

Standards and regulations

Energy Savings Certificate ("CEE")

Ref. CEE

Duration: 1 day

Objectives

- Know how to use financial leverage for energy management projects.

Intended audience

Managers, designers, operators and service providers.

Path

Prerequisites

Have taken the following course:

EFFEN p. B5

Next courses to be taken

CPE p. B4

Level

Mastery

Breakdown

- 100% classes.

Content

The energy saving certificate scheme ("CEE"), created by Articles 14 to 17 of Law no. 2005-781 of 31st July 2005 is part of a program that sets the guidelines for the energy policy (POPE Law) and is one of the key instruments of the energy-demand control policy.

The scheme is based on the public authorities making energy savings mandatory for energy retailers (electricity, gas, heat, cooling, heating oil and, since recently, fuel for automobiles). Retailers are thereby given incentive to actively promote energy efficiency to their customers: households, regional or trade authorities. In doing so, they also provide financial support to project owners.

Analysis of financial tool:

- regulations,
- background and developments,
- scheme mechanism.

Analysis of methodology to be implemented:

- analysis prior to granting of CEE certificates,
- valorisation of CEE certificates,
- fact sheet.

Presentation of other forms of financial support:

- for industry and service sector,
- for residential sector.
