KQ Distribution Boards

An extensive range of ready-to-install distribution boards

Acti9 Active Safety System

Best-in-class connectivity in a simplified form

Wireless connection with the gateway

Digitally enabled miniature breaker

No add-ons required, in-built connectivity

Easy integration with EcoStruxure or BMS systems

Fast installation

Commercial and industrial applications

All-in-one protection in a single 36mm device

Advanced visibility

Alarms & pre-warnings

Measuring & remote monitoring

Diagnosable & analytics

Advanced protection

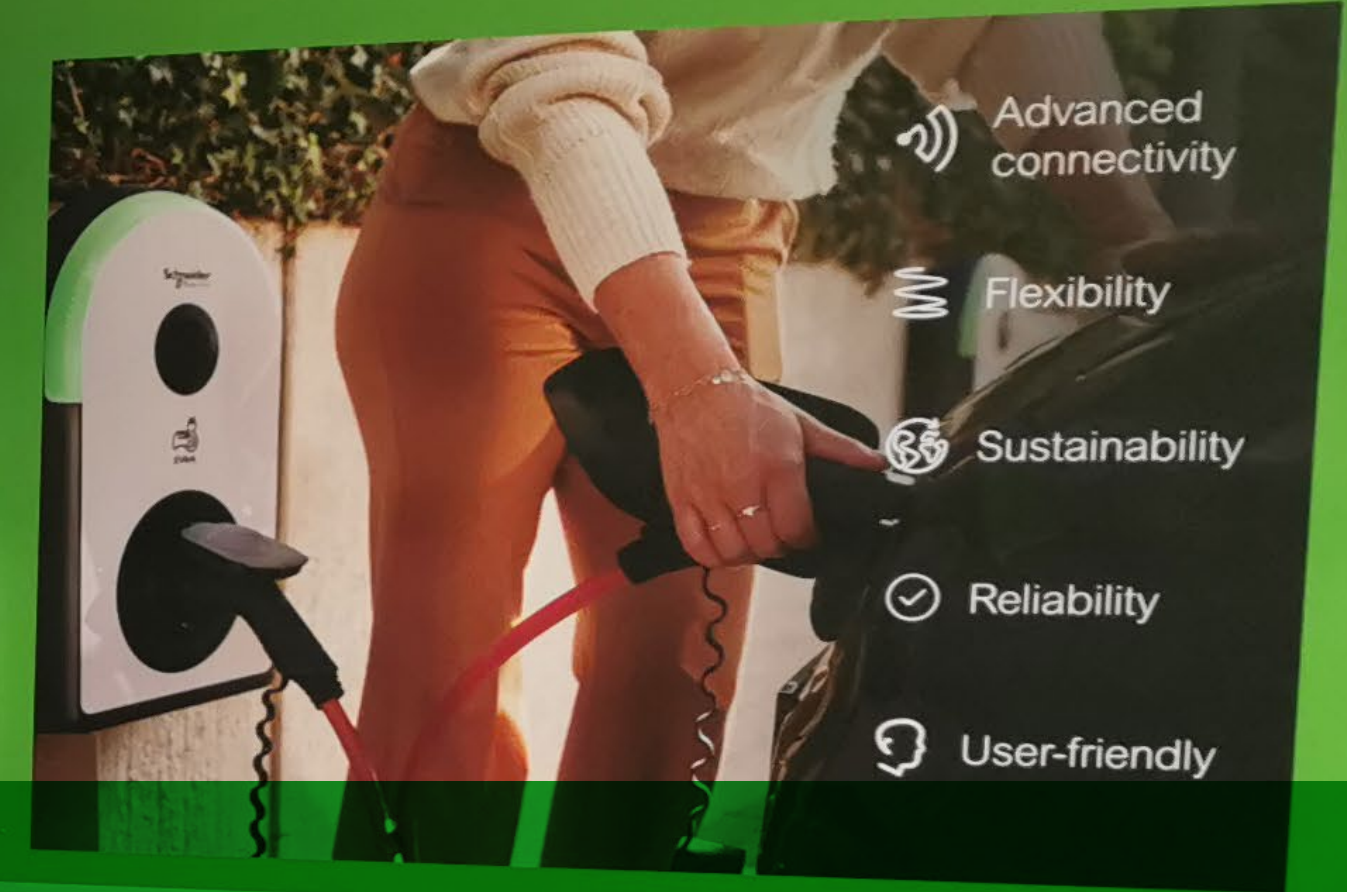

Panel Server Gateway

EcoStruxure Energy Hub

Life Is On | Schneider Electric

EVlink Pro AC commercial chargers

Easy to install, operate, monitor, and maintain through digital capabilities and reinforced safety

