

# Rapidly deployable infrastructure solutions for healthcare facilities

## How can Schneider Electric help?

Schneider Electric™ stands ready to help healthcare facilities respond to COVID-19.

With our expertise in Building, IT & Power Management, we are uniquely positioned to offer a comprehensive set of healthcare infrastructure solutions. We partner with manufacturers and contractors to deliver rapidly deployable medical units such as tents and ICUs.

Our offers include:

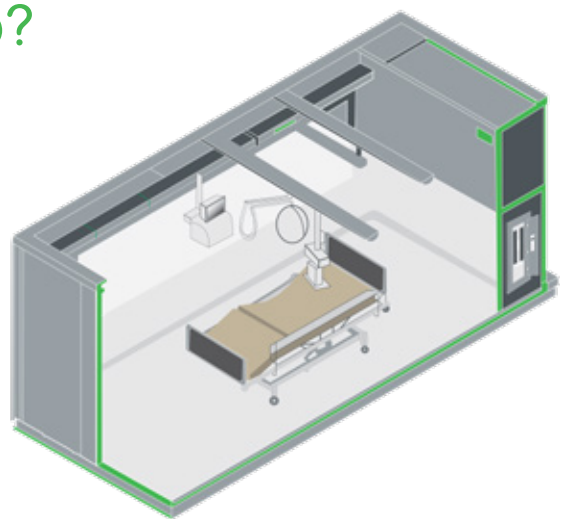

Coordination of all-in-one units, for building out new spaces

Individual system components for reconfiguring existing spaces

A local service team

**Schneider**  
Electric

### All-in-one units for building out new spaces

- **Prefabricated temporary medical facilities\*** (either stick-built or shipping container-style) that can serve as ICUs or general ward units.
- **Multi-purpose tent clinics** for check-ins, overflow, and drive-thru testing
- **Pre-engineered solutions** containing power distribution and networking equipment to make sure these temporary units stay powered and online
- **On-site energy sources**, also known as microgrids, for powering temporary medical units

### Individual system components for reconfiguring existing spaces

- **Building and HVAC controls to maintain negative pressure and proper airflow:** sensors, valves, actuators, room controllers, and more
- **Power distribution to support critical medical equipment and keep the lights on:** uninterruptible power supply units, switches, power distribution units, racks, surge suppression, and more
- **IT infrastructure to keep networks online:** precision cooling systems, IT closets, secure power protection, security and environmental systems, and more

### A local service team

Our remote and on-site services keep equipment performing reliably and efficiently throughout the lifecycle. We can cover both non-critical and critical areas of a facility.

- **Installation, commission, and start-up services** to ensure seamless deployments
- **On-going remote monitoring** to protect electrical distribution health, power distribution, IT infrastructure, building automation / HVAC systems
- **Full breadth and depth of support**, from simple preventive services to complex upgrades and modifications

\*Coordinated through our network of partnerships
