDU, 144 kW PDU, 266 kW PDU, 277 kW PDU

Power

UPS

Schneider Electric is a global leader in uninterruptible power supplies and power distribution systems that ensure safe, clean, and reliable power regardless of the state of the utility grid or power supply.

Three-Phase UPS

Symmetra PX

Modular three-phase power protection from 10 – 500 kW with ultra-high availability, scalable for any size data center or mission critical environment

- Fault-tolerant (N+1) design for highest level of availability
- Corrected unity power factor using double conversion technology
- Modular and scalable without forced shutdowns to allow for right-sized deployments
- Rack-based for agility and aesthetics

All-in-one System Cabinet

System cabinet that is pre-configured and optimized with UPS and power distribution panels and to provide power distribution and backup power to the IT enclosures in the row.

- APC Easy Rack
- APC Smart UPS and extended battery packs
- Power Distribution Panels
- Rack mounting space for optional EcoStruxure IT gateway or NetBotz Security and Environmental appliances

Single-phase UPS

Smart UPS

0.75 – 5 kVA, advanced line interactive power protection for servers and network equipment with advanced management in a tower or rack optimized form factor

- Smart external battery connector
- Emergency power off
- Predictive battery replacement
- Alpha numeric LCD display
- High-efficiency green mode
- Slim 2U rack/tower convertible

Smart UPS On-line

1 – 20 kVA, rack and tower convertible, double-conversion, on-line UPS with advanced management features to provide online power protection for servers, networks, and light industrial applications

- High power factor
- High-efficiency “Green Mode”
- Flash upgradable firmware
- Enhanced intelligent battery management
- Embedded NMC with environmental

NEW

Smart UPS

Cooling

Schneider Electric offers a comprehensive portfolio of high-efficiency cooling solutions for virtually any need in critical IT environments, from network closets and server rooms to data centers of all sizes.

Close-coupled, InRow Cooling

Close-coupled InRow™ cooling systems are engineered for our Row Data Center solution and can be configured through the ISX Designer tool to ensure the right number of cooling units and all of the parts and subsystems to match the given the heat load, density, and redundancy levels

- InRow Chilled Water (up to 70 kW)
- InRow DX (up to 37 kW) including new InRow DX 300mm
- InRow DX Self Contained (up to 10kW)
- Minimizes air mixing greatly improving predictability
- Increases efficiency using variable speed fans & shortening air path
- Designed to seamlessly integrate with row solutions
- Active response controls that vary cooling capacity to match heat load
- Now configure with Easy Cooling Row CW which is easy to configure, install, use and maintain and provides competitive features and high performance.

UniFlair InRow DX

Easy Cooling

Security

Schneider Electric offers a comprehensive Netbotz portfolio to enable the monitoring and security of your Row Data Center solution.

- Rack mount and wall mount appliances designed to provide a wide range of environmental monitoring and surveillance for sensitive equipment
- Sensors include wireless & wired temperature and humidity, smoke, vibration, and fluid detection
- Sensor pods, USB camera pods, and HID rack access pods connect to appliances via USB or Cat-5 cabling
- Rack Access Control tailored to data center and edge environments provide permission-based entry and audit trail

Take control of on-premise and edge environments with EcoStruxure IT Software & Services

Distributed IT edge and on-premise environments present new challenges:

- 1 IT infrastructure is becoming more complex and more difficult to manage.
- 2 There is a lack of visibility and insights into IT infrastructure across many locations.
- 3 There is no IT staff or IT expertise at the site.
- 4 This reactive approach is having a negative economic impact on the IT infrastructure.

EcoStruxure IT Expert makes your life easier by putting you back in control.

Visibility across all your locations and devices provides a complete view of your equipment.

Reporting shows you where to focus your attention first.

Assessments help you proactively mitigate risk, improving operational efficiency and work-life balance.

Use data as proactive guidance for management.

The question is, do you want help operating your system efficiently and managing it proactively?

Monitoring & Dispatch Services

Proactive solution management for your distributed IT needs

Experts from the Schneider Electric Service Bureau or your preferred partner are your trusted advisors for your distributed IT infrastructure. Combining 24/7 remote monitoring, proactive troubleshooting and resolution, and on-site remediation for issues that require hands-on assistance.

What is next?

Ready to move forward on a design and proposal for your site?

Schneider Electric offers a best in class solution design tool that enables drag and drop configuration of Row Data Center solutions and provides drawings, bill of material, and engineering validation.
