Easy and fast way to make commissioning and testing with mobile devices

EcoStruxure Fire Expert Commissioning and Testing license brings valuable benefits to fire alarm system commissioning and testing processes. Commissioning and Testing license combined with System View license streamline the process, optimize efficiency in your business and realize time savings of up to 50%.

EcoStruxure Fire Expert let users to test fire devices and view results as displayed on the Esmi Sense FDP fire panel with a mobile device. This makes possible testing with only one technician on site. Traditionally testing requires two technicians on the site. The risk of unwanted actions reduces and safety improves with possibility to test controls one by one with mobile device under the detector. Required modifications can also be made immediately. With Fire Expert testing will happen less time consuming and a single user can do it faster than two users done the traditional way

Commissioning and testing license features

With Commissioning & Testing license (FFS00704004) user can disable or enable components from the zone or loop. User may also disable or enable fire zone and timer is available to disable for a specific time period. Furthermore, user can check the status before enabling address or zone. Additionally, the license has also Simulated Alarms and Reset feature available. You can do your zone tests easily by activating the test mode and reset quickly by only tapping a mobile device.

Commissioning and testing cannot be easier!
