TeSys Control Solutions

TeSys offers solutions for a variety of common control applications, including small to large loads, motor and non-motor loads, in various forms to meet customers specific needs. Basic solutions offer traditional approaches that meet compact, cost-effective, and large HP applications. TeSys also equips OEMs and System Integrators with EcoStruxure Machine connected product solutions that are IoT ready offers to help enhance the intelligence of machinery and equipment, helping to recognize and address potential issues before stoppage and decrease unplanned downtime.

Table 18.1: Solutions that enhance machine intelligence

	Solution 1 — TeSys™ island as group motor	Solution 2 — TeSys island with individual protection	Solution 3 — TeSys Ultra (Type E self-protected) using Multi-function trip unit & communication module or using pre-trip alarm function module	Solution 4 — TeSys T overload relay	Solution 5 — TeSys GV4PB, GV5PB, GV6PB with SDx Module
					
Best Practice Scenario	Ideal for <b>panels with multiple loads</b> . Single bus coupler serves as connection to PLC, manages logic and configuration for starters.	Ideal for <b>panels with multiple loads</b> . Single bus coupler serves as connection to PLC, manages logic and configuration for starters.	Ideal for <b>panels with one or two motors</b> . Each starter communicates directly to PLC.	Ideal for <b>larger HP</b> . Each overload relay communicates directly to PLC.	Ideal for adding intelligence using a <b>simple NO/NC pre-trip alarm contact</b> — Use of PLC to receive/interpret data not required.
Benefits	See load, device and system performance. Set alarms to anticipate maintenance and optimize performance.	See load, device and system performance. Set alarms to anticipate maintenance and optimize performance.	See load performance. Set alarms to anticipate maintenance and optimize performance.	See load performance. Set alarms to anticipate maintenance and optimize performance.	Pre-trip alarm NO/NC contact alerts prior to trip, enabling proactive actions to minimize downtime or alert operators
Circuit Protection	Circuit breaker or fuse protection group	Circuit breaker or fuse	TeSys Ultra (applied as Type E self protected), using advanced trip unit/function modules	Breaker or fuse	GV4PB, GV5PB, GV6PB
Motor Control	TeSys island load management system with or without TeSys Deca Manual Motor Controllers	TeSys island load management system		TeSys Deca or Giga contactors	TeSys Deca or Giga contactor
Motor Overload Protection				TeSys T overload relay	(included in GV*PB)
Load Types	Motor, resistive/non-inductive, isolation	Motor, resistive/non-inductive, isolation	Motor loads only	Motor loads only	Motor loads only
Max HP 480V	40 HP	40 HP	20 HP	500 HP (up to 810 amps)	450 HP (up to 520 amps)
SCCR	basic 5 kA up to high 50 kA (with GV)	high, to 100 kA	High, to 65 kA	Depends on configuration	Depends on configuration
Available data	Device status/performance Load performance including alarms Voltage, Energy & Power	Device status/performance Load performance including alarms Voltage, Energy & Power	Load performance including alarms	Load performance including alarms Voltage & Power	Pre-trip alarm (via NO/NC contact)
Communication	Ethernet IP, Modbus TCP, Profinet, Profibus	Ethernet IP, Modbus TCP, Profinet, Profibus	Modbus™, CANopen, DeviceNet™, Profibus™	Modbus™, CANopen, DeviceNet™, Profibus™, Ethernet/IP, and Modbus/TCP	None

**Table 18.2: Basic — Traditional motor control solution**

	Solution 1 — Two component solution		Solution 2 — Single component solution	Solution 3 — Group Motor solution	Solution 5 — Three component solution (Breaker/fuse, contactor & overload relay)	Solution 6 — Type D solution (Motor circuit protector, contactor & overload relay)	Solution 7 — Non-motor load solution (Breaker/fuse + contactor)	
	Type F — up to 65 amps	Motor Protective Circuit Breakers + contactor - up to 520 amps	Type E — up to 32 amps	up to 65 amps				
								
