

APC offers you an easy way to deploy IT in edge environments

Standardization

- Deploy distributed IT infrastructure in a quick and easy way with configurable solutions and selector tools

Remote Management

- Optimize your Edge Computing sites and limit downtime by simplifying the monitoring and servicing of your physical infrastructure

Security

- Guard Edge sites from potential threats with robust cybersecurity capabilities and physical security, surveillance & environmental monitoring solutions.

Edge computing for Healthcare

665TB

Average amount of data each hospital generates

20-40%

Growth rate of medical imaging archives

\$1M per day

Average cost of unplanned power outages in healthcare

APC edge solutions increase safety, reliability, comfort & improve healthcare facilities' financial health by providing power and data availability in these environments & applications:

- IT server rooms and network closets in hospitals
- Medical lab equipment
- Distributed health clinics
- Digital health records

Edge computing for Education

Digital Citizens

98% of 17 to 25-years-olds own a smart mobile device

Personalized

learning via on-line assessments, classes & AR/VR

IoT

for next generation technology-enabled campus

APC edge solutions enable education institutions to deploy and operate IT effectively and facilitate uninterrupted digital learning experiences in these environments & applications

- IT server rooms and network closets in educational institutions
- Classroom and computer lab data availability
- Back office and administration power & data availability

Life Is On

*Available for pre-integration of accessories UPS, RPDU, etc. Request pre-integration in Local Edge Configurator design tool in the Schneider Electric Design Portal. All equipment pre-installed in rack at Schneider Electric factory prior to shipment to end user site or system integrator for IT integration.

** Rack is shipped unassembled and must be assembled on site.

Deploy Faster with Standardization and Factory Pre-integration Services

For eligible racks simply request factory pre-integration in Local Edge Configurator and pre-install at the factory prior to shipment to site or a system integrator for IT integration. Pre-integration services provide:

For partners:

- Track one package/part number—arrives complete
- APC parts occupy less warehouse space
- Ready for “rack and stack”- spend less time on racks & more time on IT

For end-users:

- Requires no onsite “rack and stack” staging space
- Spend less time/money on unboxing, installation, setup & waste disposal
- More sustainable with less packaging waste

Pre-integrated rack AR106V with pre-installed UPS, PDU, NetBotz shipped in shock packaging

Next Steps:

1. Visit apc.com and add a rack to cart then [Complete Your Solution](#) with UPS, NetBotz, and other rack accessories.
2. Contact a partner for a complete standardized and integrated solution with Local Edge Configurator.
