

# Your facility at your fingertips 24/7

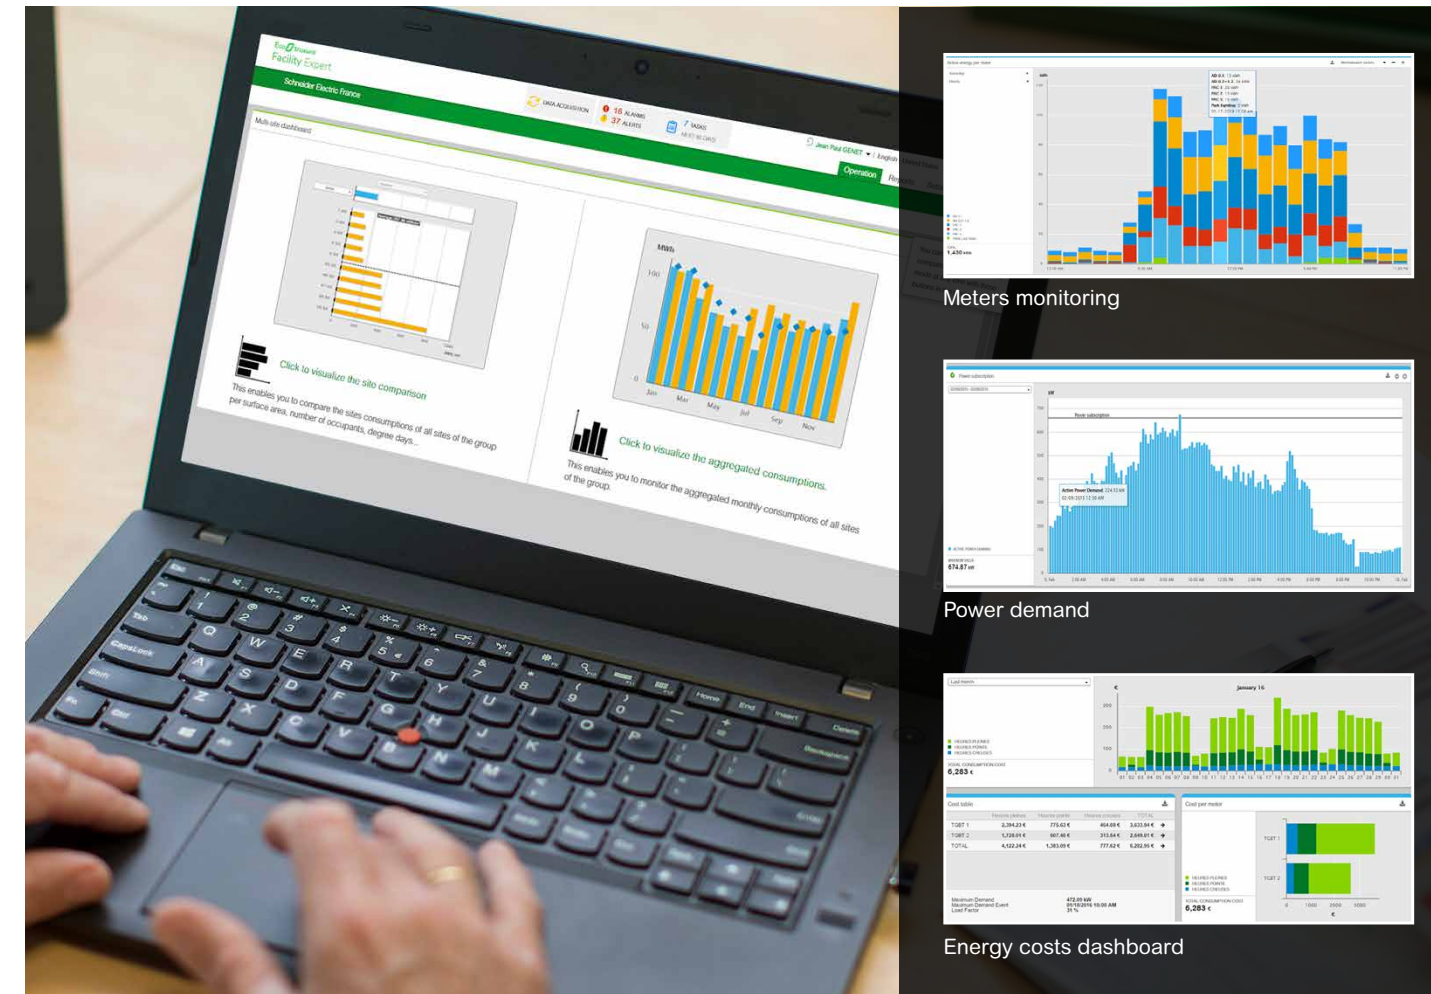

With EcoStruxure™ Facility Expert, you can leverage the latest cloud services and data acquisition technologies of your smart electrical distribution network to gain maximum control over your operations.