Best Practice Scenario	Most cost effective, high SCCR solution		Most compact, also ideal for critical uptime applications resetable after a short-circuit with no component replacement), high SCCR solution	Few components, 480V delta rated	three-component solution, ideal for higher HPs or high SCCR	ideal for pumping applications, includes adjustable motor inrush sensitivity	ideal for non-motor loads	
Benefits	Simple, two-component solution, cost effective, fast power wiring using bus bars	Simple, two-component solution, cost effective for larger HP motors	Single component solution, Type 2 rated (minimize downtime after short-circuit)	cost effective solution ideal for panels with many motor loads (single breaker for multiple starters)	basic solution, ideal for 480V delta applications, resetable after breaker trip	adjustable motor inrush sensitivity, ideal for pumping applications	ideal for non-motor loads	
Circuit Protection	TeSys™ Deca GV2P, GV3P (applied as Type F with contactor)	TeSys™ Giga GV4PB, GV5PB, GV6PB (UL 489)	TeSys Ultra, with basic trip unit	PowerPact or Multi9 (UL 489) or fuses	PowerPact or Multi9 (UL 489) or TeSys DF, LS1 fuseholder, GS disconnect with fuses	TeSys BV4 (UL 489)	PowerPact or Multi9 (UL 489) or TeSys DF, LS1 fuseholder, GS disconnect with fuses	
Motor Control	Tesys Deca LC1D	TeSys Deca LC1D or Giga LC1G		TeSys Deca LC1D	TeSys Deca LC1D or TeSys Giga LC1G	TeSys Deca LC1D	TeSys Deca LC1D or TeSys Giga LC1G	
Motor Overload Protection	(included in GV)	(included in GV)		TeSys Deca GV	TeSys Deca LR or TeSys Giga LR9G	TeSys Deca LR	—	
Load Types	Motor loads only	Motor loads only	Motor loads only	Motor loads only	Motor loads only	Motor loads only	Resistive/non-inductive, isolation	

Two-Component Motor Circuit Solutions to 520 Amps

Simplify design, panel space and installation with TeSys™ high SCCR solution that use only two components that make up an entire branch circuit up to 520 amps. These two-component solutions are UL compliant using either a Type F combination motor controller rating or a UL 489 rating. For additional solutions and ratings, see Motor Control Solutions for North America data bulletin 8536DB0901.

18 CONTACTORS AND STARTERS-IEC

[1] Add coil suffix to complete reference part number (See Table 18.23 TeSys Deca Coil Voltage Codes , page 18-11 for LC1D and TeSys Giga Contactors — 3-Pole Standard Version, page 18-15 and Table 18.30 TeSys Giga Contactors — 3-Pole Advanced Version, page 18-15 for LC1F). For example, an LC1D09G7 includes a 120 Vac coil.  
 [2] Motor Full Load Amp Sizes are based on NEC Table 430.250.  
 [3] Requires use of GV1G09 or GV2GH7 line spacer for Type F rating. SCCR is 100 kA at 480Y with or without use of GV2G busbar links.  
 [4] Requires use of GV1G09 or GV2GH7 line spacer for Type F rating. SCCR is 42 kA at 480Y when using GV2G busbar links.  
 [5] Requires use of GV3G66 line spacer and GVAM11 short-circuit signaling contact for Type F rating.

**Island Concept**

TeSys island is an innovative digital load management solution—providing data for higher machine efficiency and ease of servicing, and allowing faster time to market.

TeSys island is a modular, multifunctional system providing integrated functions inside an automation architecture, primarily for the direct control and management of low-voltage loads. TeSys island can switch, help protect, and manage motors and other electrical loads up to 40 hp, 80 A installed in an electrical control Panel.

This system is designed around the concept of TeSys™ avatars.

These avatars:

- are the functional object representing a logical function of the physical module with pre-defined logic
- determine the configuration of the island.

The logical aspects of the island are managed with software tools, covering all phases of product and application lifecycle: design, engineering, commissioning, operation, and maintenance.

1	Bus Coupler	5	Power interface module
2	Analog I/O module	6	Standard Starter
3	Digital I/O module	7	SIL Starter
4	Voltage interface module	9	SIL interface module

The physical island consists of a set of devices installed on a single DIN rail controlling loads, monitoring data, diagnostics information and connected together with a ribbon cable providing the internal communication between modules.

The external communication with the automation environment is made via a single coupler module, and the island is seen as a single node on the network. The other modules include starters, power interface modules, analog and digital I/O modules, voltage interface modules, and SIL interface modules, covering a wide range of operational functions.

