Industrial Edge control for IIoT

Modicon IIoT-native edge controllers manage complex interfaces across assets and devices or directly into the cloud, with embedded safety and cybersecurity. Modicon provides performance and scalability for a wide range of industrial applications up to high-performance multi-axis machines and high-available redundant processes.

To be competitive in today’s digital era, machine builders must be innovative. Smart machines, those that are better connected, more flexible, more efficient, and safe, are enabling machine builders to innovate in ways never before possible.

EcoStruxure, Schneider Electric’s open, IoT-enabled architecture and platform, offers powerful solutions for the digital era. As part of this, EcoStruxure Machine brings powerful opportunities for machine builders and OEMs, empowering them to offer smart machines and compete in the new, digital era.

EcoStruxure Machine brings together key technologies for product connectivity and edge control on premises, and cloud technologies to provide analytics and digital services. EcoStruxure Machine helps you bring more innovation and added value to your customers throughout the entire machine life cycle.

Innovation at Every Level for Machines is full systems across three layers:

- **Connected products**
  Our connected products for measuring, actuating, device level monitoring, and control adhere to open standards to provide unmatched integration opportunities and flexibility.

- **Edge Control**
  We are IIoT-ready with a proven set of tested and validated reference architectures that enable the design of end-to-end open, connected, and interoperable systems based on industry standards. Ethernet and OPC-UA facilitates IIoT convergence meaning machine builders reap benefits from web interfaces and cloud.

- **Apps, Analytics & Services**
  Seamless integration of machines to the IT layer allows the collection and aggregation of data ready for analysis — for machine builders and end users alike this means increased uptime and the ability to find information faster for more efficient operations and maintenance.

These levels are completely integrated from shop floor to top floor. And we have cloud offers and end-to-end cybersecurity wrapped around.

EcoStruxure Machine makes it easier for OEMs/machine builders to offer their customers smarter machines. The advent of smart machines is driven by the changing needs of end users:

- Evolving workforce
- Reducing costs
- Dynamic markets
- Shorter life cycles
- Prioritizing safety and cybersecurity

EcoStruxure Machine provides one solution for the whole machine life cycle.

- With Smart Design & Engineering the time to market is reduced by up to 30% using our automated engineering and the simulation capabilities
- During Commissioning & Operation of the machine, resources such as energy, material and loss can be improved, and with seamless integration to the IT world efficiency can be improved by up to 40%
- Smart Maintenance & Services reduces the time for corrective actions up to 50%

General presentation

Modicon M221
Programmable logic controller for hardwired architectures

Fastest and smallest logic controllers on the market

Flexible and scalable machine control

The ranges of Modicon™ controllers provide flexible and scalable machine control. Ethernet connectivity, USB port for programming, and an embedded web server: it’s all included.

From logic to motion control, the Modicon range offers flexibility and scalability to suit your needs

Best-in-class performance

Fastest and smallest logic controllers on the market

Modicon M221: the small yet powerful logic controller for hardwired solutions

Everything you need is embedded

The Modicon M221 offers best-in-class performance. Available also in book format, the Modicon M221 requires minimal installation and offers tremendous versatility.

Modicon M221 Book and a broad choice of I/O extension modules

> SD card, Run/Stop switch, USB port, 2 analog inputs, serial line, Ethernet and serial line, cartridge extension (on standard version): it’s all **embedded**.
> Thanks to its high degree of **flexibility**, it’s very easy to add additional modules (safety modules, Counter module, Tesys motor starter module, extensive line of analog and digital modules, …), and to create distributed I/O islands over Ethernet network, keeping everything in **just one configuration**
Modicon M221: the small yet powerful logic controller for hardwired solutions

Intuitive machine programming with EcoStruxure Machine Expert - Basic

EcoStruxure Machine Expert - Basic is the universal programming software for machines automated by Modicon M221 logic controllers. Simple navigation that requires only fewer clicks delivers a more efficient engineering process.

