

Electrical Distribution Field Services

Protect your assets

Life Is On

● Optimize

Enhance electrical equipment safety and reliability with an MP Scan assessment

The easiest way to prevent down time events and unforeseen complications is to understand the life cycle and condition of critical assets, employ effective maintenance practices, and to intelligently upgrade equipment.

Our Offer: MP Scan audit

MP Scan is a light, non-intrusive “walk through” audit of your installed base of electrical distribution equipment.

The aim of the audit is to assess its:

-  Visual State
-  Maintenance State
-  Obsolescence State
-  Safety and Regulatory Compliance

Within one to two weeks of your site assessment, a final report will be presented by your Schneider Electric sales contact.

Benefits

Regulations & safety

- Identifies areas of risk
- Ensures compliance with safety regulations

Life cycle & maintenance

- Prevents deterioration of the electrical installation over time
- Creates a long-term plan for addressing obsolescence
- Surveys the environment of electrical substations

- Operate

The quickest and easiest way to assess the condition of your electrical distribution installed base

Our offer

Visual State

Inspect and document that the overall state of the equipment and its environment are within specified operating conditions including but not limited to room temperature, airflow, dust contamination, deterioration, etc.

Maintenance State

Inspect and document that the type and frequency of equipment maintenance operations are within specified operating conditions including but not limited to testing, cleaning, etc

Obsolescence State

Inspect and document the equipment's life-cycle / duty cycle status as well as the associated marketing and spare part guarantee periods and modernization plan(s).

Regulatory Compliance

Inspect and document safety risks as well as verify and document that the electrical distribution equipment and its environment is in compliance with all local, state, and/or federal electrical safety regulations.