**Product References**

The TeSys island load management system consists of a bus coupler along with other starters and modules as needed to build an “island” of load management, monitoring & control functions. It is recommended to use the online EcoStruxure Motor Control Configurator to ensure proper application and sizing.

Scan here to access our online EcoStruxure Motor Control Configurator

TeSys™ Deca Non-Reversing Contactors

TeSys Deca Contactor

The TeSys™ Deca Control Series of contactors (formerly known as TeSys D) provides high reliability and performance in a modern, modular approach. TeSys Deca contactors are UL approved to 100 hp 480 V and 160 amperes continuous current. In addition, they provide a modern appearance with new features such as multi-standard screw terminals that accommodate flat, Phillips and Pozidriv screwdrivers, as well as the new UL60335 approved plastics with greater endurance in the presence of heat or fire.

[14] Includes mechanical interlock without electrical contacts. Installer to complete wiring for electronically interlocking contactor operating coils by using a N.C. auxiliary contact integrated in the contactor or optional LADN or LAD8N auxiliary contact block.  
 [15] Complete the catalog number by adding the coil voltage code from [Table 18.23 TeSys Deca Coil Voltage Codes](#), [page 18-11](#) (for example, LC2D09KUE).  
 [16] For additional terminal options and coil voltage/consumption options, see Catalog [MKTED210011EN](#). Check with local sales office for availability.  
 [17] Includes mechanical interlock (LA9D11502) with prewired electrical contacts for interlocking contactor operating coils.

**TeSys™ Giga Non-Reversing Contactors**

TeSys™ Giga Series is the newest motor control range for large motor and large load applications. This new offering brings greater performance, panel design optimization, and enhanced ease of installation.

TeSys Giga contactors are available in 115 to 800 amperes in both 3-pole and 4-pole configurations. Designers can choose between the standard version and an advanced version. The advanced version provides additional features such as additional coil voltages, lower coil consumption, PLC input control, and a cable memory feature that permits maintenance without removing cables or busbar connections. For lug options, see [Table 18.59 Lugs and Mounting for TeSys™ Giga Contactors and Overload Relays](#), page 18-24.

### TeSys™ Giga Overload Relays

TeSys™ Giga electronic overload relays provide wide protection flexibility in a limited number of references that cover up to 630 amperes. Alarm and status LEDs inform users in real time. Ground fault, phase imbalance, trip class (5E, 10E, 20E, 30E), and reset type can easily be configured on the device. Units can be directly mounted to the TeSys Giga contactors or can be individually wired.

Coil Part Number (Order Separately) DC			
24 V	—	—	—

[21] Complete the catalog number by adding the coil voltage code from Table 18.34 TeSys F Coil Voltage Codes

[21] For additional pole options and coil voltage options, see Catalog . Check with local sales office for availability.

[21] For additional pole options and coil voltage options, see Catalog . Check with local sales office for availability. , page 18-17 (for example, LC1F265G7), or order the contactor (without a coil) and the coil separately. All coils except F780 include 1 N.O. holding circuit interlock contact. The F780 uses two coils that must be wired in series.

[22] For additional pole options and coil voltage options, see Catalog MKTED210011EN. Check with local sales office for availability.

[23] LC1F780 contactors operate with 2 coils as a set. The LX1FX\* part number includes both coils.

[24] Order 2 coils and connect them in series.

TeSys™ K Contactors

1	1	On de-energization (off-delay)	0.1 to 3 s [13]	LADR0	
			0.1 to 30 s	LADR2	
10 to 180 s	LADR4				

Table 18.43: Mechanical Latch Blocks with Manual or Electrical Unlatch (TeSys™ Deca only)

Front snap-on mounting onto	Application	Catalog Number [15]
LC•D09 to D65A	For silent operation and energy conservation	LAD6K10 [16][17]
LC1D80 to D150, LP1D80	For silent operation and energy conservation	LA6DK20 [16]

Table 18.44: Coil Voltage Codes for LAD6K/LA6DK Mechanical Latch Blocks

Volts	24	110/127	220/240
AC or DC	B	F	M

TeSys Deca contactors: TeSys™ Deca Non-Reversing Contactors, page 18-11 and TeSys™ Deca Reversing Contactors, page 18-14  
TeSys Deca overload relay accessories: page 18-28  
TeSys Deca replacement coils: page 18-43  
TeSys Deca dimensions: page 18-46 to page 18-58

