Dispatch Services for EcoStruxure™ IT Expert

Our software tool managed by you.
Your services managed by us.

Today, you have competing priorities and overextended departments. Spending time and budget to address critical IT power problems could be setting you back.

Plan your budget better.

Since you can amortize the cost of this service over time, you get predictable maintenance costs to help you plan better.

Free up more of your time.

By leveraging our experts and fleet of vehicles, you can free up your time and budget to focus on value-added tasks.

Resolve issues faster.

By outsourcing advanced troubleshooting and on-site support, you can remediate issues faster and help avoid downtime before it occurs.

What is Dispatch Services?

Our Dispatch Services is an upgrade to our hosted software called EcoStruxure IT Expert (sold separately). With Dispatch Services, you leverage Schneider Electric experts for:

- Training that enables your team to perform basic troubleshooting
- Advanced troubleshooting support
- Next business day, on-site support with parts and labor included

Life Is On

Schneider
Electric

How does it work?

Outsource the advanced support requirements, while you maintain control of the remote monitoring and basic troubleshooting.

Responsible party	Remote monitoring ¹	Basic remote support ²	Advanced remote support	On-site support, with parts and labor
You				
Schneider Electric				

¹ Remote monitoring must be done by you (or your preferred partner) using Schneider Electric's EcoStruxure IT Expert software (sold separately).

² Schneider Electric provides the training for basic remote support so your Network Operation Center agents can troubleshoot.

How does "basic" remote support work?

You will be required to take our level 1 remote troubleshooting training so your Network Operations Center agents are trained to address any basic incidents that might arise.

Easily add Dispatch Services

- 1, 3 and 5 year options available
- Coverage for [Smart-UPS](#) and related accessories
- Available during and after factory warranty

What is EcoStruxure IT Expert?

It is our award-winning hosted software for do-it-yourself remote monitoring and device management.

Key benefits:

- Improved visibility
- Predict end-of-life for UPSs
- Gain data driven recommendations powered by AI