- All programming, visualization, and commissioning are handled in just one intuitive tool that is available as a free download.
- No training required

Connected everywhere

For simplified maintenance, commissioning, and uploads/downloads, simply connect anytime, anywhere.

- Modem and router offer
- QRcode on the front of the controller

Customization and services

Our experts help you every step of the way, from perfecting machine design to on-site services of the finished machine. Global support, 24/7 hotline services, and replacement parts centers around the world enable you to deliver superior customer support and satisfaction.

Modicon M221
Programmable logic controller for hardwired architectures
General presentation

Modicon M221 logic controllers (standard format)

Modicon M221 Book logic controllers

Presentation

Applications
Modicon M221 and M221 Book logic controllers are designed for simple machines. They can optimize the size of wall-mounted and floor-standing control system enclosures due to their compact dimensions.

- The controllers are available in 2 formats:
  - Modicon M221 controllers (TM221Cxxx references) offer excellent connection capacity and customization options without increasing the controller size, using I/O, communication, or application cartridges.
  - Modicon M221 Book controllers (TM221Mxxx references) offer very small dimensions and a wide choice of connections.

- M221 and M221 Book controllers have an embedded Ethernet port meaning they can be easily integrated in control system architectures, for remote control and maintenance of machines using applications for smartphones, tablets, and PCs.

- The wealth of functions embedded in M221 and M221 Book controllers minimizes the cost of the machine:
  - Functions embedded in the controller: Modbus serial link, USB port dedicated to programming, and simple position control functions (high speed counters and pulse train outputs trapezoidal and S-curve profile)
  - Functions embedded in Modicon TM3 extensions: functional safety modules, motor-starter control module, and remote expansion system
  - Functions embedded in the dedicated display unit

- The application is created quickly thanks to the intuitive nature of the EcoStruxure Machine Expert - Basic programming software, which also has embedded configuration of the display unit and extensions, including the functional safety modules.

Main functions

<td></td>
</tr>
<tr>
<td>16 I/O: 95 x 90 x 70 / 3.74 x 3.54 x 2.75</td>
<td>16 I/O: 70 x 90 x 70 / 2.75 x 3.54 x 2.75</td>
</tr>
<tr>
<td>24 I/O: 110 x 90 x 70 / 4.33 x 3.54 x 2.75</td>
<td>24 I/O: 70 x 90 x 70 / 2.75 x 3.54 x 2.75</td>
</tr>
<tr>
<td>40 I/O: 163 x 90 x 70 / 6.41 x 3.54 x 2.75</td>
<td></td>
</tr>
</tbody>
</table>

Supply voltage
24 V ac or 100...240 V ~ 50/60 Hz

Connection of the embedded I/O
On removable screw terminal blocks at intervals of 5.08 mm (0.20 in.)
24 V/0.25 A power supply provided by the controller for sensor inputs on TM221CxxxR models
16 I/O: On removable screw or spring terminal blocks at intervals of 3.81 mm (0.15 in.)
32 I/O: On HE10 connectors with HE 10 cables/bare wires or Telefast ABE7 connection sub-bases (1)

Analog inputs
2 embedded inputs on each TM221Mxxx and TM221Cxxx controller

Embedded Ethernet communication
Yes on TM221Cxxx
Yes on TM221Mxxx

Serial link
1 embedded link
1 or 2 embedded links

Cartridges
1 slot for 1 or 2 cartridges:
- I/O cartridge (analog inputs or outputs, temperature inputs)
- Communication cartridge (serial link) or application cartridges (hoisting, conveying, and packaging)

Hardware characteristics

M221 and M221 Book controllers each have an embedded:
- Run/Stop switch
- slot for an industrial SD memory card
- QR code for direct access to its technical documentation

(1) Telefast Modicon ABE7 pre-wired system to be ordered separately. Refer to the catalog ref. DIA3EDD1565962EN or our website www.schneider-electric.com

**Modicon M221**
Programmable logic controller for hardwired architectures
Remote graphic display unit for Modicon M221 and M221 Book logic controllers

**TMH2GDB remote graphic display unit**

**Presentation**

The TMH2GDB remote graphic display unit is an HMI dedicated to M221 and M221 Book logic controllers. It is mounted on the front panel of a wall-mounted or floor-standing enclosure (degree of protection IP 65) or, using mounting brackets, at the back of an enclosure on a panel or symmetrical rail.