[6] For low consumption coils (LC1D09–D38 only), only one front-mounted two-contact block allowed. No side-mounted contact blocks allowed.  
[7] For spring terminal versions of these blocks, add a 3 to the end of the catalog number (for example, LADN223). For slip-on versions, add 9 to the end of the catalog number (for example, LADN229).  
[8] Including 1 N.O. + 1 N.C. make-before break overlapping contacts.  
[9] This block cannot be added to the LC1D 09–D38 contactors; a maximum of 2 blocks can be mounted on the LC1D40A-LC1P/LP1D80 contactors only.  
[10] 1 block may be added to the left side of LC1D09–D38, AC coils only; only 1 block may be added to either side of the LC1D40A-D80 contactors, AC coils only. Cannot be installed on TeSys Deca contactors with DC coils.  
[11] Device supplied with 4 ground terminal points.  
[12] For spring terminal versions of these blocks, add a 3 to the end of the catalog number (for example, LADT23).  
[13] Scale range is expanded between 0.1 and 0.6 seconds on the dial for more accurate settings at the lower end of the range.  
[14] Switching time between the opening of the N.C. contact and the closing of the N.O. contact: 40 ms ± 15 ms.  
[15] To complete the catalog number, add the coil voltage code from Table 18.44. For additional voltage options, see Catalog MKTED210011EN. Check with local sales office for availability.  
[16] Does not include internal coil clearing contact.  
[17] Low consumption DC contactors (and relays) (code coil •L) are not compatible with the LAD6K10• mechanical latching blocks.

Red retrofit safety sticker	TeSys™ Ultra	10	LU9ET1S

[21] For additional voltage and accessory options, see Catalog MKTED210011EN. Check with local sales office for availability.

[22] Installing the suppressor into the cavity makes the electrical connection. Overall width of the contactor remains the same.

[23] For LC•D09–LC•D65A with DC or low consumption DC coils, 3–pole contactors are fitted with built-in bidirectional diode suppression as standard.

[24] Mounting at the top of the contactor on coil terminals A1 and A2.

[25] For 24 V operation, the contactor must be fitted with a 21 V coil: coil voltage code Z5 for 50 Hz; Z6 for 60 Hz; and ZD for DC.

[26] Adapter required for D09–D65A, see .

Flexible Terminal Extensions

Flexible connecting bars to connect TeSys Giga High power contactors with MCCBs mounted in the same plane and orientation. These bars can be used along with Advanced or Standard version contactors. They help to get a quick and easy connection between contactor and MCCB with saving in installation time.

Table 18.60: Flexible Terminal Extensions for MCCBs

[28] See [MKTED210011EN](#) for additional accessories.

LAG8N13

### Auxiliary Contact Modules

Auxiliary contacts give an indication of the contactor status. They can be used for remote visual signaling, alarming, electrical locking, relay activation, and others.

Each contactor is equipped with 1 NO (normally open) and 1 NC (normally closed) auxiliary contact block as standard.

#### Mechanically linked mirror contacts

The NC (normally closed) contact of the auxiliary contact block is a mirror contact in conformity to IEC 60947–5–1. It is mechanically linked to reliably represent the state of the main power contacts and wherever auxiliary contact state reliability is essential.

The NC contact of the auxiliary contact cannot be closed at the same time as a normally open power contact.

#### Contact module compatibility

TeSys™ Giga auxiliary contact module is compatible with a range of TeSys Giga contactors. Each TeSys Giga contactor can be equipped with up to four auxiliary contact modules.

**Table 18.61: Electrical Characteristics**

Characteristics	
Rated thermal current (A)	10
Minimum load	1 mA at 17 V DC
Contact reliability	Failure rate <10

### Retrofit Bases

- Suitable for 3-pole contactors
- Retrofit bases to replace similar ratings of TeSys™ F contactors with TeSys™ Giga contactors
- Enables quick and simple replacement in the existing installation
- Two references to cover ranges from LC1F115 to F500

TeSys™ Giga retrofit bases are designed for integrating new TeSys™ Giga contactors into installations using TeSys F™ contactors. The retrofit bases help reduce replacement and reinstallation time when you upgrade your system with the new range of contactors. The retrofit bases come in two frame sizes.

