Introducing Data-Linc Group

Ever since Data-Linc began serving the industrial automation industry in 1988, the company has designed, manufactured and supported robust, high quality wireless and wire data communication solutions for long-range remote SCADA and plant-floor automation systems.

Data-Linc products are engineered for reliable operation in harsh, high noise environments and are backed by expert technical support specialists. Some key benefits are:

- Commitment to backward compatibility, "no modem left behind"
- Factory configured for easy installation
- RF path studies and reports
- Global availability with local support
- "Try before you buy" demo program
- Broad industrial installed base
- Unsurpassed customer technical support
- Bundles = easy installation and convenience

Total Services

"Think Data-Linc"... for the world's broadest line of industrial grade modems. Make Data-Linc your one-stop source for robust and reliable industrial grade data communication.

Data-Linc supports the Schneider Electric focus on solutions designed to enhance ease of use, offering our joint customers and solution providers added confidence in reliable data transfer for crucial monitoring and control.

A broad array of options allows Data-Linc to focus on the customer's need. The company designs a network based on the products that will best meet your requirements. Data-Linc solutions fit the need, work from the start and provide many years of outstanding performance.

Total Solutions

Data-Linc is the communication expert, providing the method for the data transfer portion of an overall solution. Company products close the loop, and not only connect central command to remote controllers, but instill confidence for strong, reliable and secure connections.

Unique value proposition

With so many modem manufacturers, why choose Data-Linc? In two words, "diversity" and "service". Data-Linc is unique in its broad range of modems that facilitate the design of unique, innovative network topologies.

Additionally, the company's broad product line includes, not just high end products, but a range of robust industrial grade products from low to high, offering a choice for the most cost effective option.

Lastly, but actually first, Data-Linc rates top honors for quality products and customer service... when you phone Data-Linc, a person answers.

we need to edit this list or add some on the back, your thoughts?

Markets served

● Primary sectors of activity ● Secondary sectors of activity

End user					OEM					
Food & Beverage	Water/Wastewater	Oil & Gas	Mining, Minerals & Metal	Power/Electrical Energy	Hoisting	Lift	Packaging	HVAC & R	Conveying	Textile
●	●	●	●	●	●	●	●	●	●	●

Areas of expertise

Multi-vendor connectivity

Wireless network connectivity

Data migration

Authorized CAPP products

Authorized CAPP products

The **Data-Linc portfolio of industrial wireless modems and supporting technologies is extensive. See the Data-Linc or Schneider Electric websites for details.**

Product description

A broad and diverse range of industrial wireless radios featuring latest designs and technologies for virtually every wireless application.

Distinguishing characteristics

Robust, cost-competitive alternative to WiFi. Unique protocol to I/O solutions. Proven-in-use performance in customer cases all across the world.
