## RoHS Compliant EU Directive 2002/95/EC

RE: American Power Conversion Corporation  
Product Certification of Compliance

Dear APC Customer:

APC is committed to providing customers with products that are fully compliant with all regulations, international protocols, and customer standards to which they are subject. Recently, the European Union (EU) enacted the RoHS and WEEE directives that are intended to protect the environment and our natural resources. The RoHS directive restricts six chemical substances in products sold into EU countries and the WEEE directive requires that products sold into the EU be collected at the end of their lifespan. Please feel free view details of the APC WEEE and RoHS implementation program at the APC web site at: <http://www.apc.com/corporate/environmental.cfm>.

This Product Certification of Compliance with the RoHS Directive applies to the following part(s):

Product SKU	Product Description	RoHS Compliance Status	Comments
AP9833	APC USB to Serial DB9 Smart Signaling Cable	RoHS Compliant, Lead-Free Production	None

As a customer who uses our products as components within your own designs or a purchaser of APC products, you have a vested interest in our compliance with the RoHS and WEEE directives. All of us at APC greatly appreciate your continued interest in our company's products.

Sincerely Yours,

Raymond P. Lizotte, Jr.  
Product Environmental Compliance Engineer  
Environmental Programs Office  
APC Design Center

APC's WEEE-ROHS Program is on the Web: <http://www.apc.com/corporate/environmental.cfm>

APC bases its RoHS compliance status knowledge on information provided by third parties and has taken and continues to take reasonable steps to provide representative and accurate information, but may not have conducted destructive testing or chemical analysis on incoming components and materials. Compliance with the RoHS Directive means that the product(s) referred above complies with the requirements of EU Directive 2002/95/EC (RoHS), maximum concentration values (MCVs) per Commission Decision 2005/618/EC and subsequent additions to the list of exempted material use applications.