- Advanced connectivity
- Flexibility
- Sustainability
- Reliability
- User-friendly

Models available

7.4 kW

22 kW

Applications

- At home: Residential multi-family buildings
- At work: Industrial and office buildings
- At destination: Commercial buildings
- At fleets: Corporate fleet or fleet depot

Paint the Branches Green

Impactful merchandising solutions for your trade counter

Life Is On |

Schneider Electric

Let's transform, let's grow greener

Paint the Branches Green is the new POS merchandising solution from Schneider Electric, available for electrical wholesale partners that purchase from our premium range offers.

'Point of sale' or 'POS merchandising' refers to any effort to increase sales at the point of purchase. In some exceptional cases, POS merchandising has been shown to increase retail sales by 445%¹.

The solutions we offer as part of this service are designed to be as flexible as possible based on the Schneider Electric stock you hold, whilst keeping the process as simple as possible and requiring as little time as possible on your end.

- 7.4 kW
- 22 kW

Applications

- At home: Residential multi-family buildings
- At work: Industrial and office buildings
- At destination: Commercial buildings
- At fleets: Corporate fleet or fleet depot

What our service is/how to get it

What is it?

Simply put, Paint the Branches Green is a service where Schneider Electric will print and install highly impactful and informative POS displays within your branch that are relevant to the Schneider Electric offers you stock and sell.

The best part? There is no additional cost to participating branches for this service!

How do I get it?

The first step is to contact your local Schneider Electric sales manager to see if your branch is eligible.

To qualify, as a minimum you will need to hold Project or Industry Authorised Distributor status on one or more of our premium offers (listed below).

Premium offers (click to find out more):

Acti9

EVlink Pro AC

Canalis Busbar

What our service is/how to get it

I'm eligible, what happens after I register interest?

If you are eligible, you will be visited by a Schneider Electric representative to discuss the space available for the install. If your space is safe and suitable, you will be able to select what combination of displays you would like us to install for you.

After you have chosen what display options you'd like installed, we will schedule a survey by our installer and they will provide a layout of the proposed display area. Once that has been approved an install date will be arranged for the earliest opportunity. Please note that this can take up to 6-8 weeks, depending on available materials for the POS and other installs booked in around the same time.

What happens after everything is installed?

We will keep in touch to ensure you remain satisfied with your POS display.

Our solutions are designed to be interchangeable, so if a design is updated (with a new/upgraded offer, for example) we will be able to seamlessly replace any displays that become outdated.

These displays are installed by experts, so you can trust that they will be fixed safely and efficiently. However, we are always at hand should anything become broken or damaged.

What display options are available?

The majority of the display options are built to be mounted to slatwall structures. If your branch does not have slatwalls installed in the space available, we may be able to install those for you depending on your requirement.

Your slatwall will have green vinyl applied to them by our installer before the POS panels are installed.

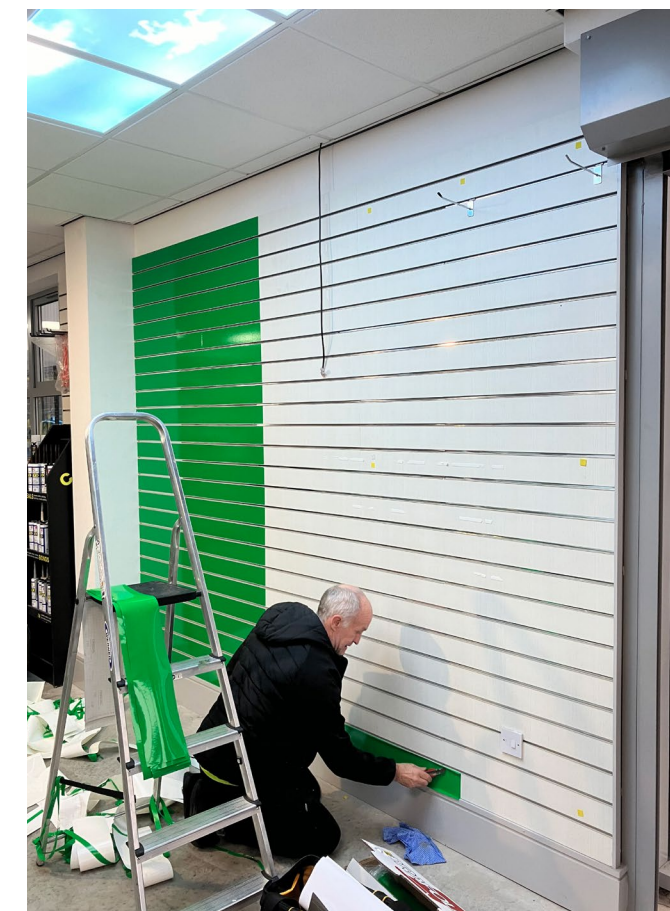

The offer-focused displays include a mix of flat graphics and installed product (these are not powered).

