

NEW! Uniflair LE Chilled Water 60T Unit HDCV5200

The Uniflair LE model HDCV5200 is one of the largest perimeter cooling solution from Schneider Electric and the optimal choice for cloud and colo customers. The high cooling density per footprint and energy efficient design makes this new perimeter CW unit the perfect for next generation data centers and high temperature applications.

Control And Security

- EcoStruxure™ ready
- TLS 1.2 Security
- Touch screen color display
- Integrated network management card
- Modbus/BACNet/SNMP/Web
- Preventative maintenance alerts and alarm display
- Realtime capacity and power monitoring
- Group control

Service and Engineering Support

- Industry leading warranty
- 1 Year parts, labor and travel
- 24x7 Technical support
- Custom engineering capabilities

Variable Speed EC Fans

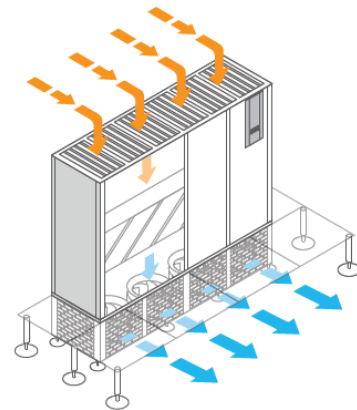

- Active Flow Control (AFC) compatible
- Underfloor fan assembly
- Downflow air discharge

Chilled Water System

- Low pressure drop slab coil
- Hydrophilic coil coating
- Draw through design
- Modulating 2/3-way valve
- CW inlet temp sensor

Additional/Optional features

- Reheat and humidification
- Dual power supplies
- 65k SCCR rating
- Ultra capacitor for fast restart
- Active floor pressurization
- Direct air economization option
- Motorized isolation damper
- Condensate pump
- Plenum/floorstand

SKU	HDCV5200
Cooling type	Chilled water
Configuration	Downflow with underfloor fans
nSenCap @ 80F, 45F EWT	200kW
Air flow (CFM)	23500
Fan Quantity	4
Electrical Power	208, 460 or 575V, 3ph, 60Hz
Dimension (H x W x D)	77* x 122 x 34 (in)

*Without fan assembly
