

Enhance installation safety and performances with MP4-1 services

Get a plant-wide electrical assessment

MP4-1 services gives you a vision of your installation, so you can:

- **Increase safety**
and reduce electrical risk levels
- **Predict failure**
and act before they happen
- **Replicate**
some or all recommendations at other sites

An assessment focused on equipment and network status

- Safety concerns
- Equipment status
- Findings
- Modernisation inputs
- Obsolescence
- Spare parts analysis

MP4-1 improvement plan shows you the way

Increase the performance of your installation

An MP4-1 assessment delivers a detailed improvement plan, as well as a summary of critical safety issues.

Example of recommendations & deliverables

- > List of equipment at the end of its service life and proposal for available retrofit solutions
- > Advice on improving installation performance
- > Suggestions on how to adapt your installation to meet new business requirements
- > Incorrect breaking capacities
- > Absence of interlocking devices
- > Insufficient personnel protection
- > Unprotected access to live parts .../...

If you want a complete installation assessment > Refer to MP4 services

(Maintenance, Modernisation, Monitoring, Management Plans)
