XIGHTOR

Schneider
Electric

Your home is more than four walls; it is a living, breathing space.
The sanctuary where your journey unfolds and evolves.
A place for every mood and any occasion.
Your home is full of life, love, laughter, family, friends and fun.
We help adapt your home to the rhythm of your life.
We provide ingeniously designed solutions to enhance your life.
We create technology that brings your home to life.

Life Is 
by Schneider Electric™

In sight for your security,
in style for your home.

Your home is your sanctuary. However, safety and security are of paramount importance to give you the peace of mind to enjoy it fully, and it starts at your front door, the lobby or even at the garden gate. Xightor Pro's Entrance Control System acts as a goalkeeper. It offers safe and easy monitoring and communication with any visitor before you open the door at the touch of a button.

Not all systems are the same. If you want your property to be desirable and secure, Xightor Pro's Entrance Control System is the answer. It includes an indoor video door phone with a touchscreen, which gives a stylish touch to home design, a weatherproof outdoor station and management software.

Xightor Pro adds style and security to your property.

EASY
TO INSTALL

Easier, faster and seamless wall installation

A flat, flush-mount installation design ensures no protrusion rack is needed for wall installation. Unlike other models, the Xightor Pro touchscreen video door phone can be positioned seamlessly.

The standard 86mm x 86mm wall box allows for convenient installation – no special wall box is needed – and the backbone is in place for flexible future upgrades when necessary.

EASY
TO USE

Direct and secure connection

An IP-based connection using Category 5e cables facilitates faster and more stable video and audio signals. Unlike the 2-wire connection of a traditional analog device, this can save wiring costs and time via faster installation and commissioning.

IP auto-matching enables faster programming and setup. The user only needs to input the building address and apartment number into the Xightor Pro touchscreen video door phone. The IP address will then automatically match the built-in IP configuration table.

Featuring plug and play connectivity, the system is installable by almost anyone via simple Phoenix connectors. The installer wires up the slave connectors and plugs them into the master connectors on the motherboard.

Fully Scalable

With connection for up to 20,000 IP devices, the system supports large, collective building developments and allows flexibility for future expansion. Traditional analog video door phones only support around 500 connections.

EASY
TO EXPAND

An extensive range of possibilities

With the additional RS232 interface / IP gateway, the system can connect with KNX, C-BUS and ULTI EZinstall3 to enable one-touch scene control through the Xightor Pro touchscreen video door phone without the need for an extra touchscreen control panel.

The status of individual lights and curtains can be noted and changed via the Xightor Pro touchscreen video door phone. With an additional TC303 thermostat, you can also adjust the temperature of your air-conditioning.

The Xightor Pro offers flexibility for future upgrades either by IP connection or built-in SD card slot.

Xightor Pro will also give you greater peace of mind in your daily living.

As well as using your door camera to monitor your front door or lobby, you can add an additional IP camera anywhere you want to strengthen security such as in the garden or on a balcony. By connecting Xightor Pro to an occupancy sensor or intruder alarm means the system will immediately send an alarm log to your lobby guard in the event of the alarm being triggered.

EASY
TO BE IN-STYLE

Style in sight

Inspired by the award-winning ZENcelo full-flat switch, the Xightor Pro touchscreen video door phone maintains the same design excellence. Its full-flat surface adds a stylish touch to your interior and is consistent with the ZENcelo range of switches and sockets.

Customisable frames with graphic design

In addition to standard fascias including timeless white, matt bronze, matt silver and more, customisable frame designs are also available to match your home's interior design and architecture.

MOBILE APPLICATION

At home or on the go

The Xightor Pro video door phone mobile app makes managing your home security easier than ever no matter where you are.

Visitors to your home will be announced through the touchscreen video door phone or via the mobile app – even when you're not there. You can either open the door or arrange another meeting through the video intercom function on your mobile app.

Visitor call

If your home's intruder alarm is triggered, you will immediately receive an alert message via the new Xightor Pro mobile app. Forgot to turn on your alarm before going out? Worrying about it is now a thing of the past because you can enable and disable your alarm through your mobile app any time, anywhere.

General notices from your management office can also be directly sent to your mobile app.

The app can also act as an extra remote control for your home's touchscreen to control your favorite lighting scene in home.

Notice from management office

FUNCTION AND FEATURES

Xightor Pro is easy to install, easy to use and easy to expand, with an extensive range of functions and features.

Video door phone

Your personal touchscreen video door phone will be activated as soon as the buzzer on your front door or lobby station is pressed. Real-time video footage means you can view each visitor's image and talk to them before letting them in.

Photo recording

Your Xightor Pro touchscreen video door phone will automatically take a photo of any unanswered caller. Each touchscreen can save up to 32 photos and you can also check the photo record through the Xightor Pro mobile app.

Camera monitoring

You can keep an eye on your entrance via your door camera whenever you like. Additional IP cameras can be added and monitored by Xightor Pro touchscreen to enhance security levels.

Intrusion alarm

Xightor Pro can be easily connected to up to eight alarm sensors, including occupancy sensors, life safety sensors and door contacts, linked to the intruder alarm. If the alarm is triggered, a signal will be sent to the lobby guard as well as to your Xightor Pro video door phone mobile app.

Elevator control

Save waiting around for the elevator by calling it to your floor in advance through your Xightor Pro touchscreen.

Scene control

It's easy to expand and connect via KNX, C-BUS or ULTI EZinstall3 system to enjoy one touch scene control through the Xightor Pro touchscreen video door phone. You can easily set different moods for different occasions, be it a home theatre scene or a party scene.

Personalized ringtone and screen saver

You can personalise the ringtone on your touchscreen video door phone with your favourite songs and add a screen saver to reflect your own mood and style.

SYSTEM ARCHITECTURE

Collective residence

House

Door station

Xightor Pro is a comprehensive entrance control system, which includes a touchscreen video door phone as well as a door station for outdoor and lobby use.

Robust materials

The Xightor Pro door station is made of aluminium and stainless steel with highly durable anti-oxidation metal buttons.

IP54 weatherproof standard

With its IP54 weatherproof standard, the Xightor Pro is suitable for use in humid and harsh outdoor conditions.

Weak light compensation

Weak light compensation in the built-in camera means visitors' faces can be clearly seen even in the dark.

Access control enabled

With a corresponding IC card, it also supports access control in the lobby or at the entrance gate for extra security.
