

Improve your team's skills in electrical safety and installation management

Benefits

- Get a competency overview with our Digital Campus
- Test and train your staff with our e-learning
- Plan post-test preventive actions (i.e. face-to-face training course) or competency management

Changing mindset and behavior is much easier said than done... It is especially true and critical for electrical safety!

Your electrical and non-electrical staff need to have the right level of competency to:

- Protect them & mitigate risk of accident
- Reduce the risk of downtime & damages
- Enhance on site technical skill & level of protection
- Save time & cost

Peace of mind: your team is safer

When electrical installation efficiency is key, technical training is one of the solutions to improve electrical or non-electrical staff performance and protection.

Our e-Learning offer

- For electrical personnel:**

 - Electrical Risk prevention**

 - To know and understand electrical risk.
 - To reduce electrical risk: Guidance on the wearing of protective equipment, operating mode and use of appropriate tools.
 - To understand the lock-out /tag- out safety procedure.
 - Arc Flash prevention**

video game to practice in a virtual environment

 - Based on NFPA 70 standard.
 - Understand what causes Arc flash and how to react.
 - Understand and apply the standard.
 - Electrical Emergency management**

video game to practice in a virtual environment

 - How to behave before, during and after an electrical crisis.
 - Communicate effectively.
 - Get ready to operate and maintain your Masterpact MTZ**

 - To make the most of the new Masterpact MTZ digital functions.
- For non-electrical personnel:**

 - Electrical Safety in the workplace**

 - To recognise danger, avoid and report it.
 - To behave properly in daily work.
 - To behave appropriately in case of an electrical incident.
- For both learners:**

 - Electrical distribution fundamentals**

 - Understand the Grid & its functioning.
 - Discover primary and secondary substation.

Please [contact your local training center](#) to organise face to face training either at a [Schneider Electricity training center](#) or at your site!