The TMH2GDB display unit is ready to use: the main application parameters can be accessed, with no prior programming, as soon as it is connected to the logic controller. Customized dialog pages can, however, be easily created using predefined templates in the EcoStruxure Machine Expert - Basic software dedicated to Modicon M221 and M221 Book logic controllers.

The TMH2GDB remote graphic display unit is a multifunction display unit that runs alongside your machine throughout its life cycle:
- During debugging: reading the states and values of variables and providing complete diagnostics of the controller configuration
- During installation: options for setting the time and configuring the communication ports
- During runtime: an operator interface created in the EcoStruxure Machine Expert - Basic software can be used to (for example): display information in the form of text, values, bargraphs, or gages, perform machine control actions, enter or modify data, customize buttons on the front panel
- During maintenance: the page displaying alarm messages is permanently accessible by pressing a single key. Alarm messages are stored and time-tagged in a page of the log. An icon, which is always visible, flags up the presence of at least one alarm message. Access to each page and modification of its values can be protected by a password.

**Main characteristics**
- Backlit monochrome STN LCD 60x40 mm (2.36 x 1.57 in.)
- 5 lines of 20 to 35 characters, depending on the type of page
- Title block at the top of the page
- Title block at the bottom of the page
- 10 languages available: English, French, Czech, German, Italian, Japanese, Portuguese, Simplified Chinese, Spanish, and Turkish
- Up to 4 customizable service keys
- 100 HMI pages maximum
- Dimensions on the front panel of the machine (w x h x d): 80 x 126 x 19.2 mm (3.15 x 4.96 x 0.75 in)

**Conformity**
- CE, cULus Listing Mark

**Environmental characteristics**
- Ambient operating temperature: -15...+50 °C (5...122 °F)

**Power supply characteristics**
- 5 V (200 mA) supplied directly by the controller
- Max. consumption: 1 W
Modicon M221
Programmable logic controller for hardwired architectures
Remote graphic display unit for Modicon M221 and M221 Book logic controllers

TMH2GDB remote graphic display unit (continued)
Installation and setup

The TMH2GDB remote graphic display unit is mounted in a 22 mm (0.87 in.) diameter hole and is connected to the SL or SL1 serial link on Modicon M221 and M221 Book logic controllers with the XBTZ9980 and VW3A1104R10 cable, which also supplies it with power (no other Modbus slave equipment must be connected on this link) (1).

The debug screens, including those for setting the time and configuring the communication ports, are already configured and available as soon as the display unit is connected to the logic controller (2).

The HMI (runtime) pages and alarm pages are created and configured very easily in the EcoStruxure Machine Expert - Basic programming software, from predefined pages:
- "Alarm display" template
- "Menu" template
- "Monitoring" template
- "Control panel" template
- "Bargraph" template (1 or 2 bars)
- "Gage" template

These pages constitute part of the controller application. They are transferred to and stored in the M221 and M221 Book logic controller memory, no transfer is necessary between the PC and the TMH2GDB graphic display unit. The latter is operational as soon as it is connected to the serial port on the logic controller.

The Home page can be selected by programming. Each HMI and alarm page can be displayed by navigating the front panel using the keys or called by a program. Alarm pages can also be displayed on a red background.

The HMI pages can be created in several languages, the language displayed on the graphic display unit can then be selected by the operator in the display configuration menu.