TeSys™ Ultra Motor Starter

The TeSys Ultra motor starter is integrated, making it simple to choose and install. It consists of a control unit snapped in a power base. TeSys Ultra can be configured to fit specific applications as well. Optional accessories include a reverser, a current limiter, predictive maintenance options, and communication options. For detailed information about TeSys Ultra, visit our website.

Table 18.85: Function Modules<sup>[13][15]</sup>

Module	Description	For use with:	Operation Requirements	Catalog Number
<b>Fault differentiation:</b> with manual reset (thermal overload) with auto reset	Provides indication between an overload trip and a short circuit trip.	Advanced control units only	24–250 Vac/Vdc (power from control unit)	LUFDA10
Thermal overload pre-alarm	Signals when the motor current reaches 1.05 of the full load setting on the control unit.	Advanced control units only	24–250 Vac/Vdc (power from control unit)	LUFW10
Motor load indication	Provides a signal proportional to the average currents in the three phases divided by the full load current setting of the control unit. The output corresponds to a load status of 0–2 times the full load setting of the control unit.	Advanced or multi-function control units	4–20 mA (requires separate 24 Vdc power supply)	LUFV2
Parallel wiring	Provides a convenient way to reduce control wiring and allow for connecting starters to a communications network by providing 24 Vdc for the starters.	Advanced or multi-function control units (24 Vdc only) and LU9BN11C or LU9MRC prewired connector	LU9G02 splitter box and PLC network	LUF00

[16] See page 18-31 for placement on the power base.  
 [17] Communication capabilities can be integrated into existing automation architecture via a variety of protocols.  
 [18] See Power Base and Plug-in Accessories, page 18-31

TeSys™ Power Motor Circuit Breakers

The TeSys™ Power Motor Circuit Breakers family of products provide efficient motor control and protection solutions up to 520 amps. There are a variety of UL approved applications that enable specified configurations for use as a manual starter, motor disconnect, independent branch short-circuit protection, motor overload protection, or for use with a motor controller such as a contactor to build a complete motor control circuit. Certain configurations are approved for group motor applications as well. Refer to the following selection tables for application information, as well as the Motor Control Solutions for the North American Market data bulletin (8536DB0901) for additional information.

The GV2P (up to 32 amps) and GV3P (up to 65 amps) is rated to UL 60947-4-1 as a motor starter, and also possess Type E ratings for manual switching applications. These devices can be combined with a specified TeSys Deca contactor as a Type F combination motor controller (with specified line side spacer/accessories), with SCCR up to 100kA.

The GV2ME (up to 32 amps) combined with a specified TeSys Deca contactor is ideal for group motor applications.

The TeSys island load management starters are approved for use with TeSys GV2P and GV3P devices as a group motor arrangement. See selection table for application specifics.

The GV4PB, GV5PB, and GV6PB are motor protective circuit breakers rated to UL 489, are approved as branch circuit protection (no line side spacer required) and include motor overload protection. A full motor branch circuit is completed with the addition of a contactor, providing a compact two-component solution up to 520 motor full load amps. Pre-trip alarm accessories can be applied to these units to help anticipate and resolve issues, minimizing operator or maintenance interaction.

**GV2P + LC1D Pre-Assembled Kits**

Simplify your life! These new **pre-assembled kits** come with a GV2P manual motor protector already connected to an LC1D contactor. Panel builders and end users can now save wiring time by purchasing the pre-assembled kits.

**Table 18.91: Pre-Assembled Kits** <sup>New!</sup>

TeSys™ BV4 Motor Circuit Protection Selection

Providing UL508 type D combination ratings in accordance to current NEC installation requirements, the TeSys BV4 motor circuit protector allows for compact motor protection in conjunction with both the TeSys and Square D™ NEMA product families for motor control. The BV4 is a magnetic only, UL489 Listed circuit protector rated up to 100kA short-circuit protect with adjustable instantaneous trip points and can be installed directly to a panel or standard DIN rail.

Motor Circuit Protectors must be applied per a listed combination motor controller rating as required by NEC and UL 508A. See [UL.com/SCCR](http://UL.com/SCCR) for combination ratings or contact local support for a tested combination appendix.

