Award-winning Designs: Ingenious Beauty

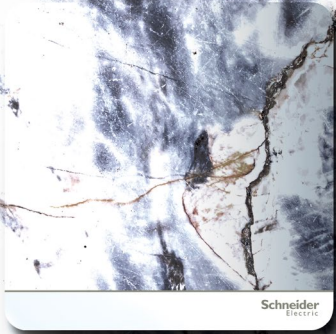

The ground-breaking AvatarOn series is a true marriage of aesthetics and practicality, making it a perfect choice for all home or office designs. The switches are mirror-smooth, and pair with Type 86 standard base boxes for a close fit to the wall. Moreover, the revolutionary switches can be fitted with a wide variety of changeable covers or customizable covers, giving AvatarOn the flexibility to integrate easily with any décor styles, meeting all aesthetic needs.

Considered the perfect combination of form and function, our patented “Slim Rocker, Sure Click” SS technology gives AvatarOn not only greater thinness overall, but also a near zero contact jitter that reduces sparks, thus ensuring safe and reliable use.

AvatarOn gained the international recognition for its innovative design and quality excellence and was awarded the iF Design Award in 2017, one of the world's most authoritative and reputable industrial design awards.

Innovative Design Limitless Possibilities for Change

The signature frameless unitary design of AvatarOn defines a new standard of switch designs by challenging the prevailing concept of switch designs and establishes a new aesthetic philosophy.

Design trends are constantly evolving, and home décor changes from time to time accordingly; the innovative snap-on replaceable cover design of AvatarOn allows consumers the flexibility to personalize their switches with one-hand cover removal, just like changing a mobile phone case.

A full range of AvatarOn switch covers are available in an array of designs and textures, allowing AvatarOn to blend in seamlessly with any home décor and achieve true aesthetics.

Furthermore, the streamlined design of AvatarOn means there are no difficult-to-clean nooks and crannies, and the simple and easy-mount changeable covers provide cost-saving alternatives to future upgrades and replacements.

Customizable Covers for True Adaptability

An extensive range of AvatarOn switches are available in an array of replaceable covers for full customization and integration to any home décor.

Standard Options

The stylish and streamlined design of AvatarOn switch covers are finished in white, wine gold, dark grey and dark wood material for the classic look and universal elegance.

Customized Patterns

Stamp your style with inspiring designs. The customized pattern covers of AvatarOn provides you with an extra canvas to showcase your creativity in a subtle yet apparent way.

DIY Photos

A home reflects the people who live there, and the best way to fill the house with photographs of loved ones. The AvatarOn DIY photo covers capture those special moments in life so they continue to touch you every day with every flick of a switch.

Let Imaginations Run Wild

The unequalled design and unique glossy surface of AvatarOn faceplate serves as a perfect canvas for DIY customization. Additionally, Fotomax printing service utilizes the advanced digital printing technology to print original and personalized covers with clear details and long-lasting colors. With its one-stop online order platform, consumers can recreate the product of their imaginations with ease and convenience.

High-power USB In-wall Charger

The new AvatarOn high-power USB charger incorporates fast-charging USB Type C ports, with maximum 65W power supply. You can fully charge your laptop directly via a USB Type C cable, without carrying a laptop charger around.

The dual USB Type A+C charger also supports concurrent charging of electronic devices using Type A ports, including tablets, smartphones and smartwatches. It accommodates the diverse power needs of home office equipment and smart devices in the trending hybrid working environment, allowing you to stay connected with your family, friends and business.

To further enhance the charging experience, the high-power USB charger comes with a smartphone stand for space-saving and more convenient charging. The fast-charging USB charger is ultimately an indispensable design for the next generation of smart living, boosting charging speed, safety and convenience.

Tech-chic Design that Shines

The clever soft LED locators merges seamlessly with AvatarOn sleek giant dolly, creating a stylish and streamlined design. Unobtrusive by day, the fluorescent white locators of the switches glow with soft luminescence in the dark, indicating the exact location of each switch at night. Combined with the outstanding performance, reliability, lifespan and energy saving features, the subtle glow of AvatarOn switch beautifully blends practical aesthetics with leading-edge design.

Create Limitless Possibilities
