

The connected EV charging station for smarter charging

EVlink charging stations are easy to use, tough, intelligent and universal. They are suitable for daily use and compatible with all type 1 and type 2 electric vehicles for public parking, corporate EV fleets, commercial private or residential areas.

EVlink Parking and Smart Wallbox offer energy metering capabilities plus the connectivity you need to ensure user authentication, generate reports and perform remote maintenance. Easily connect your EVlink charging station to the EcoStruxure™ cloud platform and generate energy management reports or allocate costs to individual users.

Everything you need to make EV charging easier than ever to manage! With EVlink, easily find the charging infrastructure that suits you whether you are a private user or a professional.

NEW – Fully compatible with Chargefox payment and management platform
