

Miluz – to the
rhythm of life
For a safe and easy installation

Life Is n

To the rhythm and energy that inspire your work

Miluz is the new modular wiring device range from Schneider Electric that matches all aspects of your customers' daily routines.

Easy to install, Miluz products are based on a contemporary design, are fully functional, highly reliable and resistant. Available in the design versions Bossa, Salsa and Jazz, the Miluz product range offers attractive features such

as dimmers, movement detectors and USB chargers. The modern Miluz design comes in several aesthetic finishes, in different colors that satisfy all customer needs, offering a maximum of flexibility and a wide range of functions.

iF Design Award

The Miluz modular switch range was recognised with the prestigious iF Design Award, Discipline Product thanks to its practical, attractive design and functionality. This recognition provides your customers with a compelling argument for choosing products of outstanding design quality and functionality.

To the rhythm of practicality

Miluz is the new modular wiring device range from Schneider Electric that matches all your customers' needs. It provides maximum flexibility and ensures a quick and easy installation.

Modular flexibility

The modular concept of Miluz products equips your customers with the ultimate in flexibility, allowing a combination of functions. Up to three functions can be operated from one plate, according to your customers' specific requirements.

Plate for 1 module

Plate for 2 modules

Plate for 3 modules

Blind plate

Quick and easy cleaning

Miluz brings you customer-friendly products that are designed to make life easier to manage. Cleaning is made simple thanks to the glossy finish with smooth curves, rendering a brilliant and bright aspect at all times.

Versatility and functionality

Miluz offers versatile features such as USB chargers, movement detectors, and dimmers, delivering the ultimate in comfort, flexibility and energy efficiency for your customers.

Movement detector

Movement detectors automatically switch on a light as soon as motion is detected. The light will automatically switch off again after a predefined time. Movement detectors also help to minimise the risk of accidents, and at the same time increase energy efficiency.

USB charger

USB chargers allow electronic devices such as smartphones and tablets to be charged quickly. And because the charger is plate-mounted, your customer always knows where to find it.

Light dimmer

Light dimmers give homeowners full user-control over light brightness levels, depending on need and mood. Furthermore, this function helps to minimize the overall energy consumption.

Buzzer

A buzzer fits seamlessly into the Miluz interface, offering a discreet finish and ensuring that your buzzer alert is placed in the optimal location.

Fan control

Fan control means that you can now vary the velocity of the fans at the turn of a switch. Miluz has designed this functionality to increase comfort as well as save energy.

Socket with Child-protection

Miluz offers safety with sockets that protect against accidental contact, thanks to the integrated, enhanced contact-protection feature.

Duplex socket

Two sockets are combined in one plate.

GFCI socket (shock protection)

GFCI (Ground Fault Circuit Interrupter) sockets shut off an electric power circuit when they detect electrical current that is flowing along an unintended path.

RJ11 connector

RJ11 is a telephone connection standard that offers the ultimate for a high-performance connection.

RJ45 connector

RJ45 (Cat 5) is a data socket connector offering a reliable and fast data connection for voice, image and data.

Matching your customer requirements

Meeting all your customer requirements, Miluz offers beautiful finishes in various colors, giving a touch of class to environments, providing maximum flexibility and numerous combinations

for you to customise your customers' decoration. In addition to white, Miluz proposes a number of plate finishes and color options.

Miluz Bossa

Miluz Bossa is available in white only, for a classic, yet discreet finish.

Miluz Salsa

Miluz Salsa has a silver, gold and brown finish, evoking passion, energy and inspiration.

Miluz Jazz

Miluz Jazz comes in a bronze finish and permeates joy, elegance and prestige.

Easy mounting

The Miluz range is designed with quick and safe installation in mind. The 4" x 2" assembled products option cuts the number of required installer operations, thus reducing installation time.

Innovative assembly system

The Oblong System allows the installer to adjust the fixing frame with the bolts already screwed on, aligning them correctly to the installation of the cover plate so it is perfectly aligned to the wall. Installation is made even easier thanks to the fixing frame which is compatible with different types of installation boxes.

Optimised Screws

Miluz products come with screws that are optimized to fit to different kind of wall mounting. This ensures that Miluz components are installed with full assurance that the fitting is strong and reliable.

Plate fitting made easy

The gradual fixing frame system makes installation simple, ensuring a quick and easy mounting of the plate to the wall, providing the perfect finish.

Removable plate

Makes for a simple removal of the cover plate from the fixing frame hole. Using a screwdriver, plates can be removed quickly, safely and without any damage to the product or the wall.

Safe assembly

Installation is made safe and easy thanks to a simple cable fixing process, with clear marker indications and easy access to the screws.

Cable stripping guide

Product template makes cable stripping easy and precise, ensuring a secure installation.

Clear markings

Terminals within the module are clearly marked, making the wiring process simple to follow.

Open screws

Screws are delivered open and can be simply tightened making installation time extremely quick with most screwdrivers.

Screw connection

An innovative cable connection through the screws makes mounting extremely robust. Furthermore, double access connectors simplify connection of multiple sockets.

Module connection from the front

Once wiring is complete, the modules can be easily fitted from the front and then mounted onto the plate. This minimizes the risk of damaging the design element.

Toolless RJ45

The RJ45 connector can be installed toolless. Simply insert the cable into the U-shaped cable entry, then close the bridge to lock the cable into place, ensuring 360° earthing. Finally, shut the connector.

Sustainable

Safety and beauty in one

Miluz ensures complete peace of mind for your customers, with products that have been developed taking into account the culture of regions, and in accordance with the strictest local safety standards.

Designed with safety in mind

Subjected to extreme strength and resilience tests, Miluz offers high-quality, robust products that come with a long-lasting design. Thanks to their safety design, all socket-outlets are childproof and safe.

Certifications

Miluz products are compliant with local safety standards.
