PRODUCT MACROS FOR EPLAN 5. xx

Series: ICLA N065

Version: 1.0

Status: 08/2007

Number of pages:

5

Date	06.08.07
User.	CBA
Check.	09.08.07

LEGAL INFORMATION AND LIABILITY EXCLUSIONS

All details developed for this project are protected by copyright and are the intellectual property of the company.

Berger Lahr GmbH & Co.KG
Breslauer Straße 7
D-77933 Lahr

All information is provided with the best of intentions and to the best of our knowledge and belief.

We accept no liability for correctness or completeness of information.

We provide no guarantee for the use of product macros in the Eplan CAE System.

INFORMATION TO CHANGE THE LANGUAGE

1. Parameter->Project->Foreign languages->
expenditure sequence: D = german or E = english

2. Main menu->article->administration->Parameter->
Currency Language identification->
Article language identification: D = german / E = english

GENERAL INFORMATION

This product was created for EPLAN from version 5.60.
The functions contained in the macros are not available or only restrictedly available for EPLAN versions previous to 5.60!

REFERENCE! Because of the very many combination possibilities the user must replace the fields with X.
That is possible for the macros and the article datas.

PRODUCT STRUCTURE

This project is a macro project and contains EPLAN product macros belonging to Berger Lahr GmbH & Co.KG.

All EPLAN directories have been set to
...\EPLAN4\x\BERGER_LAHR*

DATA/FILES

Project:

...\EPLAN4\P\BERGER_LAHR\ICLAN065.P - Macro project + associated data

Standard files:

...\EPLAN4\N\BERGER_LAHR\

Macros:

...\EPLAN4\M\BERGER_LAHR\ICLAN065\ - Macros series ICLA N065

Article:

...\EPLAN4\L\BERGER_LAHR\ICLA\

...\EPLAN4\L\BERGER_LAHR\ICLAN065\ICLAN065_EN.XLS - MS-EXCEL article data

...\EPLAN4\L\BERGER_LAHR\ICLAN065\ICLAN065_EN.ASC - Eplan article import file english

INSTALLATION

All data (project, macros, article data, standardised data) can be read in using the EPLAN data backup / restore functions.

Article data can be imported to individual master article data:
EPLAN article management / data exchange / import / EPLAN-ASCII format

MACROS

Macro construction

The product macros have been created so that they are

- usable for all Eplan project types in addition to almost all Eplan parameter settings
- so that they are easily visually recognisable by the user, whereby the main focus is on the technical construction.

Macro functionalities

The product macros have been logically tested,

- they can be embedded in existing projects without causing logical errors (EPLAN-evaluation sequences).
- they are logically interlinked with one another and can be easily connected using the EPLAN "autoconnecting" function.
- they are cross-referenced with one another since some componentry is shown distributed over several pages.

ARTICLE MASTER DATA

Master article data has been created for all devices and componentry.

They are applicable to the in-system EPLAN article management and can be integrated into existing master article data.

This enables acceptance of the data in article management systems outside EPLAN (PPS).

In addition, article data types can be adapted very easily to the existing data.

Since the dimensions of devices and componentry are stored in the master article data, the EPLAN "mounting plate fittings" module can be used for macros.

The article number is located next to every device or component.