(1) Neither the serial link on the TMC2SL1 cartridge, nor the SL2 embedded serial link, can be used to connect the graphic display unit.
(2) When the controller has no application program, only the product reference and the controller firmware version are accessible. The controller firmware version must be V1.3 or later.

Examples of screens
Modicon M221
Programmable logic controller for hardwired architectures
Communication via modem and router

Communication via modem and router

The communication via modem and router offer is dedicated to the following applications:
- Synchronization between remote machines; direct data exchange between controllers
- Remote maintenance; access to the controller via the EcoStruxure Machine Expert - Basic programming software
- Remote control and monitoring of machines; receipt of information and sending commands on GSM/UMTS phone (1)

This offer comprises a Schneider Electric modem, a GSM/UMTS modem, and an eWon VPN router.

(1) Global System Mobile (2G)/Universal Mobile Telecommunications System (3G)
Modicon M221
Programmable logic controller for hardwired architectures
I/O extensions with Modicon TM3 expansion modules

Extended I/O with Modicon TM3 I/O system

1 Modicon M221 Logic controller (TM221CE or TM221ME)
2 Modicon TM3 I/O system (2...8)
3 TM3 Expert counter module
4 TM3 Digital I/O module
5 TM3 Analog I/O module
6 TM3 Expert module for controlling TeSys motor starters
7 TM3 Bus expansion module (transmitter and receiver) and bus expansion cable
8 TM3 Bus Coupler (2x bus couplers are allowed)

Modicon TM3 expansion modules
- The capacity of M221 and M221 Book logic controllers can be enhanced with the Modicon TM3 expansion module offer (1):
  - Digital I/O modules that can be used to create configurations with up to 488 digital I/O. These modules are available with the same connections as the controllers.
  - Analog I/O modules that can be used to create configurations with up to 114 analog I/O and are designed to receive, amongst other things, position, temperature, and speed sensor signals. They are also capable of controlling variable speed drives or any other device equipped with a current or voltage input.
  - Expert modules for high-speed counting (24 V inputs), and event counting with or without event management on fast inputs/thresholds/stop.
  - Expert module for control of TeSys motor-starters, connected with RJ 45 cables to simplify wiring up the control section.
  - Functional safety modules that simplify wiring and can be configured in the EcoStruxure Machine Expert - Basic software (2).

Modicon TM3 Bus coupler
- M221 controller allows to connect up to 2x Modicon TM3 Bus Couplers on serial communication or on an Ethernet (Modbus/TCP) communication.
The configuration is done thanks to Ecostruxure Machine Expert - Basic software. The TM3 bus port located on the right-hand side of the Modicon M221 controller allows connection of any of the TM3 expansion modules for local, remote, or distributed I/O configurations:
  - Local I/O: 7x Modicon TM3 expansion modules (max. configuration)
  - Remote I/O: + 7x remote modules (equals 14x TM3 modules: 7x local + 7x remote)
  - Distributed I/O: up to 2x TM3 Bus Couplers, allowing 3x TM3 I/O modules by Bus Coupler

(2) Please consult catalog Ref. DIA3ED2180701EN
Modicon M221
Programmable logic controller for hardwired architectures
Control architecture

Control architecture for standalone machines

Typical applications: repetitive machines
- Packaging: recycling machines
- Textile-clothing machines
- Commercial equipment: automatic wash units, advertising hoardings, etc.
- Construction/service sector: access and entry control for automated systems
- Other sectors: woodworking, agriculture, fish farming, incubators, swimming pools, etc.