- Gain insights into energy consumption and asset status
- Improve control of energy costs
- Keep key assets up and running
- Increase maintenance efficiency

## Reduce energy costs

EcoStruxure™ Facility Expert provides real-time visibility into energy costs and performance, allowing you to enhance the efficiency of any building.

- Monitor energy consumption and track deviations by comparing usage over different time periods, zones, or meters to identify contributors to peak consumption
- Track power factor and power demand and be alerted to avoid utility penalties
- Improve your energy purchase by comparing different tariff proposals and using data export capabilities for energy reporting or further in-depth analysis
- Simplify benchmarking with local energy performance scales and energy management standards such as ISO 50001 and LEEDs

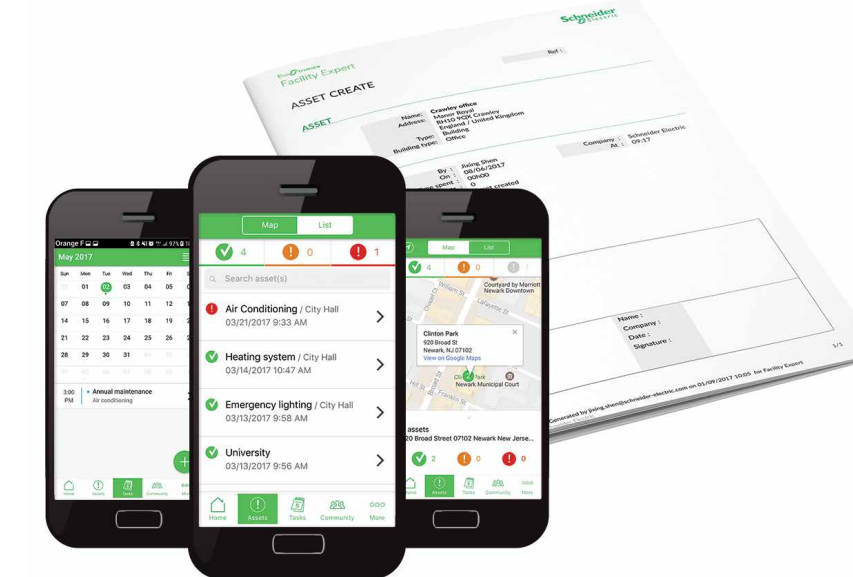

Demonstrate your commitment to sustainability by displaying monthly energy, water, and gas consumption and savings.

## Improve operation efficiency

By enabling a proactive maintenance program, EcoStruxure™ Facility Expert lets you boost your building's operating efficiency, avoid power outages, and prevent asset breakdowns.

- Get instant alerts when issues arise
- View the real-time status of all your critical assets and loads to reduce property damage and minimize business interruptions
- Share the facility logbook with your team so everyone receives information in real time and stays connected, even in the field
- Access all relevant information—dates, documentation, photos, voice memos, etc.—to share directly with field engineers on their mobile devices for faster troubleshooting and repairs
- Download preventive maintenance plans and receive task reminders to optimize operations
- Generate maintenance reports in a single click to document that the job is done and, at the same time, reduce administrative tasks

