

Indestructible

Merten Anti-Vandalism

Taking the hit when the going gets tough

Merten Anti-Vandalism

Merten Anti-Vandalism

Some situations are just too much for normal electrical installations. For example, when you shoot the ball in the thick of the action and it doesn't make the basket but hits the light switch instead. Fortunately, the Merten Anti-Vandalism range is available for such cases.

This extremely hard-wearing switch range has been specially developed for situations where the going can get tough: inside schools, sports halls, youth centres and public-access buildings, for example. The Merten Anti-Vandalism range can withstand hard knocks or anyone hitting the devices with tools and even fire.

Special flush-mounted range – Merten Anti-Vandalism

Theft proof: Seals to close off the screw holes that can only be drilled open

Indestructible: Thick-walled, coated metal frame, 1-gang, 2-gang and 3-gang

Robust: The metal upper rocker

Impossible to break into: The thick, insulated, coated aluminium die-cast metal covers and the metal frame are anchored to the wall

Available as accessory: E10 neon lamp or LED in different colours

Perfect hold: 4 mm wall-fixing screws anchor the frame and inserts in the masonry

Secure, easy and quick to install for new installations: No time-consuming drilling in the masonry is necessary with the special size 60 mounting box with integrated screw fastenings and pointed dowel holes

The Merten Anti-Vandalism range

Rocker switch