- M221 (TM221C) controllers

- M221 Book (TM221M) controllers

(1) Only use one switch, as Hubs are not compatible.
Modicon M221
Programmable logic controller for hardwired architectures
Embedded communication
Characteristics

**Embedded communication**

**Communication on Ethernet network**
TM221CE and TM221ME controllers have an embedded RJ 45 Ethernet port (10/100 Mbps, MDI/MDIX) with Modbus TCP (Client/Server and IOScanner), and Ethernet IP (adapter) protocols.
- As well as the default address based on the MAC address, it is possible to assign the controller IP address via a DHCP server or via a BOOTP server.
- The Ethernet port also offers the same application upload/download, update, and debug functions when the controller is supplied with power.
- A firewall can be used to lock each communication protocol.
For connection cables and accessories for Industrial Ethernet network, consult the catalog ref. DIA3ED2160105EN

**Serial links**
- Each TM221C controller has an embedded serial link that can be configured as RS 232 or RS 485. A 5V/200 mA power supply is available on the RJ 45 connector, which then supplies the TMH2GDB display unit or Magelis XBTN or XBRTRT HMI.
- Each TM221M controller has one or two embedded serial links.
  - The SL1 serial link, found on each M221 Book controller, can be configured as RS 232 or RS 485. A 5V/200 mA power supply is available on the RJ 45 connector, which then supplies the TMH2GDB display unit, Magelis XBTN or XBRTRT HMI, or other device.
  - The SL2 serial link, found on TM221M16, TM221M24 and TM221M40 controllers only, is configured as RS 485. Serial links also offer application upload/download, update, and debug functions when the controller is supplied with power. Embedded in both links are the three main commercially-available protocols:
    - Modbus ASCII/RTU Master or Slave
    - ASCII character string
    - Modbus Serial IOScanner
For connection cables and accessories for serial link, consult the catalog ref. DIA3ED2160106EN

**Software programming with power off charging function**
The programming port, equipped with a USB mini-B connector, is embedded in each M221 and M221 Book controller; it is dedicated to communication with a PC equipped with EcoStruxure Machine Expert - Basic for programming, debugging, and maintenance.
In addition, it offers the ability to load an application program or update the firmware without the controller being powered by another source.

**Characteristics of M221 and M221 Book logic controllers**

- **Certifications:** CE, UL Listing Mark, CSA, RCM, EAC, LR, ABS, DNV - GL

**Environment**
- **Ambient operating temperature:** - 10...+ 55 °C (14...+ 131 °F)
- **Storage temperature:** - 25...+ 70 °C (- 13...+ 158 °F)
- **Relative humidity:** 10...95% (non-condensing)
- **Operating altitude:**
  - 0...2,000 m (0...6,562 ft): complete specification for temperature and insulation
  - 2,000...4,000 m (6,562...13,123 ft):
  - temperature derating: + 1 °C/400 m (+ 1.8 °F/1,312 ft)
  - insulation losses: 150 V = 1,000 m (3,280 ft)
  - Storage altitude: 0...3,000 m (0...9,842 ft)
- **Immunity to mechanical stress (vibrations):**
  - For 1131: 5...8.4 Hz (amplitude 3.5 mm/0.138 in.); 8.4...150 Hz (acceleration 0.7g)
  - For merchant navy: 5...13.2 Hz (amplitude 1.0 mm/0.039 in.); 13.2...100 Hz (acceleration 0.7g)

**Power supply**
Two power supply types are available depending on the M221 controller model:
- **Voltage limit (including ripple):** 19.2...28.8 V / 85...264 V
- **Immunity to micro-cuts (class PS-2):** 10 ms
- **Max. consumption:**
  - TM221 powered with AC, depending on model: 31...41 VA without expansion modules, 46...70 VA with maximum expansion module configuration
  - TM221 powered with DC, depending on model: 3.2...4.9 W without expansion modules, 10...23 W with maximum expansion module configuration
Modicon M221
Programmable logic controller for hardwired architectures
Modicon M221 logic controllers

