Schneider Electric
Global specialist in energy management

At Schneider Electric, we pride ourselves on building all our products to the highest specification, ensuring you meet and exceed all relevant international and British standards and comply with regulations and legislation.

With expertise across all markets, from energy, infrastructure and industrial processes, to building automation, and data centres, we can deliver solutions to meet individual customers’ needs. And with a comprehensive range of products and services, you can count on us to deliver the goods.

We are moving into the future as one Schneider Electric, and integrating many of our market leading brands. This will make it easier to see our brand more clearly - a reinforcement of the peace of mind, confidence and trust you get from Schneider Electric. Working as one Schneider Electric also makes it clearer that our ranges are highly compatible for integrated solutions.

Make the most of your energy\textsuperscript{SM}

Going beyond standard solutions
Schneider Electric can provide integrated energy management solutions for the whole energy equation, providing customers with a reliable and efficient energy supply.

Customers can take advantage of emerging technologies that provide solutions for the distribution, protection, control and management of electrical systems. So you will benefit from superior environmental performance, improved maintenance as well as optimised assets and lower utility bills.

Our solutions aim to make energy:

- **Green**
  - Make the connection of renewable energy sources easy, reliable and cost effective
- **Efficient & productive**
  - Measure and control energy, automate, provide relevant diagnosis
  - Manage processes
  - Make all the utilities of any infrastructure more efficient
- **Reliable**
  - Prevent from power outage & quality variance
- **Safe**
  - Protect people and assets
  - Transform and distribute power safely

Electrical distribution
- Medium Voltage
- Low Voltage
- Life space

Automation & control
- Process and machine control
- Motor control
- HVAC control

Building management
- Security
- Energy management & control
- Fire

Critical power & cooling
- Cooling solutions
- Uninterruptible power supplies (UPS)
Schneider Electric offers energy management solutions across multiple sectors, including utilities, transportation, business, and more. Our solutions are designed to provide energy-efficient environments, improve safety, and reliably manage systems and innovative cooling solutions. We offer a comprehensive range of services, including power optimization, asset management, and energy management services, helping customers make the most of their energy and reduce their carbon footprint. Our solutions span critical power, HVAC, building management, and energy services, ensuring customers can operate sustainably and efficiently.

Key ranges include:
- Critical Power - UPS
- Critical Power - Generators
- Industrial Power - Power Transformers
- Critical Power - Power Networks
- Coolant Management
- Critical Power - Cables
- Electrical Management
- Air Management
- Fluid Management
- Dynamic and Static Load
- VFDs and drives
-ე.გ. თავმჯდომარე

Our capabilities and experience in every sector enable us to provide tailored solutions for businesses of all sizes, from small to large enterprises. Our comprehensive service portfolio includes:
- Energy audits
- Energy optimisation and asset management
- Carbon reduction projects
- Culture change programmes
- Remote energy management
- Monitoring & targeting systems
- Energy audits
- Training
- Installation & Commissioning
- Maintenance
- Spares
- Support contracts
- Installed Base
- Services
- Energy management services

We provide a quick reference guide identifying the scope of energy management services and solutions whether in data centres, commercial buildings, or industrial plants. Our solutions include:
- Lighting control
- Access Control
- HVAC Control
- Fire detection
- Integrated security
- Building management systems
- Building Automation & Management
- Safety Devices
- Automation controllers
- Detection devices
- Drives & Motion
- Motor Control & Protection
- Control & Signalling
- LV Switchboards
- Distribution Boards & Panelboards
- Moulded case & Air Circuit breakers
- Protection relays
- Secondary switchgear
- Medium Voltage (Up to 33kV)
- Smart Grid
- Energy Management
- Critical Power - UPS
- Critical Power - Generators
- Industrial Power - Power Transformers
- Critical Power - Power Networks
- Coolant Management
- Critical Power - Cables
- Electrical Management
- Air Management
- Fluid Management
- Dynamic and Static Load
- VFDs and drives
