

New SMS Alarm System for Data Centers cuts response time to seconds.

Receive alerts on your mobile device.

In the age of 24/7 connectivity, data center reliability is crucial for maintaining uptime and staying ahead of the competition. That is why you need to know about any unusual events immediately, so you can respond quickly before a critical failure occurs.

The new SMS Alarm System by Schneider Electric offers you that capability, providing near-instant text message alerts to you and other pre-defined personnel. The solution is easy and quick to install, offers a compact footprint, and requires minimal maintenance, allowing you to focus on more pressing tasks.

THE SCHNEIDER ELECTRIC SMS ALARM SOLUTION BOOSTS SYSTEM RELIABILITY BY:

- Improving response speed with near-instant alerts sent to mobile devices
- Streamlining response by alerting only the right people
- Adding alarm redundancy with additional SMS modules
- Integrating seamlessly with most Web service-capable Building Management System (BMS)
- Installing quickly in new or existing systems with plug-and-play architecture

KEY FEATURES INCLUDE:

- User-defined alarm polling intervals that optimize bandwidth
- Full-package option including software, SMS-module, and monthly network provider costs
- Setup that can be led by Schneider Electric™ specialists or your personnel
- Architecture independent of external internet connections