**Description**

**M221 logic controllers (TM221C●●●)**

1. Removable screw terminal block, 3 terminals for connecting the 24 V or 100-240 V power supply (depending on the model).
2. On TM221C●●● controllers: RJ 45 connector for Ethernet network, with activity and exchange speed LED indicator.
3. Behind the removable cover:
   - Mini-B USB connector for connecting a PC equipped with EcoStruxure Machine Expert - Basic software.
   - Slot for the industrial SD memory card.
   - Run/Stop switch.
5. Behind a flap: dedicated removable connector for two analog inputs.
6. QR code for access to the controller technical documentation.
7. Connection of 24 V logic inputs on removable screw terminal blocks (1).
8. On top of the controller: slot for backup battery.
9. LED display block showing:
   - the status of the controller and its components (battery, industrial SD memory card).
   - the status of the serial link.
   - the status of the embedded I/O.
10. On the side of the controller: TM3 bus connector for the link with a Modicon TM3 expansion module.
11. Slot(s) for I/O cartridge(s), communication cartridge, or application cartridge(s): one on M221 controllers with 16 and 24 I/O, two on M221 controllers with 40 I/O.
12. Connection of relay/transistor logic outputs: on removable screw terminal blocks (1).
13. Clip for locking on symmetrical rail.

(1) Removable screw terminal blocks equipped with screw terminals, supplied with M221 controller.

**Graphic display unit TMH2GDB**

2. Ten command buttons, two of which can be customized with the option of identifying associated functions.
3. Rotary navigation and control wheel.

On the back of the display unit:

4. Mounting system consisting of locking nut, seal, and anti-rotation tee.
5. RJ 45 connector for the cable connecting the graphic display unit to the Modicon M221/M221 Book logic controller.
Modicon M221
Programmable logic controller for hardwired architectures
Modicon M221 Book logic controllers

Description

M221 Book logic controllers (TM221M●●)

1. Removable screw terminal block, 3 terminals for connecting the 24 V supply
2. On TM221ME16●● and TM221ME32●● controllers: RJ 45 connector for Ethernet network, with activity and exchange speed LED indicator
   On TM221M16●● and TM221M32●● controllers: RJ 45 connector for SL2 serial link
3. SL1 serial link port (RJ 45 connector)
4. Behind the removable cover: removable connector for two analog inputs
5. QR identification code for the controller technical documentation
6. Backup battery slot

Behind the removable cover: 7, 8, and 9
7. Slot for the industrial SD memory card
8. Run/Stop switch
9. Mini-B USB connector for connecting a PC equipped with EcoStruxure Machine Expert - Basic software
10. TM3 bus connector for linking to a Modicon TM3 expansion module
11. LED display block showing:
   - the status of the controller and its components (battery, industrial SD memory card)
   - the status of the serial links
   - the status of the I/O

12. Connection of 24 V logic inputs:
   - on 16-channel controllers: removable screw or spring terminal blocks (1)
   - on 32-channel controllers: HE10 connector
13. Connection of relay/transistor logic outputs:
   - on 16-channel controllers: removable screw or spring terminal blocks (1)
   - on 32-channel controllers: HE10 connector
14. Clip for locking on L-shaped symmetrical rail

(1) Removable terminal blocks equipped with screw or spring-type terminals depending on controller type. Terminal blocks supplied with M221 Book controller.

Graphic display unit TMH2GDB

1. Control screen: backlit STN graphic screen, two-tone (white/red)
2. Ten command buttons, two of which can be customized with the option of identifying associated functions
3. Rotary navigation and control wheel

On the back of the display unit:
4. Mounting system consisting of locking nut, seal, and anti-rotation tee
5. RJ 45 connector for the cable connecting the graphic display unit to the Modicon M221/M221 Book logic controller

| Cable for connecting the analog inputs embedded in M221 and M221 Book controllers | Equipped with 1 dedicated removable connector at one end and bare wires at the other end | 1 m (3.28 ft) | TMACBL1 | 0.024 |

(1) Please consult catalog Ref. DIA3ED2180701EN
(2) Please consult catalog Ref. DIA3ED2140109EN
(3) Unshielded, non-grounded cable. Only for use on temporary connections. For permanent connections, use cable reference BMXXCAUSBH018.
# Modicon M221
Programmable logic controller for hardwired architectures