Life Is On | Schneider Electric

KQ Distribution Boards

An extensive range of ready-to-install distribution boards

Physical KQ Board

Type A Single phase – 125A

Type B Three phase – 250A

Fast and easy installation

- Plug-on features allow for quick fitting of outgoing devices
- Fewer terminals to torque test and reduced maintenance
- Modular scalable enclosure systems
- Metering options

Safe

- IP2x finger safe busbar assembly with non-removable insulating barriers

iKQ RCBO

- B and C curve
- RCD Type A as standard
- Breaking capacity 10kA
- Padlocking device
- Will trip even if neutral is lost
- Tripped fault indication
- Insulated shuttered terminals

iKQ MCB

- Breaking capacity 10kA
- Padlocking device
- Tripped fault indication
- Insulated shuttered terminals

Canalis (25A to 1000A)

A comprehensive and consistent busbar trunking system for lighting and power distribution in all types of buildings

Canalis KBA and KBE: busbar trunking for lighting and low power loads up to 40A

- Run components
- Feed units and covers
- Fixing system and cable trays
- Connectors

Canalis KN: prefabricated busbar trunking for low power distribution from 40A to 160A. Tap-off units rated current: 16A to 63A

- Feed units and covers
- Run components
- Changing direction
- Fixing system
- Tap-off units

Canalis KS: Busbar trunking for medium power distribution 1000A with high tap-off densities in industrial and commercial buildings

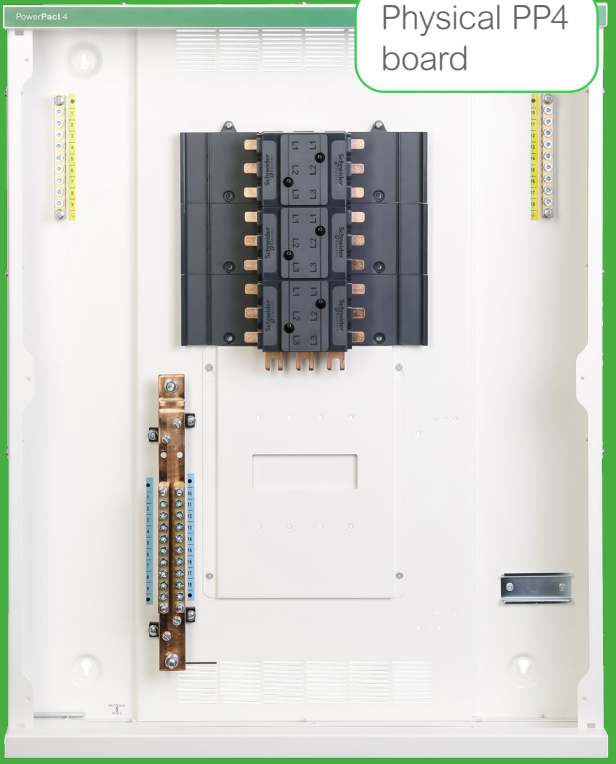

- Feed units and covers
- Straight lengths
- Change direction elements
- Fixing system
- Tap-off units

PowerPact 4 Compact NSXm Powerboard

A new design with more unique features to enhance your electrical distribution system

Physical PP4 board

Up to 250A

Convenient installation

- Top or bottom
- Cable entry
- Metering
- Cable extensions
- Removable door and cover handles
- Flatbone structure
- Side gland plates

Safe and reliable

- Manufactured and tested to BS EN 61439-1
- Integral surge protection kit with viewing cut-out

Compact, premium design

- Updated Schneider signature and styling design
- Slim profile board
- Provides additional outgoing ways without occupying the space required by alternative boards

Powerboard available in 6, 8, and 12 triple-pole outgoing ways

NSXm Incomer (Up to 250A) | NSXm Outgoing devices (Up to 160A)
