# Maximum value and efficiency with EcoStruxure Machine SCADA Expert software

## Save time

- Save days of testing and commissioning thanks to a fully tested and validated association with Harmony iPC/GTU Open Box
- Save time building applications with ready-to-use PackML, OEE and Andon templates
- Automatically generate reports compliant with CFR21 Part 11
- Tailored information at a glance using Business Intelligence Dashboard template

## Save money

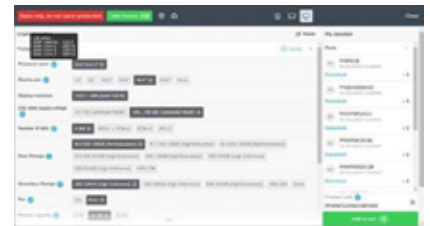

- Track your data and understand your performance using embedded OEE templates
- Get peace of mind and save time and resources with our single point of contact for HW/SW/OS support
- Access SCADA-level software, with all its benefits, at a competitive cost/feature ratio
- Confidently maintain your machine with long-term hardware supply and availability
- Pay only for what you need with our application size-based license pricing

## Connectivity and data management

- Realize the power of the IoT with EcoStruxure Machine SCADA Expert's extensive IT and OT driver library and data management capabilities (connection between ERP, MES, third-party historians, and the plant floor)
- Includes 250+ native communication drivers
- Native OPC interface, including OPC UA, OPC DA, OPC XML, and OPC .NET
- Monitor and control remotely your application with Mobile Access, using a tablet, smartphone or remote PC

## Enhanced User Experience and Seamless Integration with AVEVA Software

- Integration of Industrial Graphics Editor in the Software, provides unified look and feel and user experience for software users familiar with AVEVA InTouch HMI and AVEVA System Platform (a common extensive library of modern industrial graphics)
- Smart design & engineering: Edit and/or import Industrial Graphics and integrate them in your projects
- Situational awareness graphics library, included in the software, can contribute for improved operator efficiency
- Built-in connectivity to AVEVA Historian and AVEVA Insight