Common Accessories for BV4, GV4, GV5 and GV6

Common Accessories	BV4 Reference	GV4 Reference	GV5 Reference	GV6 Reference	
<b>Auxiliary contacts OF or SD</b>					
Open/Closed Status	GV4AE11	GV4AE11	GV7AE11	GV7AE11	
Trip Alarm	—	—	—	—	
Open/Closed Status — Low Level	—	—	GV7AB11	GV7AB11	
<b>Fault signalization modules</b>					
For <b>GV4PB</b> , SDx module mounts externally on the right side, and provides pre-trip alarm and fault signalization					
<ul style="list-style-type: none"> <li>SDT95% overload alarm: thermal image of the motor is greater than 95 % of the permissible temperature rise.</li> <li>SDTxxs overload alarm: circuit breaker will trip in xx seconds with the same load. xx is adjustable between 10 to 40 seconds (default 20 seconds) on the circuit breaker itself through NFC or a computer with EcoStruxure Power Commission software and an interface module (TRV00911).</li> <li>SDTAM overload alarm just before tripping: in the event of a phase unbalance, overload, or on a jam fault, this output is activated to open the contactor and avoid circuit breaker tripping. In that case, contact can be manually or automatically reseted after an adjustable cooling time from 1 to 15 minutes. If after a 400 ms delay the motor is not stopped, the circuit breaker will trip.</li> <li>SDT overload trip indication: circuit breaker has tripped due to an overload fault.</li> <li>SDJAM jam trip indication: circuit breaker has tripped due to a jam fault.</li> <li>SDUNB phase unbalance trip indication: circuit breaker has tripped due to an unbalance fault.</li> <li>SDLS long start trip indication: circuit breaker has tripped due to a long start fault.</li> <li>SDGF ground-fault trip indication: circuit breaker has tripped due to a ground-fault.</li> </ul>					
For <b>GV5PB</b> & <b>GV6PB</b> , SDx module mounts internally, and includes a pre-trip contact (400 ms prior to trip) that can be used to open the contactor, as well as a contact that indicates overload trip of the circuit-breaker.

Enclosed TeSys™ Deca Starters

TeSys Deca enclosed full-voltage starters are available in Type 1 and Type 12/3R enclosures. The enclosed TeSys Deca offer accepts standard TeSys Deca accessories and all Insta-Kits control units and control power transformer kits. For additional sizes, combinations and accessory options, see Catalog 8100CT1901. Check with local sales office for availability.

Replaceable Switching Modules

- Innovative contact switching modules for TeSys™ Giga Contactors
- Replace worn-out poles with a new switching module in minutes, without having to disassemble the entire product.
- No special tools are needed for the replacement

LA9G3QA

Table 18.114: TeSys™ Giga – Switching modules for TeSys Giga contactors (Standard and Advanced versions)

Description	Suitable for:	For contactors	Reference
3 or 4 switching module kits	3-pole	LC1G115/LC1G225	LA9G3QA
		LC1G265/LC1G330	LA9G3RA
		LC1G400/LC1G500	LA9G3SA
	4-pole	LC1G630/LC1G800	LA9G3TA[8]

		LC1G265/LC1G330	LA9G4RA
		LC1G400/LC1G500	LA9G4SA
		LC1G630/LC1G800	LA9G4TA[8]

**NOTE:** During replacement, replace all switching modules. After replacement, change the position of the RESET button on the control module from A to B or B to A.

[6] Supplied per pole are: 2 fixed contacts, 1 moving contact, 2 deflectors, 1 backplate, mounting screws and washers.  
 [7] Two identical components per pole are supplied.  
 [8] Available 2Q 2022.

**TeSys™ AK5 Panel Busbar System**

The AK5 pre-fabricated bus bar system provides a quick and easy method of mounting control devices. All components are finger safe, UL Listed, CSA approved and CE marked. Although the AK5 system can be screw mounted onto any type of support, it **must be mounted** on the AM1DL201 DIN rail when component mounting plates incorporating a tap-off are used. When using tap-offs, the nominal operating current of the bus bar (160 A @ 35°) must not be exceeded. Approvals include IEC 439, UL, CSA, DNV and LROS.
