Turn to us for switches, sockets, and cable management systems you can trust.

Your electrical installation plays an important role in providing your customers with the comfort and safety they deserve. And, when it comes to offering your customers the best possible solutions for their electrical, telephone, and IT wiring needs Schneider Electric is the natural choice.

Bring your ideas to life and give your customers an even broader range of options with our switch, socket, cable management, and trunking solutions, designed to respond to the technical, cost, and esthetic requirements of commercial buildings.

Whether you are working on a renovation or new build, Altira switches and sockets and OptiLine 45 cable management and trunking systems are a great way to give your customers reliable access to energy and data wherever they need to plug in–on walls, floors, desks, and more!

Altira antibacterial devices

Antibacterial outlets for dedicated circuits

EDCED116009EN.indd 3 06/09/16 11:01

Altira devices now click right in to your trunkings

The easy route to a more robust installation

Does this make you nervous?

It no longer has to! Plug and unplug with confidence. Altira devices clip in securely for robust performance.

Simple, yet robust by design

Altira's ingenious new design keeps the trunking from gaping open, holding the outlets firmly in place, even without the locking clips.

Installation made easy

When you don't need an IP40 rating, Altira single outlets clip right in. There's no need to add the locking clip.

Modular and flexible

Simply build the installation you need by adding single outlets. Each additional outlet makes the system even more robust.

Choose Altira outlets equipped with our exclusive clip-in system

- Single fixed outlets positioned at 90˚
- Single Rotoclip outlets with adjustable swivel position from 45˚ to 90˚
- Single and double RJ45 socket

EDCED116009EN.indd 4 06/09/16 11:01

Altira now offers a range of new features

Choose Altira for your audio/video equipment needs

Whatever your audio/video needs–displaying documents on a screen or interactive blackboard in a classroom, broadcasting audio and video in a conference room, sending data, or charging a mobile phone via a USB socket–Altira has a solution.

1. USB 2.0 port
2. Female 3-RCA socket
3. 230 V charger (5V, 1A power supply)
4. DH15 precabled connector
5. HDMI precabled connector
6. 3.5 mm precabled female socket

Altira also has new finishes

Wiring devices with antibacterial properties

New

All colored outlets, whether single, double, or triple, now have antibacterial properties.

Altira antibacterial devices provide long-lasting protection from common germs throughout the product's lifetime.

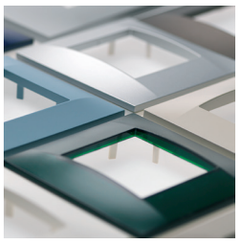
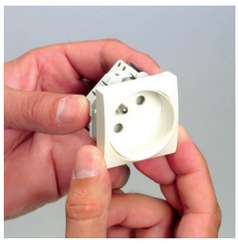
The smart, easy way to build robust installations

Altira extras

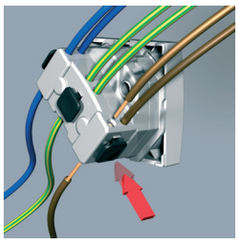
• A rainbow of colors in 45x45. Altira comes in 17 finishes. Whether your customers want a monochromatic or high-contrast palette, you've got it covered.



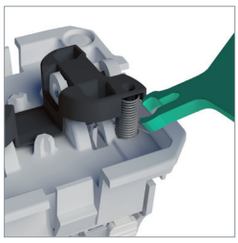
• The Rotoclip outlet swivels from 45˚ to 90˚ at the touch of a fingertip. It's clever. Even better? If you change your mind, you can switch out to a fixed outlet any time.



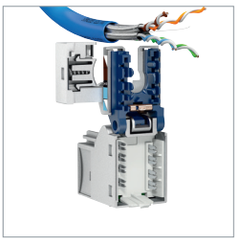
• Adding new wires is easy with Rotoclip outlets, which are equipped with automatic, pass-through connectors and four terminals per pole.



• To make your job even easier to manage, the Altira switch converts easily into a pushbutton with accessory S520299.



• And, for fast, easy handling, the Actassi S-One RJ45 connector is manufactured in a single piece with integrated tightener.



OptiLine extras

• Clever cable claws keep cables in position while you work.

• Splicebar lets you join two trunkings seamlessly and without tools.

• With a depth of 55 mm, OptiLine trunkings have plenty of room to manage your cables.

• A separator lets you use the 1-compartment trunking for both power and low voltage cables.

• A broad range of products covers all power and low voltage needs, regardless of how your workspace is configured.

• OptiLine polar white trunkings are designed to provide a sleek finish when used with Altira wiring devices.

• The exclusive Altira clip-in system means your installation will be robust, even without lock-in clips.

Odace and OptiLine 70*

For that little something extra…style!

Install OptiLine 70 trunkings and Odace wiring devices together to give your installations an original touch.

OptiLine 70 extras

• 70 mm front opening compatible with Odace outlets and switches; easy handling for smooth installation.

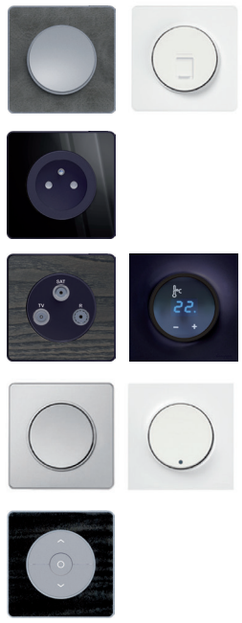
•Finishing plate hides cutting errors on the cover.

• Attractive polar white (RAL 9003).

Odace extras

• Stylish balance between traditional and contemporary design (a circle in a square); Odace switches and outlets are priced for all budgets and blend seamlessly into today's interiors.

• Practical, flexible mechanisms:
- Back-side disconnect button
- Test terminals accessible from front
- Pass-through terminals with four connections per pole
- Indicator light installs just behind the front plate
- Easy-to-add spring for pushbutton usage.



Alréa and OptiLine Mini*

Give your remodeling projects a sleek, streamlined appearance

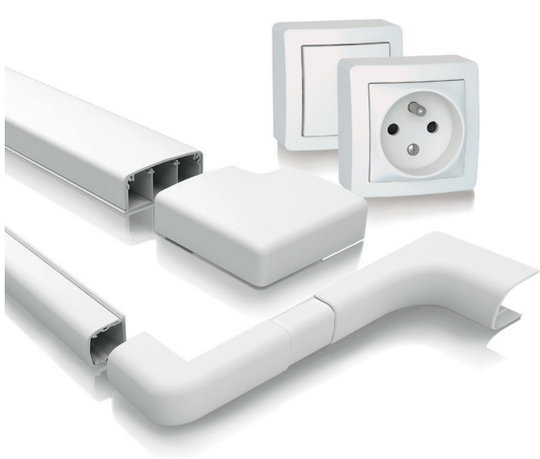
These surface-mounted trunkings are compact and streamlined, for a clean, finished look for your renovation projects.

OptiLine Mini extras

• Robust and resistant to temperature fluctuations and UV rays.

• OptiLine Mini is easy to install:
- Pre-cut drilling holes every 10 cm
- 12x20 version with adhesive strip
- Adapts to imperfections in your wall
- Cable management membrane
- Full-coverage front plate is easy to paint.

• Attractive polar white (RAL 9003).



Alréa extras

• Automatic hookup to two-way switches.

• Compact all-in-one base plate and mechanism withstands pulling.

• Easy to disassemble.

• Attractive polar white (RAL 9003).

* Not available in all countries