## Installation is easy

### Features for EcoStruxure™ Facility Expert – Smart Power license

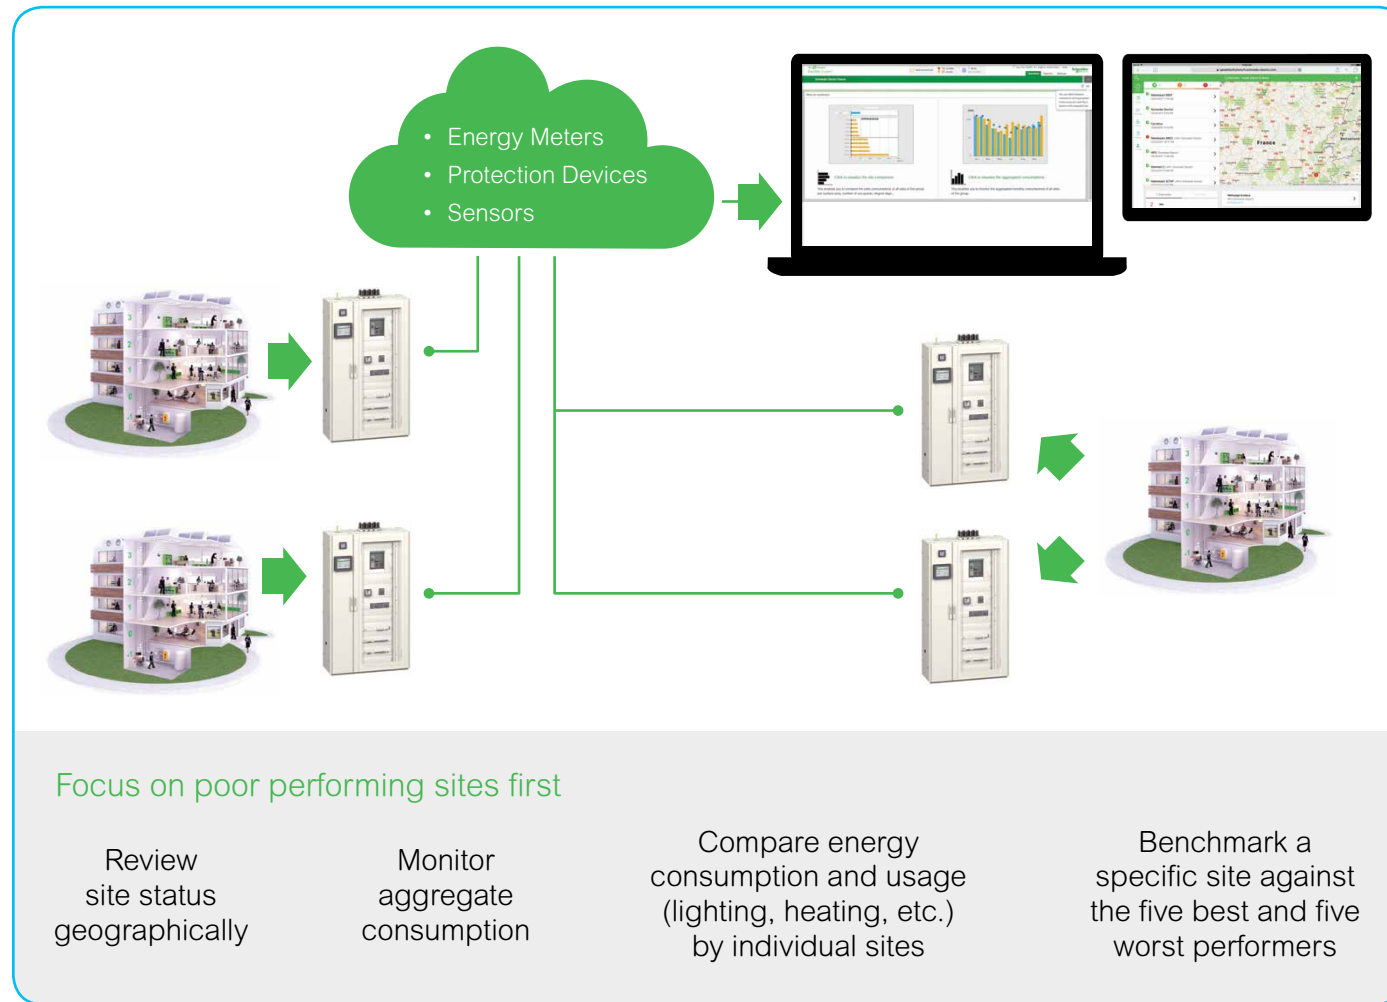

Energy Features	
Energy consumption monitoring (main, usage, zone, meter)	✓
Alerts on main energy consumed when over target	✓
Multi-site comparison/Multi-site consumption aggregation	✓
Energy site performance vs. standard	✓
Power demand and power factor monitoring and alerts	✓
Energy monthly report	Option
Energy cost	Option
Energy kiosk	Option
Operations Features	
Maintenance plan, asset log history, asset doc repository	✓
Preconfigured alarms for SE equipment (Masterpact, Compact NSX)	✓
Custom alarms on threshold and status change (eg. Acti9 auxiliary contact, SmartLink)	✓
Intervention sheet	✓
Task manager and task reminder	✓
Sharing of asset information and tasks across teams (contributors)	✓

# Easy single- or multi-site application

## Smart switchboards deliver intelligent power distribution

Smart switchboards and Facility Expert are key elements of the EcoStruxure™ Power architecture. By combining them, you can:

- Measure usage, quality, and status of your electrical power
- Aggregate power distribution data
- Make real-time information available to all team members on site and at remote locations

### Smart

- Diagnostics for operation and maintenance
- Embedded and wireless metering
- Cyber secured

### Tested and proven architecture

- Reference design per application
- Scalable and future-ready

### Simple to commission

- Smart device discovery with easy to follow instructions
- Additional support available at [www.schneider-electric.ca/facilityexpert](http://www.schneider-electric.ca/facilityexpert)
